THE MODERN TREATMENT OF SYPHILITIC DISEASES, both Primary and Secondary. Comprising the Treatment of Constitutional and Confirmed Syphilis, by a Safe and Successful Method. With numerous Cases, Formulæ, and Clinical Observations.

By **LANGSTON PARKER,**
Surgeon to the Queen's Hospital, Birmingham.
Third Edition, 8vo, cloth, 10s.

"Those who have to contend against this most frequent disease cannot do better than consult Mr. Parker's very useful work. His treatment appears to us highly judicious."—*'British and Foreign Medico-Chirurgical Review.'*

"The third edition of Mr. Parker's valuable treatise may be almost regarded as a new work, so much is it extended and improved. It contains the result of twenty years' experience in the treatment of syphilis, during which period the author states that he has personally treated more than eight thousand cases. In it the Profession is presented with an admirable collection of cases, carefully tabulated and indexed. Mr. Parker's opinions are moderate and judicious, and we consider that he takes a sound view of the mercurial and non-mercurial treatment of the disease."—*'Dublin Quarterly Journal of Medical Science.'*

THE DISEASES, INJURIES, AND MALFORMATIONS OF THE RECTUM.

By **T. J. ASHTON,**
Surgeon to the Blenheim Dispensary;
Formerly House-Surgeon at University College Hospital.
Second Edition, 8vo, cloth, 8s.

"We can conscientiously declare that we find in it more information than is to be obtained from any single volume yet published on the subject of which it treats."—*'Lancet.'*

"It is the most complete of all the works at present under consideration."—*'New York Journal of Medicine.'*

"Mr. Ashton's work is by a man who evidently knows his subject practically, and has enjoyed ample opportunities of illustrating his statements by cases which have fallen under his own observation. His book will do much to rescue a large class of diseases from the hands of ignorant impostors."—*'Medical Times and Gazette.'*

"It may be consulted with much advantage by those who are engaged in the treatment of diseases of the rectum and anus."—*'Association Medical Journal.'*

"We recommend the volume to our Medical brethren, regarding it as a most useful and valuable addition to our literature, and are certain that it will conduce to its author's reputation as a practical surgeon."—*'Half-yearly Abstract of the Medical Sciences.'*

A PRACTICAL TREATISE on the DISEASES
of the TESTIS, and of the SPERMATIC CORD and SCROTUM. With numerous Wood Engravings.

By T. B. CURLING, F.R.S.,

Surgeon to the London Hospital.

Second Edition, 8vo, cloth, 14s.

By the same Author,

ON DISEASES OF THE RECTUM.

Second Edition, 8vo, cloth, 5s.

PSYCHOLOGICAL MEDICINE: AN INTRODUCTION to the PRACTICAL STUDY of INSANITY.

By DANIEL NOBLE, M.D.,

Visiting Physician to the Clifton Hall Retreat, Manchester.

Second Edition, 8vo, cloth, 10s.

"A valuable and most able treatise, which is by itself sufficient to establish for the author a high reputation as a psychological writer. . . . It is replete with interesting and well-selected cases; its style is simple, lucid, and elegant, and its teaching sound and judicious."—*'Asylum Journal of Mental Science.'*

"This work the author (though not according in everything it contains) would strongly recommend to the perusal of every one entering upon the practice of the profession."—Dr. Carpenter, in Preface to the Fifth Edition of his *'Human Physiology.'*

ON DISEASES OF THE LUNGS AND
HEART.

By ARCHIBALD BILLING, M.D., F.R.S.

8vo, cloth, 6s.

"The views propounded by Dr. Billing are those which are most available for diagnostic purposes."—*'Association Medical Journal.'*

By the same Author,

FIRST PRINCIPLES OF MEDICINE.

Fifth Edition, revised and improved, 8vo, 10s. 6d.

"One of the most useful Medical Works that it has ever fallen to our lot to peruse."—*'Medical Times.'*

ON THE DISEASES OF THE BLADDER
AND PROSTATE GLAND.

By WILLIAM COULSON,
Surgeon to, and Lecturer on Surgery at, St. Mary's Hospital.

Fifth Edition, 8vo, cloth, 10s. 6d.

By the same Author,
ON LITHOTRITY AND LITHOTOMY.

With numerous Engravings on Wood, 8vo, cloth, 8s.

PATHOLOGICAL CHEMISTRY,
IN ITS APPLICATION TO THE PRACTICE OF MEDICINE.

Translated from the French by MM. BECQUEREL and RODIER.

By STANHOPE TEMPLEMAN SPEER, M.D.

Physician to the Cheltenham General Hospital and Dispensary.

8vo, cloth, 12s.

"The work of Becquerel and Rodier is one eminently adapted for the practitioner. Without entering into minute details or elaborate disquisitions, it furnishes a valuable collection of well-ascertained facts in pathological chemistry. Dr. Speer's translation is all that could be desired, and we cordially recommend the work to our readers."—*'Edinburgh Medical Journal.'*

"In reviewing this work in the original French, we expressed in very strong terms the high value we placed upon it, and how important an addition we considered it to be to medical literature. We now cordially welcome its appearance in an English dress. Dr. Speer has, we think, done good service to the Profession by undertaking this translation, which he has both faithfully and ably executed, and we therefore thank him for furnishing us with what cannot but be regarded as a desideratum, for we had no work in our own language so full or so complete on the subject on which it treats."—*'Dublin Quarterly Medical Journal.'*

THE MEDICAL TIMES AND GAZETTE.

NOTICE.

The Publisher has the satisfaction to announce to the Subscribers to the MEDICAL TIMES AND GAZETTE, and also to the Profession at large, that the New Volume for 1858 will contain a Series of Papers on the

PHYSIOGNOMY OF INSANITY,

BY DR. CONOLLY.

In order to do full justice to this highly-interesting and important Series, communicated by the first authority in this country, it has been determined to illustrate the subject by Portraits taken from Life. These will be presented GRATIS to the Subscribers, and it will justify the attention now claimed to this announcement, and that no expense has been spared, to state that the

PHOTOGRAPHS have been taken by Dr. DIAMOND,
Copied in LITHOGRAPHY by Mr. BAGG,
And the PRINTING has been executed by Messrs. HULLMANDEL
and WALTON.

The First Portrait, illustrating "RELIGIOUS MELANCHOLY," will accompany the First Number of the New Volume, to be published on the 2nd of January, 1858.

TERMS OF SUBSCRIPTION:

Price Unstamped, of any Bookseller, 7d., or £1 10s. 4d. per Annum.

Price Stamped, 8d., or £1 14s. 8d. per Annum.

Or if paid in advance, by Post-office Order, £1 10s. per Annum, for which sum the Journal will be regularly transmitted free by post for the whole year throughout Great Britain, and to the most distant of the British Colonies.

Orders on Army or Navy Agents should be made in favour of Mr. JAMES LUCAS, 11, New Burlington-street, London.

Price—Stamped, 5d. ; Unstamped, 4d.; Annual Subscription, 17s. 4d.,
being only 4d. per copy, stamped.

Half the Price of any existing Medical Journal, nevertheless the mirror of
all and of every passing Medical Event.

This Journal is distinguished from all others by features peculiar to itself.

1.—Its Leading Articles invariably apply to the most prevailing topics of the day, and are characterised by a bold and fearless tone, a spirit and a piquancy, not to be found in those of any other Medical Journal.

2.—A Clinical Lecture of some distinguished Professor appears in almost every Number of the Journal.

3.—Also, Weekly Reports of the Proceedings of the various Medical Societies.

4.—It is a Key to all the other Medical Journals, by recording any interesting facts they may contain, leaving the wearisome verbiage and unprofitable communications by which they are encumbered, untouched ; thus saving that most precious commodity of the busy Practitioner's Life, TIME.

5.—Notices of every Medical Work immediately on its being sent to the Office.

6.—Under the head of Medical Notes and Queries, an opportunity is given for familiar inter-communication among the readers of the Journal with a view to elucidate many points in Medical Science and Practice which otherwise might remain unexplained.

7.—Space is devoted to Communications remarkable for their interest and utility ; and to Controversial Correspondence on Points of Etiquette, Medical Reform, and Quackery.

8.—All the Medical News of the day, including Births, Marriages, and Deaths, new Appointments, Pass Lists of the Colleges, &c. &c.

9.—Notices to those Correspondents who desire information on points relating to the Economy of the Profession.

Office, 20, King William-street, Strand, where all Communications for the Editor should be addressed.

The current Number sent on receipt of five stamps.

P R E F A C E.

THIS, the Sixth Annual Edition of the MEDICAL DIRECTORY FOR IRELAND, has been revised with the greatest care; neither expense nor labour have been spared in the endeavour to make it increasingly useful and worthy of the position which it has attained. It is with no small degree of pleasure that the Editors refer to the continued interest and kind co-operation of the Profession: their best thanks are due for many suggestions and much information, and last, though not least, for the prompt return of the ANNUAL CIRCULAR. The "Returns" have in numbers far exceeded those of former years, and it is very gratifying to add that the list of Subscribers has been very largely increased.

Again the Editors earnestly request that the ANNUAL CIRCULAR, which is posted on August 1, may be *at once* returned, whether the slip affixed thereto *is or is not correct*. Should it be necessary afterwards to make any alterations or additions, the list will always be open for that purpose until the last day of October. The Editors are the more particular upon this point,

as a considerable number of gentlemen neglect to make the return, believing that the non-return will imply "correctness." But those gentlemen forget that "no return" *may* imply "death" or "removal." It is therefore to be hoped that every one to whom the "Circular" is addressed will, without unnecessary delay, respond to the annual appeal of the Editors, especially as it is burdened by no conditions, and attended with no expense beyond that of postage. The "Directory" being the *only recognised Register of Medical Practitioners*, it is as important to the personal interests of the Profession as to the character of the work itself, that all the particulars contained therein should be strictly correct, and this correctness can only be secured by the co-operation of every Member of the Profession.

The Editors beg now to call attention to the various alterations and additions which are to be found in the present volume.

1. *A very considerable increase in the number of Names, &c., will be observed.* The Editors have from various sources obtained the names of gentlemen who had hitherto neglected to forward the necessary particulars for insertion in the "Directory." To each of these gentlemen the usual Circular was sent: many were promptly returned, but others paid no attention to the application, although it was again repeated. As the Editors are always unwilling to add to the "Supplemental List," they examined very carefully the published lists of the College of Surgeons and Apothecaries' Hall, and wherever the names and qualifications could be identified, they have been placed in the General List of *known* qualified Practitioners. If, therefore, any of those gentlemen, who have not replied to repeated applications, find their names inserted in the

"Supplemental List," or if their qualifications, &c., are *imperfectly* described in the "General List," it must be remembered that themselves are alone to blame.

2. The *list of Medical and Scientific Societies* has been *augmented*.

3. The *County Infirmaries, with their Medical Officers*, have been *incorporated with the List of Hospitals and Infirmaries*.

4. An important and useful addition will be found in "*The Poor Law Medical Service of Ireland*," giving the name of each County, Union, Clerk of Union, Districts, with their Population, Area, Names of Medical Officers, and their Salaries. This list has been compiled from various sources, and from original returns, at considerable cost and much labour, and the Editors trust that on examination it will be found as correct as can be expected for an original list so full of detail, and which is published for the first time in its present form.

The number of pages added to the bulk of the "Directory" will prove how anxious the Editors have been to supply the wants and meet the exigencies of the Profession, and they most cordially thank those gentlemen who have so greatly aided and encouraged them in their work.

THE MEDICAL DIRECTORY FOR IRELAND. 1858.

THE EDITORS most earnestly and respectfully request that Gentlemen will return the "CIRCULAR," which is *annually* sent to them in *August*, IMMEDIATELY on its receipt, whether any alteration be required or not; the accuracy of the DIRECTORY mainly depending on the Annual Returns being duly and carefully made.

To escape the imputation of error or carelessness, the Editors feel it but due to themselves to distinguish by a mark thus (*) those who neglect to comply with this request. For the correctness of the entries so marked the Editors do not hold themselves responsible.

For names here omitted see "Supplemental List," which consists of persons who have made no return of their qualifications, although Circulars for that purpose have been repeatedly sent. The Editors will with much pleasure transfer to this list the names of those Gentlemen so soon as they make the necessary return.

SUPPLEMENTAL LIST.

The following is a list of persons practising the Medical Profession who have not returned the "Annual Circular," although, in many instances, it has been forwarded to them for several successive years. Some, without doubt, possess legal qualifications; whilst others, there is reason to fear, have no qualification whatever.

Being anxious to expunge the latter class from the list, the Editors respectfully solicit the aid of the Profession, in supplying the names of those whom they *know* to be *unqualified*.

To those gentlemen who may be legally qualified, the Editors beg to express their regret at being compelled to omit them (for the reasons above mentioned) from the list of those who have made their qualifications known.

None can with justice complain, as it is from their own neglect or omission that their qualifications are not published; and all must admit, that it would have been inconsistent with the professed object of the work to include them in a "list of *known* qualified practitioners." Those who *are* qualified will, it is hoped, take care to be included in the General List for the future.

The days of graduation are, Shrove Tuesday, and the first Tuesday in July. Candidates *who have graduated in arts* may obtain the degree of Bachelor of Medicine, at any of the ensuing half yearly periods of graduation, provided the requisite medical education and examinations shall have been accomplished. The graduation fees for the degree of bachelor of medicine are 11*l.* 17*s.* 6*d.* The standing of the first undergraduate year may be obtained by attending the October examination of that year, if the student has entered not later than the first Monday of the July of the same year, and has completed the payments due since the ordinary period of entrance in the preceding November. The medical education of a bachelor of medicine comprises attendance on the following courses of lectures in the school of physic established by Act of Parliament, provided that *one*, and not more than *three*, of the courses which begin in November, be attended during each of four sessions. Three of these courses, at the discretion of the candidate, may be attended at the University of Edinburgh. The courses are on—anatomy, surgery, chemistry, botany, materia medica and pharmacy, institutes of medicine, practice of medicine, midwifery, medical jurisprudence, practical anatomy and practical chemistry, clinical lectures at Sir Patrick Dun's Hospital during at least one session (six months), as delivered by the professors in the school of physic; the attendance on such clinical lectures by the professors to be extended to three additional months of a summer session, commencing in May. The fees for attendance on the clinical lectures are 3*l.* 3*s.* to the professors for each three months' attendance and (provided the student be of two years' standing in the university) 3*l.* 3*s.*

to the treasurer of the hospital for the first year, with a proportionate sum for any longer period. The fee for each of the other courses is 3*l.* 3*s.* The examinations are conducted by the several professors. No further examination is requisite for the degree of Doctor of Medicine, which may be taken at the expiration of three years from having taken the degree of M.B. The fees for the degree of Doctor of Medicine are 22*l.* The degrees are publicly conferred by the Vice-Chancellor, in the seuate or congregation of the university.

Ordinance of the Senate of the Queen's University in Ireland, regarding the Qualification and Examination for the degree of M.D., to take effect from 1st October, 1852.

1st.—Every Candidate for the degree of M.D. shall produce a certificate, from the Council of one of the Queen's Colleges, that he has passed a full examination in the subjects of study prescribed in the Course of Matriculation for Arts, and has been admitted a Matriculated Student of the College in the faculty of Medicine.

2nd.—The Curriculum shall extend over a period of at least four years, and shall be divided into two periods of at least two years each.

3rd.—The first period shall comprise attendance on the following Courses of Medical Lectures:—

Chemistry,—six months, at least three Lectures each week.

Botany and Zoology,—six months, three lectures each week, with Herborizations for practical study.

Anatomy and Physiology,—six months, five lectures each week.

Practical Anatomy,—six months.

Materia Medica and Pharmacy,—six months, three lectures each week.

4th.—The second period shall comprise attendance on the following Courses of Medical Lectures:—

Anatomy and Physiology,—six months, five lectures each week.

Practical Anatomy,—six months.

Theory and Practice of Surgery,—six months, three lectures each week.

Midwifery and Diseases of Women and Children,—six months, three lectures each week.

Theory and Practice of Medicine,—six months, three lectures each week.

Medical Jurisprudence,—three months, three lectures each week.

5th.—In addition to the above Courses of Lectures, candidates shall have attended during the first period of the above Curriculum:—

Practical Chemistry (in a recognised Laboratory),—three months.

Medico-Chirurgical Hospital (recognised by the Senate), containing at least sixty beds; together with the Clinical Lectures therein delivered, at least two each week,—six months.

6th.—And during the second period—

Practical Midwifery, at a recognised Midwifery Hospital, with the

Clinical Lectures therein delivered, for a period of three months, in an hospital containing not less than thirty beds; or six months in an hospital containing not less than fifteen beds,

Practical Pharmacy,—three months.

Medico-Chirurgical Hospital (recognised by the Senate), containing at least sixty beds; together with the Clinical Lectures therein delivered,—eighteen months.

7th.—Candidates, before being admitted to the degree of M.D., shall pass two examinations, the first examination comprising the subjects of the first period of the Curriculum; the second comprehending subjects of the second period of study. It shall be competent for Students to present themselves for their first examination at the termination of the first period of the Curriculum, or at any after period to be fixed by the Senate previous to their undergoing the second examination.

8th.—By the Charter of the Queen's University, candidates are required to have attended at least one-third of the Courses of Medical Lectures in some one of the Queen's Colleges. For the remainder of the Courses of Medical Lectures, authenticated certificates will be received from the Professors or Lecturers in Universities, Colleges, or Schools recognised by the Senate of the Queen's University in Ireland.

9th.—Candidates will also be required to have attended, in some one of the Queen's Colleges, Lectures on one Modern Language for six months, and Lectures on Natural Philosophy for six months.*

10th.—The examinations will be conducted principally by printed papers, to which written answers shall be given, but the Examiners shall also be at liberty to add such *viva voce* examination on the subjects of the written paper, and to call for such demonstrations and experiments as they may deem necessary.

11th.—The above regulations will be binding on all students commencing their Medical Studies on or after the 1st October, 1852; but Students already engaged in their Medical Studies, are at liberty either to complete their Courses according to the Ordinance of 30th June, 1850, or according to the present Ordinance.

REGULATIONS AS TO RECEPTION OF CERTIFICATES FROM MEDICAL LECTURERS AND HOSPITALS.

1. Colleges or Schools seeking recognition from the Queen's University, are required to send in the name and qualification of the several Lecturers whose lectures are required to be recognised, with such particulars as the Senate may require. And in the event of the Lecturers being changed, a fresh recognition must be sought.

2. All Lecturers, and Clinical Lecturers, without exception, must transmit to the Secretary on every 25th November and 10th May, or as often as required, a return filled up according to a form transmitted, of the Students in attendance upon such Lectures or Hospital Practice. The certificates of Lecturers not complying with this regulation will not be recognised.

KING AND QUEEN'S COLLEGE OF PHYSICIANS IN IRELAND.

Visitors.—Lord High Chancellor of Ireland; Lord Chief Justice Queen's Bench; Lord Chief Justice Common Pleas; Chief Baron Exchequer.

*Candidates will of course be examined in these subjects.

Shops*—The Censors. *Prof. of Med. Jurisp.*—Dr. T. Brady. *Regist*—Dr. W. E. Steele. *Court of Exam. in Midw.*—Drs. W. O. B. Adams, H. L. Dwyer, and J. Ringland.

OF THE QUALIFICATIONS, EXAMINATION, AND ADMISSION OF CANDIDATE FOR THE LICENCE OF THE COLLEGE TO PRACTISE MEDICINE.

I. Candidates for the licence of the college to practise medicine, are required to make application to the college, according to the forms supplied by the Registrar.

II. Every application for admission to examination, on being received and read at one meeting of the college, will, at the next meeting, be taken into consideration.

III. No member or licentiate of any Company of Apothecaries is admissible to the licence of the college, unless, on being examined and approved of, he shall surrender to the college his licence as an apothecary, and cease to act as such in any part of the United Kingdom.

IV. Every candidate for the licence of the college, except those who have entered as students in arts in the Universities of Dublin, Oxford, or Cambridge, is required to produce a certificate of matriculation in the University of Dublin, conformably to the Statute, 40 Geo. III, c. 84, s. 34.

Candidates must produce evidence of having been engaged in the study of Medicine for four years at least, and of having attended not less than two of the required courses in each year.

Candidates must produce evidence of having completed the following course of education, viz., of having attended one or more courses of lectures on each of the following subjects for the periods specified :—

Anatomy and Physiology	-	-	-	-	6 months
Chemistry	-	-	-	-	6 months
Institutes of Medicine	-	-	-	-	6 months
Materia Medica and Pharmacy	-	-	-	-	6 months
Practice of Medicine	-	-	-	-	6 months
Midwifery, and Diseases of Women and Children	-	-	-	-	6 months
Surgery	-	-	-	-	6 months
Botany	-	-	-	-	3 months
Medical Jurisprudence	-	-	-	-	3 months ;

of having performed a course of dissections and attended the accompanying demonstrations during six months, and of having attended a course of practical chemistry for at least three months.

All the lectures are required to have been delivered by the respective professors of the School of Physic in Ireland, or by other lecturers recognised by the college.

Candidates must also produce certificates of attendance for two years and six months on the practice of a recognised hospital, and the clinical lectures delivered therein during that period ; also for six months on the practice of a lying in hospital recognised by the college.

The following regulations apply to all candidates, except—1st.—Graduates in medicine (not honorary) of one of the Universities in the United Kingdom. 2nd.—Licentiates of the Royal Colleges of Physicians of London or Edinburgh. 3rd.—Officers holding medical or surgical commissions in Her Majesty's service. 4th.—Licentiates of a college of

surgeons in the United Kingdom of four years' standing; 5th.—Gentlemen holding the surgical diploma of Trinity College, Dublin; or, licentiates of a college of surgeons in the United Kingdom, producing, in addition to their diploma, certificates of attendance on a course of lectures on the institutes of medicine and botany, and on the practice of a lying-in hospital for six months; such candidates are admissible to examination on producing evidence of their possessing any of the foregoing qualifications, in addition to the certificate of matriculation in the University of Dublin.

Applications for examination for the licence to practise medicine or midwifery made by foreigners who are graduates of foreign universities or colleges, will be specially considered and decided on in reference to the extent and nature of the qualifications possessed by such applicants.

Candidates whose qualifications are not in conformity to the required regulations may be admitted to examination, provided the college are unanimous of opinion that their qualifications are equivalent to those required.

V. On having obtained permission to be examined for the licence, the candidate is required to present himself before the college within three months.

VI. The president appoints the day for the examination of the candidate, but not until the admission fee, and the stamp duty, have been lodged with the treasurer of the college; which sums, in the event of the candidate not being admitted, will be returned.

VII. Every candidate, previously to examination, is required to sign the following declaration:

I, A.B., hereby authorise the President and Fellows of the King and Queen's College of Physicians in Ireland, to erase my name from the list of licentiates, and I consent to surrender my licence and to have my privilege as a licentiate withdrawn, if I shall, after having obtained the licence from the said college, either continue to be or become a licentiate of any Company of Apothecaries; or if I shall at any time hold or have any interest in any apothecary's shop, or engage in any trade in any part of the United Kingdom.

VIII. The president and censors examine the candidate publicly before the fellows and licentiates of the college.

The examinations are conducted in the English language, but every candidate, except graduates in arts of Dublin, Oxford, or Cambridge, may be required, at the option of the president, to translate from a Latin or Greek medical author, before being examined as to his professional acquirements.

The examination of candidates for the licence of the college to practise medicine is conducted on two separate days. The subjects of examination for the first day are anatomy and physiology, botany, chemistry, and institutes of medicine; for the second day, acute diseases, chronic diseases, materia medica, and midwifery.

Candidates who are graduates in medicine of one of the Universities in Great Britain or Ireland; Licentiates of either of the Royal Colleges of Physicians, London or Edinburgh; or Members of a Royal College of Surgeons in the United Kingdom, being also graduates in arts of the Universities of Dublin, Oxford, or Cambridge, are required to undergo the second day's examination alone—botany and materia medica in the case of members of a College of Surgeons being added thereto.

Surgeons of four years' standing and upwards are required to undergo an examination in the subjects for the second day only.

Graduates in medicine of the University of Dublin who have been examined for their degree by the joint board of examiners, consisting of the president and censors of this college, and the professors of the School of Physic in Ireland, are admissible to the licence to practise materia medica without further examination.

IX. Should the college not be satisfied with the answering of any candidate, they may repeat the examination of either day after the lapse of not less than two months.

X. Every candidate, previously to his being admitted as a licentiate of the college, is required to subscribe and promise the due fulfilment of the following declaration, viz. :

I, A.B., do hereby solemnly and sincerely promise that I will observe the statutes and bye-laws of this college, and to my power endeavour that the honour of the college be preserved entire, and in all things that belong to the honour or profit thereof, I shall be ready to give my advice and assistance.

I engage not to practise any system or method (so called) for the cure or alleviation of disease of which the college has disapproved; nor to endeavour to obtain practice or to attract public notice by advertising, or by any other unworthy means; I also engage that I will neither permit nor sanction the use of my name by any other party for such purposes, nor in connexion with any secret or other remedy; and in case of any doubt relative to the true meaning or application of this engagement, I promise to submit to the judgment of the college.

I promise that in all things lawful and honest I will be obedient to the president, vice-president, and censors of the college.

And I solemnly and sincerely declare, that, should I violate any of the conditions enumerated in this declaration, so long as I shall be either a licentiate or fellow of the college, I thereby render myself liable, and shall submit to any reasonable punishment, whether the censure of the college, pecuniary fine (not exceeding twenty pounds), or expulsion and surrendering of the licence, whichever the president and fellows of the college, or majority of them, shall think proper to inflict.

XI. The president then admits the candidate to the licence of the college, authorising him to practise medicine.

Fee for the licence to practise medicine, exclusive of the stamp duty, 30*l*.

XII. Every member of this college who may desire to obtain the licence to practise midwifery is required to produce a certificate of attendance for six months on the practice of a recognised lying in hospital, when the college will proceed to examine him as to his knowledge of midwifery, and, if approved of, will grant him a special licence as a practitioner in midwifery, and cause him to be designated as such in the authorised lists of the college.

No person shall be admitted to examination for the licence to practise midwifery, unless he have previously received the licence to practise medicine.

The bye-laws relative to the examination and admission of candidates for the licence to practise medicine shall, so far as they may be applicable, also regulate the examination and admission of candidates for the licence to practise midwifery.

The fee payable to the college for the licence to practise midwifery shall be one guinea.

OF THE PROFESSIONAL CONDUCT OF MEMBERS OF THE COLLEGE.

At all meetings of physicians of the college, where the president is present, precedence and all marks of honour shall be paid to him.

To preserve a good understanding among the members of the college, every member shall consult with every other member who is not under the censure of the college; and whosoever shall at any time refuse so to do shall be liable to the censure of the college.

Any member of this college who is guilty of unprofessional conduct, either by advertising, or other practices unbecoming the honourable profession of physic, shall be placed under the censure of the college.

No member of this college shall consult with or otherwise sanction any other member who is under censure; nor consult with, or sanction professionally any person who by advertisement, or other unworthy means, endeavours to obtain practice, or to attract public notice.

No member of the college shall consult with any person who, for the cure or alleviation of disease, uses any secret remedy, or adopts and practises any system or method of which the college has disapproved.

The Royal College of Surgeons in Ireland grants two different diplomas—one conferring the rank of Fellow, and the other that of Licentiate. A Fellow is a member of the corporation, and entitled to vote at all elections for president, vice-president, and councillors, and also to be elected president, vice-president, or member of council. The Letters Testimonial granted to the Licentiate enables him to “exercise and enjoy all rights of practice in the art or science of surgery, or otherwise, which are commonly enjoyed by the Fellows, and to have free access to the Library and Museum of the College, and makes him eligible to the rank of Fellow, subject to specified regulations.” Both Fellows and Licentiates are obliged to make and subscribe a formal declaration legally binding them to “observe and be obedient to the statutes, bye-laws, and ordinances of the College, and to the utmost of their power to promote its honour, reputation, and dignity.”

Fellows, in addition, declare that they "do not practise the business or profession of an apothecary or druggist, or indirectly sell drugs or medicines, and that they will not, while Fellows, practise such business or profession."

A student who proposes to become a Fellow or Licentiate of the College must first become a Registered Pupil, for which he pays a fee of five guineas; but he is permitted to postpone such entry as Registered Pupil and such payment until the period of his final examination.

The fees for the Diplomas are as follow:—For Fellowship, twenty-five guineas, in addition to the registration fee of five guineas; thirty guineas in all. But if the candidate has already passed as a Licentiate, and paid the registration fee of five guineas, and twenty guineas the fee for Letters Testimonial (twenty-five in all), he is required to pay a Fellowship fee of ten guineas only, should he propose to become a Fellow. If a person becomes a Fellow at once, he pays thirty guineas; but if he commences as Licentiate and afterwards passes as Fellow, he pays thirty-five guineas in all—viz., five guineas registration fee, and twenty guineas for Letters Testimonial, and ten guineas for Fellowship. For the Licence or Letters Testimonial alone, the candidate pays five guineas registration fee, and twenty guineas for the final examination—twenty-five in all. The student who becomes a Registered Pupil as soon as he commences his studies in Dublin, is thereby matriculated in the College, and entitled to its protection, aid, and guidance.

Fellowship.—The candidate for the Fellowship must be twenty-five years of age, and if not a graduate in arts of some university, must answer a classical examination, which is generally confined to the principal books read for entrance into Dublin University. He must have been six years engaged in professional study, three of which must have been in Dublin; and he must also have been a house-surgeon or dresser in an hospital. He is required to attend lectures on anatomy and physiology, and on surgery, with dissections, during three seasons; chemistry during two; and practice of medicine, materia medica, midwifery, medical jurisprudence, comparative anatomy, natural philosophy, and botany, for one course each. His hospital attendance must be three years at least. Bachelors of Arts, after five years' study, are admitted to examination on compliance with the above regulations, and Licentiates of the College of ten years' standing are also admitted, although they may not have been educated in strict conformity with them.

Letters Testimonial.—The candidate for Letters Testimonial is required, as has been already stated, to become a Registered Pupil, and to pass a classical examination. He is also required to prove that he has studied for three years in the metropolitan schools (nine months in each year), and for a fourth year either there or anywhere else, where he might have obtained professional information. His hospital attendance is by the bye law declared to be three years "where clinical instruction is given," and all the Dublin hospitals are recognized. Credit is given for attendance on provincial hospitals, but it is expected that while the pupil is in attendance on lectures in Dublin, he shall, at the same time, attend an hospital there. Candidates for Letters Testimonial are also required to prove that they have attended three courses of lectures on anatomy and physiology surgery, and practical anatomy (being demonstrations with dissections), two courses on chemistry, and one course on the practice of medicine, materia medica, midwifery, and medical jurisprudence.

Candidates both for Fellowship and Letters Testimonial are examined on the practice of medicine and pharmacy as well as on surgery. The Diploma is a full qualification as General Practitioner, entitling the holder

of it to be appointed to county infirmaries, fever hospitals, dispensaries, poorhouses, and all other medical charities, and Licentiates of the College can dispense medicines to their patients; but they cannot keep open shops, or retail drugs, or compound the prescriptions of other practitioners without the licence of the Apothecaries' Company. Both Fellows and Licentiates are authorized by law, and permitted by the charter, to compound and dispense medicines for their patients in the hospitals, dispensaries, and poorhouses to which they are attached. None but Fellows and Licentiates of this College are eligible to be appointed Surgeons of County Infirmaries in Ireland.

The College of Surgeons of Ireland is empowered by Charter to grant a Diploma in Midwifery to its own Fellows and Licentiates only, and does not recognise any of them as midwifery practitioners, or mark them as such in the printed lists of the College, unless they have had that Diploma granted to them.

Certificates granted by professors in universities which do not receive the certificates granted by the Professors in the College of Surgeons, are not recognised as qualification from candidates for either of the diplomas.

Returns of the names of those who have entered to attend lectures, are required to be forwarded to the College, by professors and lecturers, on 25th of November, and at such other periods during the session as the Council may think fit, which returns must certify that the students named therein are then attending regularly; and no certificate is received from any candidate for either of the diplomas unless his name appears in the returns corresponding to the date of such certificate. Professors or lecturers neglecting or refusing to make such returns, or who grant certificates to any student whose name has not been inserted in such returns, are not recognised.

Students are admitted to the classical examination required by the bye-laws without being required to become Registered Pupils, or to pay the Registration fee of five guineas; it being considered desirable that pupils on their first arrival in Dublin, and as soon as they can conveniently do so after leaving school, should pass this preliminary trial, and not postpone it until the period of their final examination for Letters Testimonial. They have only to present themselves at the College, and to pay a fee of five shillings to enable them to offer themselves; and, if approved, the certificate required by the bye-laws to be produced by candidates for Letters Testimonial is granted to them. On payment of five guineas at any subsequent period, they are enrolled as Registered Pupils, and become entitled to study in the museum and library, and to attend the lectures on comparative anatomy. They are examined in the Gospel of St. John in the Greek Testament, and in the first five books of the *Æneid* of Virgil.

To meet a requirement of the Army Medical Board, a Professor of Logical Science has been appointed.

The following special or exceptional bye-laws and ordinances have been enacted :—

1. That to enable surgical students to devote more time to hospital attendance and dissection during the winter session, the lectures on *materia medica*, medical jurisprudence, practical chemistry, and botany, shall be delivered during the summer session in the School of the College and in the Schools recognised by the College; and certificates granted subsequent to the 30th April, 1851, shall not be received as qualification for Letters Testimonial, unless issued in conformity with this regulation.

2. Candidates for Letters Testimonial, who shall have attended metro-

politan hospitals during three winter sessions of six months each, shall be considered to have performed sufficient hospital attendance, if they shall be able to produce certificates of regular daily attendance during a like number of months at a county infirmary, or provincial surgical hospital, containing at least fifty beds ; provided the surgeons of such infirmaries or hospitals shall make returns to this College, in the months of May and November in each year, of the number of students so attending.

3. That the Council being anxious to encourage liberal education among candidates for Fellowship and Letters Testimonial, in future all graduates in arts of the University of Dublin, being registered Pupils of the College of Surgeons, shall be admitted to the examinations for Fellowship and Letters Testimonial, provided they produce the certificates of surgical education required by the bye laws ; and of such course of education, the several certificates of the School of Physic now required by the regulations of the University, to be produced by candidates for the degree of Bachelor of Medicine, shall be received as part.

4. The candidates for Letters Testimonial of the College who shall produce certificates from the Council of one of the Queen's Colleges, that they have passed a full examination in the subjects of study prescribed in the course of matriculation for arts, and have been admitted matriculated students of the College in the faculty of medicine, shall be admitted to examination ; provided they shall produce the certificates of surgical education required by the bye-laws of this College, and of such course of education the several certificates of the professors of the Queen's Colleges now required by the Senate of the Queen's University to be produced by candidates for the degree of Doctor of Medicine, shall be received as part ; and also provided, that of the four years during which they shall have been engaged in the acquisition of professional knowledge, two shall have been passed in attendance on lectures and hospitals in Dublin, London, or Edinburgh.

5. With the view of facilitating the supply of surgeons for the army and navy, candidates for Letters Testimonial of the College who may not have been educated in strict conformity with the bye-laws of this College, shall be admitted to an examination, provided they satisfy the Council of the College that they have gone through a course of education fully equivalent to that required by the bye-laws of the College, now in force.

6. With the view of facilitating the supply of surgeons for the army and navy, lectures on medical jurisprudence and materia medica, delivered during the winter session, by lecturers recognised by the College, will be received as part of the qualifications for candidates for the Letters Testimonial of the College.

The educational bye-laws and ordinances in detail can be had at the College on application by post or otherwise.

LAWS REGARDING THE EDUCATION OF APOTHECARIES IN IRELAND.

Every Candidate must undergo two separate examinations; one for the Certificate of Apprenticce, the other for the Licence to Practise.

Candidates for the Certificate of Apprenticce will be examined in the following books :—In Latin—the Catiline War of Sallust, and the first three books of the *Æneid* of Virgil;—in Greek—the Gospel of St. John, and the first twenty Dialogues of Lucian, or the first two books of Homer's *Iliad*;—in French—Telemachus or the History of Charles XII.;—in Science—the first two books of Euclid, Algebra, to the end of Simple Equations, Arithmetic, especially Decimals—and in English Composition.

Every Candidate for the Licence to Practise as an Apothecary must lay before the Court the following documents :—

1. The Certificate of Apprenticce.
2. The Indenture of Apprenticeship for five years, enrolled according to the Act of Parliament, and bearing the Certificate of the Licentiate Apothecary to whom he has been indented, of a good moral character, and of having fulfilled the period of his Apprenticeship.
3. Certificates, duly signed, that he has diligently attended the following Courses of Lectures delivered at some School of Medicine recognised by the Court.—(The order of study here laid down is recommended for the guidance of Students.)—Chemistry—Six Months. Anatomy and Physiology—Twelve Months. *Practical Chemistry, Botany and Natural History—Three Months. †Materia Medica—Six Months. Demonstrations and Dissections—Twelve Months. Theory and Practice of Physic, Surgery, Midwifery, and the Diseases of Women and Children—Six Months. Medical Jurisprudence—Three Months.

4. Also Certificates of Attendance for the entire period of Eighteen Months on Medical and Surgical practice in an Hospital or Hospitals recognised by the Court, and of attendance upon Thirty cases of Midwifery.

The Examination for the Licence to Practise as an Apothecary will be as follows :—In Chemistry and General Physics. In Pharmacy, Theoretical and Practical. In Materia Medica and Therapeutics. In Natural History and Medical Botany. In Anatomy and Physiology. In the Theory and Practice of Medicine. In Midwifery. In Medical Jurisprudence.

Candidates for the Licence to practise are required to be expert in the

* The Practical Chemistry must be attended in a Laboratory, and no Certificate will be received by the Court that does not testify that the Candidate has prepared the several Pharmacopœial Preparations which are usually made in the Laboratory.

† The Materia Medica, if attended in Summer, must consist of two courses, of three months' duration each.

analysis of Poisons, in the detection of adulterations in Drugs, and in the use of the Microscope and Cupping Glass.

Gentlemen who are Graduates in Medicine of any of the British or Irish Universities, or who possess Letters Testimonial from any of the Royal Colleges of Surgeons in Great Britain or Ireland, will be admitted to Examination for the Licence of the Hall, on producing proof of three years' legal apprenticeship to a qualified Apothecary practising in Ireland, and of a professional education equal to the Curriculum prescribed by the College. Licentiates of the Apothecaries' Hall of London are also eligible for examination.

The examination for the Certificate to act as an Assistant to an Apothecary in compounding and dispensing medicine will be confined to Chemistry and Theoretical and Practical Pharmacy.

The Candidate for the Assistant's Certificate may present himself for Examination at the termination of Three years' apprenticeship.

The Court of Examiners sits every Friday at two o'clock, and proceeds with the Examination of Candidates in the order in which their names appear on the list. Candidates for the Licence to Practise are required to lodge their Testimonials a clear week before the day of Examination.

A rejected Candidate cannot be re-admitted to examination until the expiration of six months.

An Examination of Apothecaries' Apprentices takes place at the Hall in the first week in May, annually, upon some subject in Pharmaceutic or Physiological Analysis, which is publicly announced by the Court at the commencement of the previous Winter Session, and a prize of Five Guineas is awarded to the successful competitor.

This School being duly licensed according to the provisions of the Anatomy Act, and conducted in conformity with the Bye-laws, Rules, and Regulations of the various Medical Bodies in Great Britain and Ireland, and the Professors being recognised Lecturers of long standing, the certificates for attendance issued by them are recognised as Legal documents, entitling the possessor to an examination for any of the foregoing qualifications, by the different public Medical Bodies in Great Britain and Ireland.

For further particulars, application to be made to the Honorary Secretary, Dr. Cryan, 1, Hardwicke-place; or from any of the other Professors.

CITY OF DUBLIN HOSPITAL, UPPER BAGGOT-STREET.

Phys. and Surg.: Dr. A. Jacob, Dr. T. E. Beatty, Dr. C. Benson, Dr. W. Hargrave, Dr. R. C. Williams, Dr. T. G. Geoghegan, and Mr. J. Tufnell. *Cons. Phys.*: Sir H. Marsh, Bart., and Dr. Apjohn. *Cons. Surgs.*: Sir P. Crampton, Bart., W. H. Porter, M.D., and J. W. Cusack, M.D.

The arrangements of the City of Dublin Hospital are such as to afford to the Pupils an opportunity of studying disease in all its forms, Medical and Surgical. The morning visit commences daily at nine o'clock, when the nature, treatment, and progress of each case are explained at the bedside of the patient, and ample opportunity afforded to every Student of becoming practically acquainted with the use of the Stethoscope. Clinical Lectures are delivered after the hospital visit.

Special wards are appropriated for the reception of Ophthalmic cases, and a distinct course of Lectures upon Diseases of the Eye is delivered by Dr. Jacob, which the pupils are privileged to attend without additional fee. Extended opportunities are thus afforded for acquiring a thoroughly practical knowledge of this important subject.

A certificate of having attended for three months one of the Institutions, or the wards of an hospital, especially devoted to the treatment of Ophthalmic disease, is now required from all candidates for the appointment of Assistant-Surgeon in the Service of the East India Company.

A ward is appropriated to the Diseases of Females, and Clinical Instruction is given upon all forms of Uterine Affection by Dr. Beatty.

The Purser Studentship of 20*l* per annum (with Apartments), founded by William A. Purser, Esq., a former Pupil of this Hospital, is open to all Students, according to merit.

Every facility is given to Students desirous of acting as Dressers and Clinical Assistants, subsequent to which all Pupils of the Hospital are eligible to the situation of House-Surgeon, according to merit.

Connected with the Hospital is an extensive Dispensary, at which the Pupils are allowed to perform the minor operations, under the guidance of the Surgeons, and are rendered familiar with the details of Dispensary management.

A *Lending Library* of well-chosen books has been provided for the use of the Pupils; and a registry of the cases in Hospital is kept by the House-Surgeon, to which they have free access.

Mr. Tufnell's Course of Lectures upon Military Surgery will be delivered henceforward in the Royal College of Surgeons. Attendance upon this course is required from all Gentlemen educated in Ireland, who may become candidates for admission into the Medical Department of the Army.

Certificates of attendance on this Hospital are recognised by all the Colleges, Universities, and Halls, and by the Army and Navy medical Boards.

The Winter Session commences in October. The Summer Session in April.

Fee for Winter Six Months, 6*l*. 6*s*.; Summer Six Months, 4*l*. 4*s*.; Nine Months, 8*l*. 8*s*.

For further particulars apply to Charles Benson, Esq., M.D., 11, Fitzwilliam-square West, or at the Hospital

COOMBE LYING-IN HOSPITAL.

Masters, Drs. J. Ringland and J. H. Sawyer; *Asst.-Master*, Dr. Thomas P. Mason; *Super Asst.*, Drs. E. Hamilton and G. H. Kidd; *Cons. Phys.*, Drs. D. J. Corrigan, C. P. Croker, and J. P. Banks; *Cons. Surgs.*, Messrs. F. Rynd, S. G. Wilmot, and A. Ellis; *Cons. Acc.*, Mr. H. Carmichael, Drs. W. Jameson, and W. F. Montgomery; *Cur. of Path. Museum*, Dr. K. R. Berger; *Res. Apoth. and Regist.*, Mr. J. J. Nolan. Candidates for the Diplomas of the different Colleges and Halls are

required by recent regulations to attend a Six Months' Course of Practical Midwifery ; but Gentlemen can enter at any time during the year for six months from the date of entrance.

The Hospital is in a central situation, in a locality which affords abundant scope for Midwifery Practice, and is within five minutes' walk of four Medical and Surgical Hospitals, of the College of Surgeons, and of three Anatomical Schools.

It contains forty beds, which are constantly occupied ; the number of patients annually admitted into the Labour Wards exceeding five hundred and fifty, whilst the labour cases attended at their own homes from the Hospital and Dispensary amount to nearly nineteen hundred.

A Ward has been allocated for the treatment of Female Diseases and Diseases of Children, and there is likewise connected with the institution a Dispensary for Diseases of Females and Children, Diseases of the Eye, and General Diseases, at which nearly sixteen thousand patients are annually prescribed for, and where the pupils have every opportunity of performing the minor operations in Surgery, and of attaining a knowledge of Practical Pharmacy.

Clinical Lectures are delivered regularly twice a week by the Masters, who daily visit the Wards of the Hospital, at the hour most convenient to the majority of the Pupils.

A *Registry of Cases* is kept by the Clinical Clerks, who are selected each half-year from amongst the most attentive Pupils, to whom distinct certificates are given.

Prize : At the termination of each Session, the usual Prize is given to the best answerer in Practical Midwifery ; and at the expiration of Six Months from the commencement of their attendance the pupils are eligible to be examined for the Diploma of the Hospital.

There is most comfortable accommodation for Ten Intern Pupils, who enjoy unusual privileges and advantages, and have peculiar facilities in acquiring a practical knowledge of the Midwifery branch of their profession, as no circumstance can arise either in the Hospital or amongst the extern Patients without their knowledge.

In connexion with the Hospital, Dr. Ringland delivers a Course of Lectures on the Theory and Practice of Midwifery, and the Diseases of Women and Children in the Dublin School of Medicine, Peter-street, at the hour most convenient to the majority of the class, and Dr. Sawyer a similar course at the Original School of Medicine, Peter-street.

These Lectures are delivered on three days in the week throughout each Winter Session, commencing the First Monday in November, and on five days in the week throughout each Summer Session, commencing the First Monday in May ; and are illustrated by Plates, Casts, Instruments, &c. and by preparations from the Pathological Museums of both the Hospital and the Medical School.

A *Public Examination* on all the subjects of these Lectures is held at the termination of each Session, when Prizes are awarded to the most proficient of the Pupils who have attended the Course.

Certificates of attendance on the Practice of this Hospital, as well as on the several Courses of Theoretical Lectures, are received by the King and Queen's College of Physicians of Ireland ; by the Royal Colleges of Surgeons in Dublin, London, and Edinburgh ; by the Universities of London and Glasgow, and the Queen's University in Ireland ; by the Marischal College and University, Aberdeen ; the King's College, Aberdeen ; and the Faculty of Physicians and Surgeons of Glasgow ; by the Apothecaries' Halls of

Dublin and London; and by the Army, Ordnance, Navy, and East India Medical Boards, &c.

FEES.

The Fee for each of the above Courses of Lectures is 2l. 2s.

Museums of Human and Comparative Anatomy, Pathology, and Materia Medica are attached to the School.

Summer Courses of Lectures will be delivered on Materia Medica, Medical Jurisprudence, Chemistry, Botany, and Midwifery.

Catechetical Examinations will be held by the lecturers; and at the termination of the Session premiums will be given to the best answerers in their respective classes on conditions which will be duly announced.

This School is recognised by the Queen's University in Ireland, the Universities of London, Glasgow, Aberdeen, and St. Andrew's; by the King and Queen's College of Physicians in Ireland; the Royal Colleges of Surgeons of Ireland, England, Edinburgh, and Glasgow; by the Apothecaries' Halls, Dublin and London; and by the Army, Medical, Navy, and East India Boards. Practical Anatomy taken in this School, with Hospital attendance, constitutes an "*Annus Medicus*" for the Edinburgh University.

* No return from the Secretary for the present year.

For further particulars apply to the Secretary, Dr E. Hamilton, 128, Stephen's-green; Dr. Nelligan, 17, Merrion-square East; Dr. Ringland, 14, Harcourt-street; to any of the Lecturers, or at the School, 27, Peter-street.

DR. STEEVENS'S HOSPITAL AND MEDICAL COLLEGE.

The Winter Session commences on the last Monday in October.

The hospital contains 250 beds, and is provided with distinct wards for the treatment of fevers, syphilis, and diseases of the eye.

Vis.-Phys., Sir H. Marsh and Dr. C. P. Croker; *Assist. Phys.*, Drs. H. Freke and W. M. Burke; *Vis.-Surgs.*, Sir P. Crampton, Bart., and J. W. Cusack; *Assist.-Surgs.*, Messrs. W. Colles, S. G. Wilmot, and R. Harrison; *Res.-Surg.*, Mr. S. A. Cusack; *Phys.-Acc*, Dr. S. L. Hardy, M.D.

Hospital Visit: Daily, at eight a.m., by the Physicians and Surgeons. The surgical wards are also visited each evening, at eight p.m.

Clinical Lectures are given by the physicians and surgeons, during the session, at nine a.m., four days in the week.

Surgical Operations: On Thursday, at nine a.m., except in cases of emergency, when notice will be sent to the pupils in the recognised residences.

The Out-Patients are prescribed for on Mondays and Fridays, at half-past ten, when the pupils have an opportunity of performing the minor surgical operations.

Ophthalmic Surgery: Patients with diseases of the eye are treated on Mondays and Fridays, at half-past eleven a.m., by Mr. S. A. Cusack, who will deliver a course of lectures on ophthalmic surgery during the summer session.

Dressers: There is accommodation in the hospital for two medical and six surgical resident pupils.

Midwifery: A maternity department, for the delivery of lying-in women at their own homes, is conducted under the superintendence of the physician-aecoucheur. A midwifery diploma will be granted, at the end of the session, to those pupils who have attended a sufficient number of cases and passed a satisfactory examination.

The Reading Room and Museum are open daily to the pupils of the hospital and school. There is also a *Lending Library*, containing every modern medical and surgical work.

Hours of Attendance.—Hospital Visit and Clinical Lectures: Medical Visit—Monday, Wednesday, and Friday, at eight; Clinical Lectures, Wednesday and Friday, at nine; Surgical Visit—Tuesday, Thursday, and Saturday, at eight; Clinical Lectures—Monday and Thursday, at nine; Operations—Thursday, at nine; Pathological Demonstrations by the Lecturers, as opportunity offers. Medical College: Descriptive Anatomy—Dr. E. Hamilton—daily, except Saturday, at ten; Practice of Medicine, Drs. Freke and Burke—Tuesday, Thursday, and Saturday, at eleven; Surgery, Mr. Colles and Mr. Wilmot—Monday, Wednesday, and Friday, at eleven; Anatomy and Physiology, and Morbid Anatomy, Mr. S. A. Cusack—Daily, except Saturday at twelve; Chemistry, Dr. J. W. Warren—Monday, Wednesday, and Friday, at one; Materia Medica, Dr. Gordon—Tuesday, Thursday, and Saturday, at one; Midwifery and Diseases of Women and Children, Dr. Hardy—Monday, Wednesday, and Friday, at

four; Dissections, by the Professors of Anatomy and Demonstrators—seven a.m. to eight p.m., commencing October 1st.

Summer Courses: Lectures will be delivered during the summer session on Botany, Materia Medica, Jurisprudence, Practical Chemistry, Comparative Anatomy, and Logic.

Fees: The fees for the hospital practice and lecturers will be the same as those of the other Dublin Hospitals and Schools.

Matriculated Pupils: Students who wish to take out all the courses of lectures and hospital certificates, required by the College of Surgeons and other licensing boards, in the institution, may become matriculated pupils of the hospital and college, on payment of seventy guineas. Such pupils will have all the advantages of apprentices, and will have a priority of claim to subsequent hospital appointments. The governors of Dr. Steevens's Hospital have adopted the matriculation system in hopes that parents and guardians will communicate with one of the professors, under whose care a pupil is placed, both at his first entrance, and also from time to time during the progress of his subsequent studies.

N.B.—Pupils who have attended courses of lectures and hospital practice prior to the 1st of November, 1857, may matriculate on the following terms:—first year students, 47 guineas; second year students, 24 guineas.

Scholarships and Prizes: Examinations will be held at the end of the session, and prizes awarded for the best answering in the several subjects taught. There will also be a prize for the best reported series of cases, to consist of not less than six medical and six surgical cases, which have occurred in the hospital during the session.

Scholarships will be awarded to those whose answering exhibits general proficiency in every branch of the profession. One day in the week will be devoted by each professor to examination in the subject last taught.

Medical Tutor: Dr. E. Hamilton prepares gentlemen in anatomy, medicine, and surgery for the examinations of the several colleges and examining boards. The Rev. W. P. H. Dobbin, A.M., Ex-S. T.C.D., chaplain to the hospital, prepares gentlemen for the preliminary classical examinations at the College of Surgeons, Apothecaries' Hall, &c.

Recognised Residences: In addition to the apartments in the hospital, arrangements have been made to provide pupils with lodgings in the neighbourhood, on reasonable terms. Parents and guardians availing themselves of this accommodation will have the alternative of placing the pupil under the superintendence either of the chaplain of the hospital or of one of the professors.

Further particulars may be learned from any of the professors, from the Secretary, Mr. S. A. Cusack, at the hospital, or from Dr. E. Hamilton, 128, Stephen's-green, West.

MEATH HOSPITAL AND COUNTY OF DUBLIN INFIRMARY.

WINTER SESSION.

The usual Courses of Clinical Instruction will be commenced on the first Monday in November, and will be continued through the Session by the Physicians and Surgeons of the Institution. Arrangements have been made to prevent the hours of attendance and lectures from interfering with any other place of instruction in Dublin.

The Medical and Surgical Clinical Instruction will be given upon alternate days. The Surgical upon Mondays, Wednesdays, and Fridays, and the Medical upon Tuesdays, Thursdays, and Saturdays. Two Medical and two Surgical Clinical Lectures will be delivered each week.

Operations, unless in cases of emergency, will only be performed on the days of Surgical Instruction. Every attention is paid to the instruction of pupils in the minor operations of Surgery, for which a large daily attendance of extern Patients affords ample opportunity. A Registry of all Surgical cases admitted into the Hospital is carefully preserved, and is open to the inspection of the pupils.

Premiums in Clinical Medicine and Surgery will be awarded as usual by the Medical Board at the close of the Session.

The situation of Resident Pupil is open to pupils as well as apprentices of the Hospital. Special recommendatory certificates are given to such gentlemen as have filled the situation of Clinical Practising Assistants in the Hospital for at least four months, to the satisfaction of the Medical Officers. Certificates of attendance on this Hospital are acknowledged by all the Colleges, Universities, Halls and Boards.

* * * The Hospital is only a few minutes' walk from the College of Surgeons, and from most of the Medical and Surgical Schools.

The Medical Clinical Instruction is given by Drs. W. Stokes and C. Lees.

The Surgical, by Sir P. Crampton, Bart., M.D., Drs. W. H. Porter, J. Smyly, F. Rynd, G. H. Porter, and M. H. Collis.

For further particulars apply to Mr. M. H. Collis, Sec., 25, Lower Baggot-street; or at the Hospital.

Fee for each Course of Lectures, 2*l.* 2*s.*

This School, claiming priority of foundation many years before its

kindred unchartered institutions were projected, was established in 1810, by J. Kirby. At this period the Schools of the College of Surgeons and University were the only sources of Medical education in Ireland, and this necessarily involved an absence of that competition always conducive to the true spirit of improvement. Since its foundation, this School has maintained its character for the sound principles of its anatomical and surgical instruction, and numbers amongst its former pupils several of the most distinguished teachers of the Irish School of Medicine.

Endowments in favour of Students, subject to the conditions prescribed by the Founder, in the following departments:—two in Anatomy and Physiology; two in Minute Anatomy; two in practical Anatomy, and one in Surgery. The usual prizes in the other departments will be awarded at the termination of the Session.

Certificates of attendance upon these lectures are recognised by the Queen's University, Ireland; the King and Queen's College of Physicians; by the London University; the College of Physicians of London; the Colleges of Surgeons in Dublin, London, and Edinburgh; the University of Glasgow, as constituting an "*Annus Medicus*;" the Faculty of Glasgow by the Army and Navy Medical Boards; and the Apothecaries' Halls, London and Dublin.

They are visited every morning by Professors of the College, who deliver clinical lectures there three times a week.

 RICHMOND, WHITWORTH, AND HARDWICKE HOSPITALS,

NORTH BRUNSWICK-STREET, DUBLIN.

The Course of Attendance and Clinical Lectures at these Hospitals was commenced on Monday, the 2nd of November, 1857, and will be continued during the Winter and Summer Sessions.

These hospitals contain 312 beds, and have attached to them the Truss Establishment for the relief of the ruptured poor of Ireland; also a well-selected medical and surgical library.

There is an extensive museum, containing nearly four thousand morbid preparations, casts, and drawings, with case books containing the reports, available for Clinical Instruction, and always accessible to the Hospital class.

The surgeons visit daily at half-past eight o'clock, and the physicians at ten o'clock A.M.

Two Surgical and two Medical Clinical Lectures will be delivered in each week, in addition to the usual Clinical Instruction which is given daily by the Physicians and Surgeons. Special Courses of Clinical Instruction are given on Fevers and Epidemic Diseases, Diseases of the Eye, and Mental Diseases, and special certificates awarded.

The Resident Pupils and Clinical Clerks of these Hospitals are selected from the Class, according to merit.

The instruction in *Clinical Medicine* is given by the Physicians, viz. : Drs. D. Corrigan, J. Banks, B. G. M'Dowel, and S. Gordon.

The Instruction in *Clinical Surgery* is given by the Surgeons : E. Hutton,

M.D., R. Adams, M.D., Mr. J. Hamilton, R. W. Smith, M.D., and C. Fleming, M.D.

Practical Pharmacy is taught under the Superintendence of the Apothecary of the Hospital.

Attendance for nine months on the practice of a General Hospital, with attendance on the Clinical Lectures on Medicine and Surgery therein delivered, is, by a regulation of the Board of Trinity College, required from candidates for the degree of M.B.

The regulations of the East India Company require attendance upon a course of Clinical Lectures on Diseases of the Eye, which will be delivered during the session, and for which distinct certificates will be given. Attendance on a Lunatic Asylum is also required. The Richmond Institution for the Insane, accommodation 600 patients, is in the immediate vicinity of the hospitals, and is open to pupils at a moderate fee.

Adjoining these hospitals is the Carmichael, late the Richmond Hospital School of Medicine, where regular courses of lectures are delivered on the several subjects of Medical Science.

The London College of Surgeons, and the Queen's University, require a list of the pupils entering for the Winter Session to be transmitted to their Secretaries respectively on or before the 25th of November next.

Terms of Attendance.—For the Winter Sessions of six months, 8*l.* 8*s.*; for the Summer Session of three months, 3*l.* 3*s.*

A *Public course of Lectures* on Comparative Anatomy and Zoology, free to all students, is delivered by the Professor of Anatomy and Physiology, at the commencement of the session, and additional lectures on the same subject, at intervals during the winter.

Practical instruction in Operative Surgery is given by the Professors of Surgery, separate from the Surgical Lectures. Fee 5*l.* 5*s.*

The Professor of Chemistry receives operating pupils into the Chemical Laboratory.

Dissections from sunrise to sunset; one or more of the Demonstrators being always present to give instruction.

The Professor of Botany will commence a course of Lectures on Structural and Physiological Botany in February. This course, taken in conjunction with that on Comparative Anatomy and Zoology, by the Professor of Anatomy and Physiology, constitutes the course of Natural History required by the Army Medical Board.

Pupils attending the Lectures on Midwifery and Diseases of Women and Children are admitted to the practice of a recognised Midwifery Hospital, on payment of a fee of 4*l.* 4*s.*

In order to meet a requirement of the Army Medical Board, a Professor has been appointed to deliver lectures on Logical Science.

For further information, application to be made to any of the Professors, or to the Registrar, Mr. J. Brennen.

SCHOOL OF PHYSIC, TRINITY COLLEGE, DUBLIN.

WINTER SESSION, 1858.

Commenced November 2, 1857.

Institutes of Medicine and Pathology : Dr. Law. Wednesday, Thursdays, Fridays, and Saturdays, at ten o'clock.

Materia Medica and Pharmacy : Dr. Osborne. Wednesdays, Thursdays, Fridays, and Saturdays, at eleven o'clock.

Surgery : Dr. R. W. Smith. Fridays and Saturdays, at two o'clock, and at eleven o'clock on Mondays.

ST. VINCENT'S HOSPITAL, STEPHEN'S-GREEN, DUBLIN.

WINTER SESSION.

Med. Advisers: Dr. J. M. O'Ferrall, Dr. K. I. O'Doherty, and Dr. F. B. Quinlan.

Consults: Sir P. Crampton, Bart., M.D, and Sir Henry Marsh, Bart., M.D.

Apoth. and Regist., Mr. Chas. P. J. Costello.

Surg.-Dentist, Mr. W. O'Doherty.

The Hospital, which is on the principle of the hospitals in Paris, contains 100 beds, constantly occupied by instructive cases.

A large ward has been opened for the reception of children, on the plan of the "Enfants Malades;" and will afford opportunity for studying the diseases of early life.

Connected with the hospital is an extensive Dispensary, where abundant means are presented for the acquisition of medical and surgical knowledge.

The Hospital is visited daily, at eight o'clock, a.m.

Medical and Surgical Clinical Lectures will be delivered three times a week during the Session, and clinical instruction daily. The Clinical Lecture will be illustrated by a splendid collection of original drawings, casts, and preparations.

Certificates of attendance on the practice of this hospital are recognised by the College of Surgeons, London and Dublin, London University, the Queen's University in Ireland, the Apothecaries' Halls, London and Dublin; the Army and Navy Medical Boards, &c.

In order to encourage that branch of study, Dr. O'Ferrall will, at the end of the Session, award a prize to the pupil who shall produce the series of cases containing the most accurate description of diseases in children.

Further particulars may be learned by inquiring at the hospital during the hours of attendance.

BELFAST CLINICAL AND PATHOLOGICAL SOCIETY.—Instituted 1853. *Pres.*, Dr. J. Moore; *Vice-Pres.*, Mr. Browne, Dr. S. Reid, Dr. Murney (Resident); Dr. Babington, and Dr. Graves (Non-Resident). *Ex. Off. Vice-Pres.*, Dr. Purdon, Dr. Ferguson, and Dr. McGee; *Treas.*, Dr. Halliday; *Secs.*, Drs. Drennan and Cuming; *Counc.*, Mr. Lamont, Mr. Wales, Dr. Dill, Mr. J. Smyth, Dr. Corry, and Mr. Mulholland; *Anal. Comm.*, Drs. Purdon, Murney, and Cuming.

The Society meets in its Pathological Museum at the General Hospital, each Saturday during the session, from three till four o'clock, when candidates are proposed, pathological specimens, new remedies and instruments are exhibited, cases read and discussed, results of clinical and microscopical examinations stated, clinical facts and statistics, notes of new treatment, &c. &c., brought forward. The Society numbers 3 Hou., 12 Corr., 48 Res., and 63 Non-Res. Members.

BELFAST MEDICAL SOCIETY.—Established 1822. *Pres.*, Mr. Browne, R.N.; *Vice-Pres.*, Drs. Heeney and Wheeler; *Counc.*, Dr. Halliday, Mr. Lamont, Mr. McCleery, Dr. Pirrie, Mr. Rea, and Mr. Dickson; *Treas.*, Dr. Patterson; *Sec.*, Dr. Drennan; *Libr.*, Mr. Ring.

This Society was established to afford its members increased facilities of consulting the best medical works and periodicals by means of the library, of deriving mutual instruction on medical subjects by means of its discussions, and, as a collective body, protecting the interests of the Medical Profession. The Society possesses a well-selected library, comprising above 2,000 volumes and periodicals, and a valuable pathological museum. Its meetings are held on

the first Monday of each month, for the reading of papers, and the discussion of medical subjects.

BELFAST NATURAL HISTORY AND PHILOSOPHICAL SOCIETY.—Instituted 1821. *Pres.*, Dr. J. Stevelly; *Vice-Pres.*, Dr. T. Andrews, Mr. G. C. Hyndman, Dr. G. Dickie, and Mr. R. Patterson; *Treas.*, Mr. J. Malcolmson.

The Society was formed for the cultivation of Natural History, and the investigation of the Topography, Statistics, and Antiquities of Ireland. Subsequently, the range of subjects became more extensive, it being agreed to receive communications on all branches of physical science and their applications.

The Meetings (private and public) for the reading of papers are held on alternate Wednesday evenings during the winter months, at the Museum, College square North, Belfast. This Museum was founded in 1830, and is open daily (Sundays excepted), from twelve till four o'clock. The internal arrangements are under the care of the council for the time being.

Penny.

Her Majesty's Government have formed in Dublin a Museum of Irish Industry, to represent and exhibit the materials for agricultural, mining, and manufacturing industry which Ireland contains, and to elucidate and expose the means by which those materials may be rendered available for the improvement of this country.

The institution embraces a chemical department, destined for carrying on such investigations as may extend our knowledge of the physical history and industrial capabilities of Ireland, and supply that analytical information as to the nature of our soils upon which sound agricultural improvement must be based.

The Museum includes a department of documents and records of an economic or descriptive character regarding the past history and present condition of our mining, manufacturing, and agricultural industry. To these documents reference shall at all times be easy to those persons interested in their study.

The information collected by the officers of the Museum, and the results of the investigations carried on in the establishment, will be from time to time published.

To an institution founded for such beneficial objects, the active co-operation of all classes may reasonably be expected; and Sir Robert Kane, the director, receives donations for the Museum, specimens of which will, when prepared for exhibition, be in every instance deposited in the Museum with the donor's name affixed. It is necessary that donations should be accom-

This Society meets on the second Wednesday in each month, from November till June, both inclusive, at eight o'clock in the evening, for the reading and discussion of papers on Geological subjects. The meetings are held in Dr. Lloyd's rooms, 35, Trinity College. Members are admitted on being proposed by one member, seconded by another, and approved by the Council. 1*l.* is paid on admission, and 1*l.* annually; or 10*l.* life composition. Non-resident members are admitted on paying 5*l.* Undergraduates are admitted as associate members on paying 5s., and being proposed and seconded as ordinary members.

DUBLIN—THE IRISH ARCHÆOLOGICAL AND CELTIC SOCIETY.—Instituted 1855. *Patron*, H.R.H. the Prince Consort; *Pres.*, Duke of Leinster; *Vice-Pres.*, Marquis Kildare, Earl Leinster, Earl Dunraven, and Lord Talbot de Malahide; *Counc.*, Mr. E. Curry, Rev. T. Farrelly, Rev. Dr. C. Graves, Rev. J. Graves, Rev. M. Kelly, Lieut.-Col. T. A. Lareom, Mr. P. V. Fitzpatrick, Mr. J. C. O'Callaghan, Dr. J. O'Donovan, Dr. G. Petrie, Rev. Dr. W. Reeves, Rev. Dr. C. Russell, Mr. J. H. Smith, Mr. W. R. Wilde; *Treas.*, Dr. A. Smith; *Secs.*, Dr. J. H. Todd and Mr. J. T. Gilbert.

The immediate object of this Society is to print, with accurate English translations and annotations, the unpublished documents illustrative of Irish history, especially those in the ancient and obsolete Irish language, many of which can be accurately translated and elucidated only by scholars who have been long engaged in investigating the Celtic remains of Ireland; and should the publication of these manuscripts be long delayed, many most important literary monuments may become unavailable to the students of history and comparative philology. The Society will also endeavour to protect the existing monumental and architectural remains of Ireland, by directing public attention to their preservation from the destruction with which they frequently are threatened.

The Books of the Society are published solely for the use of its Subscribers, who are divided into two classes: Members, who pay three pounds admission, and one pound per annum; and Associates, who pay an annual subscription of one pound, without any entrance fee. The fundamental Laws of the Society regulate the privileges of each class of subscribers, who can also obtain the publications of the two former Societies, at reduced rates. Subscriptions are received by the Treasurer, Mr. E. Clibborn,

Royal Irish Academy, Dawson-street. Persons desirous of becoming Subscribers to the Society are requested to communicate, by letter, with the Hon. Secretaries, at No. 35, Trinity College, Dublin.

*DUBLIN NATURAL HISTORY SOCIETY.—*Counc.*, Sir E. Borough, Bart., Mr. T. F. Bergin, Mr. F. W. Brady, Dr. C. Croker, Mr. J. R. Donohue, Dr. C. Farran, Dr. S. Gordon, Dr. W. H. Harvey, Mr. R. J. The Society was founded for promoting Husbandry and other useful Arts, in Ireland, and is the oldest institution of the kind in the United Kingdom. It was chartered by George II in 1749-50, and received for several years the annual sum of 500*l.* from the Royal Privy Purse. In 1761 it was endowed by the Irish Parliament, and has been in the enjoyment of parliamentary grants for the last ninety years.

Candidates are elected by ballot, being proposed and seconded by members at one meeting, and balloted for at the next meeting.

The session commences on the first Thursday in November, and terminates on the first Thursday in June. At the meeting on the second Thursday in November, in addition to ordinary business, the Vice-Presidents, the Honorary Secretaries, and the several Officers, Professors, &c., are balloted for and elected.

On the first Thursday in December eight standing committees are elected, who carry out the objects of the Society. Other meetings are held on the first Thursday in January (when the Council for the ensuing year is elected), the first Thursday in February, March, April, May, and June.

The meetings on the second Thursday in November, the first Thursdays in March and June, are stated general meetings pursuant to charter, at which alone bye laws can be made or altered.

Evening meetings are held on the last Friday in each month during the session. At these meetings papers are read, and discussions elicited upon subjects connected with Practical Science and Art.

The Council meets weekly (except during the recess), and at three o'clock on such Thursdays as are unoccupied by meetings of the Society, and consists of seven Vice-Presidents, two Honorary Secretaries the Chairman, and one member from each of the Committees, and nine members from the Society at large not being on any of the Committees.

The Library contains 22 000 volumes. There is an extensive Botanic Garden, and a fine Agricultural Museum; also, one of Natural History, and one of Geology, open daily to the public.

The Government School of Art is consolidated with the Drawing School of the Society.

Morris, Mr. J. McDonnell, and S. M. Greer, M.P.

The object of this Society is the promotion of the study of Statistical and Economical Science.

The meetings are held on the third Monday in each month, from November to June inclusive, at eight in the evening. The business is transacted by members reading written communications on some subject in Statistics, Political Economy, or Jurisprudence. Proposals of candidate members should be sent to the Secretaries at least a fortnight previously to the meeting. The subscription to the Society is 10s. entrance, and 10s. per annum.

DUBLIN—SURGICAL SOCIETY OF IRELAND.—Established 1831, by the Royal College of Surgeons, for the advancement of Surgical and Medical knowledge, and of the Collateral Sciences. *Pres.*, The Pres. R. C. S.; *Secs.*, Drs. C. Benson and O'B. Bellingham.

All Fellows and Licentiates of the College are eligible as ordinary members of the Society, and the Council are authorised to elect by ballot, as Associate Members, such medical and surgical practitioners, not Fellows or Licentiates of the College, as they may consider likely to co-operate with their efforts for the improvement of medical and surgical knowledge. The Society holds its meetings in the College of Surgeons every second Saturday during the winter, at half-past eight o'clock p.m., when papers are read and discussed, many of which already published have excited much interest in the Profession at home and abroad. The expenses are borne by the College, without any charge to members. Any gentleman, whether member or not, having a communication to make, and unable to attend, may have it read by the Secretaries.

DUBLIN UNIVERSITY PHILOSOPHICAL SOCIETY.—Instituted 1842; Connected with the University, 1845. *Patrons*, Archbishop of Dublin and Provost Trin. Coll.; *Vice Patrons*, the Scu. Fell.; Mr. G. A. MEDICAL BENEVOLENT FUND SOCIETY OF IRELAND.—Established in 1842, for the relief of distressed Medical men, and the widows and orphans of such.

RULES OF THE SOCIETY.

1. That a charitable fund be created by Donations and Subscriptions, to be called The Medical Benevolent Fund of Ireland.
2. That contributions be received from all persons friendly to the objects of the Society though not belonging to the pro

3. That the object of the Fund be the relief of Medical men under severe and urgent distress, occasioned by sickness, accident, or any other calamity.

4. That any Physician or Surgeon labouring under such afflictions be considered a fit object for the charity

5. That the claims of contributors shall, as far as possible, have the preference, but that contributions to the Fund give no claim of right to relief, the Fund being one of pure charity; and that each case be judged according to the urgency of the distress.

6. That under circumstances of peculiar emergency, relief may be extended to the widows and orphans of Physicians and Surgeons, it being understood that it is not the design of this Fund to relieve Medical men from the necessity of providing for their families by ordinary life assurances, and such other means as prudence dictates.

"But if any provide not for his own, and specially for those of his own house, he is worse than an infidel."—1 Tim. v. 8.

7. That the management of the Fund be conducted by Committees of the contributing members, annually appointed; the Central Committee to be at Dublin, and Local Committees, subordinate to the Central, in each of the principal cities and towns; the Central Committee having power to appoint Local Committees wherever they may be required.

The following are the Committee, Treasurer, Secretaries, and Trustees for the ensuing year:—

THE EAST INDIA COMPANY'S MEDICAL SERVICE.

Leadenhall-street, London. E.C.

Sec., Sir J. C. Melvill, K.C.B.

Phys., Dr. Scott, 13, Stratton-st. Piccadilly.

Members of Board Exam., Mr. G. Busk, Dr. J. Hooker, Mr. J. Paget, Dr. E. A. Parkes.

All natural-born subjects of her Majesty between twenty-two and twenty-eight years of age, and of sound bodily health, may be candidates for admission into the service of the East-India Company as Assistant-Surgeons. They must subscribe and send in to Dr. Scott, the Physician to the Honourable East India Company, ten days before the period fixed for each examination, a declaration to the following effect:

"I (Christian and Surname at full length), a candidate for employment as an Assistant-Surgeon in the service of the East-India Company, do hereby declare that I was _____ years of age on the day of _____ last, and that I labour under no constitutional disease or physical disability that can interfere with the due discharge of the duties of a Medical officer; and I also attest my readiness to proceed on duty to India within three months of receiving my appointment."

This declaration must be accompanied by the following documents:—

1. Proof of Age either by extract from the Register of the Parish in which the candidate was born, or by his own declaration, pursuant to the Act 5 and 6 William IV, cap. 62.
2. A certificate of moral character from a magistrate, or a minister of the religious denomination to which the candidate belongs, who has personally known him for at least two preceding years.
3. A diploma in Surgery; or a degree in Medicine, provided an examination in Surgery be required for such degree; from some body competent by law to grant or confer such diploma or degree.
4. A certificate of having attended two courses of lectures, of six months each, on the practice of Physic, and of having attended, for six months, the practice and clinical instruction of the physicians at some hospital containing at least, on an average, one hundred in-patients; or of having

attended one course of lectures, of six months, on the practice of Physic, and clinical instruction for twelve months. 5. A certificate of having attended, for three months, the practical instruction given at one of the public Asylums for the treatment of the Insane. 6. A certificate of having attended, for three months, one of the institutions, or wards of an hospital especially devoted to the treatment of Ophthalmic disease. Candidates who may not have been able to attend the practice of an Asylum for the Insane, or of an Ophthalmic hospital, for three months previous to their offering themselves for examination, will not be excluded from examination, but will, if successful in obtaining recommendation for appointments, be required to produce certificates of having attended such practice during the interval between the examination and the time of proceeding to India. 7. A certificate of having attended a course of lectures on Midwifery, and of having conducted at least six labours. 8. A certificate of having acquired a practical knowledge of cupping. Candidates may also, at their option, send in certificates of attendance at any hospitals, or on any course of lectures, in addition to the above. Attendance on a course of Military Surgery, and the practical study of surgical operations on the dead body, are recommended.

The examination will include the following subjects :—1. Surgery in all its departments. 2. Medicine, including the diseases of women and children, Therapeutics, Pharmacy, and Hygiene. 3. Anatomy and Physiology, including Comparative Anatomy. 4. Natural History, including Botany and Zoology.

The following are the books recommended—In Zoology and Comparative Anatomy; *Outlines of the Structure of the Animal Kingdom*, by Rymer Jones, or *Cours Élémentaire d'Histoire Naturelle*, par Milne Edwards—Botany: *Lindley's School Botany*, or *Lindley's Elements of Botany*.

The examination will be conducted—1. By means of written questions and answers. 2. By object examinations and experiments, when the subject admits of such tests. 3. By practical examination of patients, and by operations on the dead body. 4. By *viva voce* examination.

The persons who shall be pronounced by the Examiners to be the best qualified in all respects will be appointed to fill the requisite number of appointments as Assistant-Surgeons in the East India Company's service, and, so far as the requirements of the service will permit, they will have the choice of the Presidency in India to which they shall be appointed, according to the order of merit in which they stand on the list resulting from such examination.

All Assistant-Surgeons are required to subscribe to the Military or Medical, and Medical Retiring Funds, at the Presidencies to which they may be respectively appointed, and to the Military Orphan Society also, if appointed to Bengal.

All Assistant-Surgeons who shall neglect or refuse to proceed to India under the orders of the Court of Directors, within three months from the date of their appointment, will be considered as having forfeited it, unless special circumstances shall justify a departure from this regulation.

A copy of these regulations, and any further information, may be obtained on application to the Secretary of the Military department, East-India House.

The examinations will take place in the months of January and

July in each year, and due notice will be given by public advertisement of the days appointed and of the probable number of candidates to be selected.

The Examiners for Assistant-Surgeons in the Honourable East-India Company's Service, having received many inquiries as to the object and extent of the Examination in Comparative Anatomy, Zoology, and Botany, have considered it desirable to announce that their objects are,—1. To ascertain who of the candidates have devoted especial attention to any of these sciences, and are hence qualified to undertake duties requiring a knowledge of them, as well as the general rules of their profession. Proficiency in these sciences will, in classifying the candidates by merit, be entitled to great consideration. 2. To encourage all candidates to acquire an elementary knowledge of the structure and affluities of the principal natural families of Animals and of Plants, with the general plan upon which these are constructed, and the functions and relations of their most important organs. 3. To promote the study of Natural History as a most important adjunct or preliminary to a liberal Medical education; that of Comparative Anatomy, Zoology, or Botany, if properly cultivated, by means of specimens, for even a short period, being eminently calculated to develop habits of close observation, and to strengthen those powers of reasoning upon observed facts which must be habitually exercised by Medical men everywhere, but which must be exercised with the greatest energy and promptitude by those who practise in a tropical climate, and who are often thrown wholly upon their own resources. The general examination in these sciences will be elementary, and will embrace a very limited range of technical terms. At the written examination, a considerable number of questions will be put, with the view of allowing each candidate to select such subjects as he has attended to, and, thereby, of enabling the Examiners to ascertain the particular departments of science in which the verbal examination should be conducted. With those candidates who have attained proficiency in any branch of these sciences, the verbal examination will be pursued in the branch selected, so as to ascertain the full extent of their knowledge.

MEMORANDUM AS TO THE PAY AND ALLOWANCES OF MEDICAL OFFICERS IN THE EAST-INDIA COMPANY'S SERVICE.

Pay and Allowances and Time of Service commence from date of arrival at the Presidency to which they are appointed.

FEES CLAIMABLE BY MEDICAL WITNESSES.

At a coroner's inquest for attending and giving medical evidence, in obedience to the order framed according to schedule A of the 6 and 7 William IV. cap. 89, commonly called "The Medical Witness Act" . . . 1*l.* 1*s.* 0*d.*

If the witness has also, by direction of the Coroner, according to the like form, made a post-mortem examination of the body of the person deceased, then, on attending the inquest, and giving evidence thereon, the witness is entitled to receive a fee of . . . 2*l.* 2*s.* 0*d.*

The order to make a "post-mortem examination" comprehends a chemical analysis of the contents of the stomach, if such be necessary, as well as an analysis of any other fluid or substance placed in the hands of the witness by direction of the coroner, under suspicion that it was concerned in the demise of the person deceased; the chemical analysis is a part of the autopsy, and no separate or additional fee is recoverable for such analysis. A medical witness to whose skill a post-mortem examination is confided is presumed to be competent to make every portion of a pathological or anatomical inspection: or, if he derive aid in his investigation from a professed chemist, or other such specially accomplished person, he must himself prove at the inquest all the appearances detected at the autopsy.

For attending to give medical evidence at trials in the criminal courts and in suits at law . . . 1*l.* 1*s.* 0*d.* to 2*l.* 2*s.* 0*d.*

Medical witnesses who, at inquests, are bound over by the Coroner to appear at the sessions or assizes to give evidence at a trial for manslaughter or murder, are paid for attending at *the trial*, in addition to the payment at the inquest, a sum per day not fixed by law, but varying according to the practice of the county. The sum is probably nowhere less than a guinea per day. When a medical witness is examined at a police court, or before a bench of magistrates, he obtains no fee for his evidence there, and is remunerated only at the criminal court where the trial of the prisoner takes place. This is unjust in principle, as it opens a temptation to strain evidence against the accused at the preliminary enquiry. The medical witness on such occasions should obtain from the committing magistrate or justices a certificate of his claim to be paid at the trial, and present it at the office of the clerk of the arraigns, or other place where the fees of witnesses for attending the criminal court are paid.

A surgeon, called by a police officer to treat an accident, or a person in a state of insensibility, has a legal claim upon the patient, or his or her friends. If, however, he be summoned by the police to attend a sick person at the station-house, he is allowed 3*s.* 6*d.* for a visit in the day-time, and 7*s.* if after nine o'clock at night. These fees are paid by the police authorities.

The statute is so very precise in relation to the attendance and claims of medical gentlemen at coroners' inquests, and it is so necessary that it should be clearly comprehended, in order to save them needless trouble, that we subjoin the following exposition of the law:—

First and chiefly it should be understood, that to entitle a medical witness to receive a fee in the coroner's court, he must have received an order to

attend the court, or to open the dead body, signed by the coroner, framed in the following terms :—

“Coroner's inquest at the in the parish of in the county of upon the body of

“By virtue of this my order, as coroner for you are required to appear before me and the jury at the place aforesaid, on the . . . day of one thousand eight hundred and . . . at . . o'clock on the noon to give evidence touching the cause of the death of the aforesaid person; and make, or assist in making, a post-mortem examination of the body, (with an analysis of the contents of the stomach, if such be necessary,) and report thereon at the said inquest.

“To Mr.

“A. B., Coroner.”

When any legally qualified medical practitioner has attended upon any inquest *in obedience to any such order*, as aforesaid, of the coroner, the said practitioner shall, for such attendance at any inquest in Great Britain, be entitled to receive such remuneration or fee as is mentioned in the table marked B in the “Table of Fees.”—*Section III of the Act.*

At the same time that it provides for the payment of medical witnesses who previously had no security for payment, the Act throughout indicates that the summoning of witnesses, to make post-mortem examinations and give medical testimony, shall rest with the coroner himself, expressed by the “order” above printed, and not be subject to the whim or discretion of any officer of police, constable, beadle, or headborough; and without the possession of the “order” in question, a medical witness cannot legally claim the payment of the fee. The statute, however, does not exonerate medical gentlemen from the duty of obeying a common summons signed by the constable, under the warrant to assemble the inquest, since it may happen that professional men may be the proper persons to testify to facts that do not possess a medical character, and they are in law as fully bound to obey that summons as the express medical order of the coroner.

ADAMSON, JOHN, L.R.C.S. Edin. 1790; formerly Surg. R.N., &c. in November, at his residence, Kineardine, aged 88. Few now survive to connect the present generation with the stirring epoch of the French Revolution. Dr. Adamson was born in the same year as Napoleon; he obtained his diploma at Edinburgh in 1790, and immediately after joined the Royal Navy, and was in active service during the whole period of the revolutionary wars, and for some years after their close. During that time he was employed as surgeon in three frigates and four ships of the line. He was present at Earl Howe's general action with the Channel fleet, June 1, 1794; in that of Sir Robert Calder, July 22, 1805, which Sir Archibald Alison describes in his history as "perhaps the most momentous action ever fought by the navy of England." He was engaged at the Cape of Good Hope in 1806; Monte Video in 1807; at St. Paul's, Isle of Bourbon, 1809. He was also at the attack of Algiers in 1816. After thirty years' active service, he left the navy, and settled in his native place, Kineardine, where he continued to follow his profession until his advanced age laid him aside from active duty. Even up to the time of his death he cheerfully gave the benefit of his advice to those who consulted him, especially to the poor, to whom he was ever ready to extend aid—to them often as essentially necessary as medical relief—and who have lost in him a generous benefactor. Until his last brief illness he enjoyed excellent health, and heard as well as ever he had done in his life. His knowledge of his profession kept pace with the advance and improvements of the present day, and up to the very close of his life his time was greatly occupied in perusing our old classic literature, as well as many of the recent publications. By his death his friends have lost a cheerful companion and wise counsellor, whilst all must feel that another link has been broken which connected this generation with momentous events, the actors in which have now almost all disappeared, and their record is to be found only in the page of history.—*Alloa Advertiser*.

ALEXANDER, GERVASE, M.D. Aberdeen, 1817; Member of the Halifax Literary and Philosophical Society; Author of a "Translation of the Odes of Horace," &c., at his residence, Halifax. "If," says a local paper, "in the worthy doctor's career, he ever had enemies (which is much doubted), he had outlived them and forgiven them. Single-minded and upright, he was truly a man without guile. Thoroughly independent in feeling, he never in his long life sought a favour from his fellow-

man. Local distinctions, often coveted, had no attractions for him. In the possession of excellent health, which he prized highly, and a happy domestic circle, he was perfectly content, and thought himself blessed. He has well served his generation, lived a virtuous and Christian life, and his very last breath, we understand, was spent in offering up, to the Giver of all good, thanksgiving and prayer."

BATESON, JOHN THOMAS, M.R.C.S. Eng. 1826, L.S.A. 1825, Senior Surgeon to the Lancaster Infirmary, &c., on February 12, under circumstances of a very distressing character. He was called to attend a patient at Settle, to which place he proceeded by rail. On his return to the station, he walked across the rails to the opposite platform, but not observing the near approach of the train, was knocked down and fearfully injured. His right foot was severed, several limbs were fractured, and a severe wound on the scalp was inflicted. The unfortunate deceased expired in a few hours.

BELL, THOMAS, Surgeon, in practice prior to 1815; at Great Grimsby.

BELLINGHAM, O'BRYEN, M.D. Edin. 1830; L.R.C.S. Edin.; L. and F.R.C.S.I., and Chairman of the Court of Examiners; Surgeon to St. Vincent's Hospital, and Secretary to the Surgical Society of Ireland, &c. &c., on October 11, at 19, Kildare-street, Dublin, aged 51. Dr. Bellingham was the Author of the well-known treatises "On the Cure of Aneurism by Compression," and "On Diseases of the Heart." He was highly respected by a large circle of friends for his gentlemanly manners, his extensive professional knowledge, his ability, and his moral worth. He was for some years before his death occupied in a sub-editorial capacity on the *Dublin Medical Press*, chiefly giving his attention to the editing of the Reports of Surgical Society of Ireland, which appeared from time to time in that Journal.

BELLINGHAM, FRANCIS, Surgeon, at Bourne, Lincolnshire, on April 25, aged 74.

BELLOT, THOMAS, Surgeon R.N.; M.R.C.S. Eng. 1828; F.R.C.S. 1846; was appointed in 1831 Assistant-Surgeon to H.M. sloop "Harrier," East Indies, which was paid off in July, 1835. He passed the Royal College of Surgeons a second time, for promotion to Full Surgeon R.N., and in October, 1835, was appointed Acting Surgeon H.M. brig "Leveret," which proceeded to the coast of Africa; he was paid off in September, 1839. In November of the same year he was appointed Acting Surgeon H.M. war steamer "Firefly," and took out General Maister, Governor of the West India Islands. In 1842, Mr Bellot received his commission of Full Surgeon. He was appointed in April, 1843, Full Surgeon of H.M. sloop "Wolf," and joined her on the coast of China, taking medical charge of troops out to China. He remained out between two and three years. In June, 1849, he was appointed Surgeon-Superintendent, having the entire command of H.M.'s convict ship "Havering," taking out about 365 men with tickets of leave to Sydney. He was afterwards appointed Additional Surgeon in H.M.'s flag-ship "Britannia," Black Sea, Admiral Dundas commanding the fleet. In December, 1854, he received the appointment of Additional Surgeon to the Naval Hospital "Therapia," on the Bosphorus, and left for England in March, 1855, in charge of invalids. Whilst in the "Harrier" he was the sole Medical Officer in various boat attacks against the Malay pirates in the Straits of Malacca, landing upon the island Arroa with a force of forty-seven men, including officers; the first lieutenant, Messrs. O'Callaghan, Maitland, and himself, a sergeant of Marines with fourteen men, and the crews of the pinnace, cutter, and gig, armed with muskets, pistols, and cutlasses. Twenty-five armed pirates had taken up a position on a rising ground near some trees, having one iron gun (called a gingall), and one brass one, each carrying one pound ball, and two musketoons. One party of the English left in charge of boats, the other party charged the pirates with bayonets, killed several of them, and took the guns; they scattered themselves in small parties over the island, killing in all about fifteen pirates, taking a

number of kreeses and other weapons, the pirates amounting to about fifty men. Commander Vassall expressed his approbation of his conduct. Whilst serving on the coast of Africa for nearly four years, the complement of H.M. brig "Leveret" was sixty-eight, officers and men, eighteen of whom were Africans; only three men died during that period, one man being shot by the Spaniards. He invalided only one man after amputating his arm above the elbow, from a severe gun-shot wound, bringing back to England the whole of the European crew. He assisted in the capture (by boarding) of the Spanish piratical and slave brig "Diogenes," carrying a crew of fifty men, and had charge of the wounded prisoners, until transferred to the Hospital at Mozambique. During the two years in which he was Surgeon of H.M.'s ship "Firefly," West Indies, he lost only one man, whose death was caused by a fall. He himself had two attacks of yellow fever, and was offered to be invalided by Deputy-Inspector Evans, but declined. Mr. Bellot received most honourable testimonials from his commanding officers, and from General Maister, Governor of the West India Islands. He was most graciously appointed, by the Most Noble the Marquis of Westminster, Surgeon to the 2nd Royal Cheshire Militia, but the Admiralty refused to allow him to hold the commission, he being a Surgeon for active service. He was ever improving himself in his profession, both on the Continent and in England, and prided himself upon having been a pupil and honorary demonstrator of anatomy to Joseph Jordan, Esq., who established the first school of anatomy in Manchester, and for whom he ever entertained the most profound respect for his great professional knowledge and skill and varied information, and most sincere regard and esteem for him as a most honoured and firm friend. He devoted much of his leisure to classical study—Hebrew, Greek, and Latin, and especially Oriental languages—having also a respectable knowledge of modern languages. In 1831 he translated the "Aphorisms of Hippocrates," dedicated to Sir Benjamin Brodie, Bart., whose pupil he had been, and whom he held in great respect. He translated "Galen upon the Hand," dedicated to Sir William Burnet, K.C.H. He also published a work entitled "Bellot's Sanscrit Derivations of English Words," dedicated, by permission, to the late Right Hon. the Earl of Ellesmere, in 1856. He was an Honorary Member of the Geological and Natural History Societies, and Corresponding Member of the Botanical Society of Manchester, Hereditary Governor of the Manchester Royal Institution, Honorary Member of the Philosophic Society of Sydney, was made an Honorary Fellow of the Royal College of Surgeons whilst he was serving in China. He formed and systematically arranged, according to each dynasty, two very fine collections of Chinese coins, one of which he presented to the Museum of the Natural History Society, Manchester, and which is called the "Bellot Collection." He also collected a great number of very ancient Chinese bronzes, one or two from the island of Pootoo. The deceased gentleman was the eldest son of the late Mr. Thomas Bellot, a Surgeon in Manchester, whose ancestors owned landed property in Derbyshire for many generations, called "Castle Nase," and of whom honourable mention is made in *Blackwood's Magazine* for April, 1833, as having given most valuable evidence before the Committee of the House of Commons in 1818, upon "Sir Robert Peel's Bill," that he, with a few others, all highly respectable, some of the highest eminence, spoke out like honest and skilful men, &c. &c. His younger brother is Mr. Wm. Henry Bellot, F.R.C.S.E., Surgeon Stockport Infirmary,

BENNETT, THOMAS, Surgeon, on December 19th, 1856, at his residence, Strangeways, Manchester, aged 49. In the earlier part of his professional career Mr. Bennett travelled much in Africa and India. His professional abilities were of a very high order, and, as an agreeable companion and sincere and zealous friend, he will long hold a place in our memory.

BERRYMAN, THOMAS, M.D., Edin. 1842; M.R.C.S. Eng. and L.S.A. 1843; of Alverton, Penzance, Cornwall, on June 17th, at St. Austell, where he had gone for the benefit of his health, aged 35.

BESTALL, RICHARD, Surgeon of the Dispensary District, Gorey, co. Wexford.

BICKERSTETH, ROBERT, M.R.C.S. Eng. 1806; F.R.C.S. (Hon.) 1843; on April 17th, at his residence, Rodney-street, Liverpool, of inflammation of the lungs. His decease is sincerely regretted by all who knew him, and amongst the suffering poor especially, whose sufferings he alleviated, his memory will be revered. Mr. Bickersteth was born at Kirkby Lonsdale, in Westmoreland, in 1787. His father was a medical man there, in extensive practice, and greatly respected. Mr. Bickersteth studied in Edinburgh and London, and he was also an apprentice to the late Mr Minshull. For nearly fifty years he was in active practice in Liverpool, during a large part of which the labour he underwent, both of body and mind, night and day, is almost incredible; nothing but the unusual amount of energy he possessed could have carried him through. It never interfered with his cheerfulness, nor his genuine and spontaneous sympathy, which endeared him to his patients, to a degree unsurpassed. At the age of twenty-three he was elected Surgeon to the Infirmary, which appointment he held for forty years. He then resigned, in consequence of a resolution of the committee, limiting the length of service of those afterwards to be appointed. Mr. Bickersteth held a strong opinion that the services of medical men in hospitals should not be limited to any fixed period. On his resignation he was appointed Consulting Surgeon, which office he retained till death. His son, Mr. E. Bickersteth, now holds the honorary post of Surgeon to the Infirmary. Mr. Bickersteth took a lively interest in everything connected with his profession. Notwithstanding his large experience, he was not at all disposed to undervalue the researches of others; he manifested what is rare in a person of his years, an eagerness to obtain acquaintance with every discovery that in any way affected the treatment of disease. He was a member from the first of the Medical Institution, British Medical Association, &c., and though almost overwhelmed with work, presided, when asked, at meetings connected with the interests of medical science. He was much thrown amongst his professional brethren, and for many years past met most of them in consultation frequently. His disinterestedness and uprightness were here so conspicuous that he gained the confidence and respect of every brother practitioner, and we believe there is not one who envied him his success, or does not deeply regret his removal from the midst of them. The esteem in which he was held caused him to be frequently consulted in cases of difficulty quite unconnected with professional matters, and he readily gave up time and thought to them. Mr. Bickersteth did not confine his attention to his profession. Anything for the benefit, moral or religious, of his fellow-creatures sincerely interested him. He was a liberal supporter of the many charities

of the town, and of its educational institutions and schemes connected with the comfort and health of the poor; he was a trustee for several churches, &c. He was not content with supporting good objects; his religious duties were exemplary. Mr. Bickersteth's brothers were the Rev. J. Bickersteth, rector of Sapeote; Lord Langdale; and the Rev. E. Bickersteth, of Watton. The present Bishop of Ripon is his nephew.—*Liverpool Albion*.

The remains of this much-lamented and highly-esteemed gentleman were interred at St. James's Cemetery. The funeral was largely and respectably attended, and the service was read by the Rev. Dr. M'Neile with touching solemnity and fervour. The pall-bearers were the Lord Bishop of Ripon, the Venerable Archdeacon Bickersteth, the Venerable Archdeacon Hill, and the Venerable Archdeacon Jones, rector of Liverpool. It had been the intention of the members of the Medical Profession in Liverpool to join the procession in Rodney-street, but as the family of the deceased were adverse to any public demonstration, the project was abandoned; they assembled, however, in great force at the cemetery, and formed in line to receive the remains on their arrival, and accompanied the procession to the grave, to testify their respect for the deceased.

BIDWELL, IRSON, Surgeon; in practice prior to 1815; on November 23rd, 1856, at Albrighton, Wolverhampton, after much suffering, aged 71. The whole neighbourhood showed universal respect to his memory.

BLAIR, ROBERT, A.B. and M.B., T.C.D., M.R.C.S., Eng. 1812; on October 19th, at his residence, 20, Regency-square, Brighton, aged 67. The deceased gentleman formerly resided in Great Russell-street, Bloomsbury, but had for some time past retired from practice.

BLANDFORD, T. B., a young English Surgeon, on May 7th, at Naples. It is with sincere regret that we have to relate a melancholy occurrence, which created a considerable sensation amongst the English visitors and residents in Naples. On the evening of Wednesday, the 29th of April, Mr. Blandford left his hotel for a short stroll on the Chiaja. He had not been long out before he was attacked by three men, and received from one of them a severe blow on the head from some blunt instrument, which knocked him to the ground, when he must have been brutally kicked in the abdomen, and sustained the injuries which eventuated in his death. Mr. Roskilly, an English surgeon, was soon in attendance, and dressed the wound in the head. On Saturday he was assisted by Dr. Bishop, and one of the principal surgeons to the Neapolitan Hospital was subsequently called in. He suffered intensely from the pain in the abdomen, and, though all possible means were used for his relief, he was unable to rally, and on Thursday he expired. Mr. Blandford had been a student at Guy's Hospital, and was attached to the Medical Staff stationed at Malta during the Crimean war. He was only

twenty-four years of age, a remarkably fine young man, and, from his gentlemanly manners, a general favourite. His professional testimonials were of the highest character. On Friday, May 8th, his body was conveyed to the Protestant Cemetery, followed by a long *cortège*, which was but an imperfect expression of the profound sympathy which this most melancholy occurrence has excited. The Government have used every possible means for the detection of the parties, and strong hopes are entertained that they will not be suffered to elude the grasp of the law.

BROWN, PATRICK, M.D., Univ. and King's Coll. Aberd. 1850; L.R.C.E. 1828; Surgeon 2nd Warwickshire Militia, on October 14, at Leamington. The lamented deceased was the eldest son of the late Alexander Brown, Esq., of Drumshangan, and grandson of Patrick Brown, Esq., of Barharrow and Gategill, in the Stewartry of Kirkeudbright, and eldest male representative of the ancient family of the Browns of Claghraed, in the parish of Kirkmabreck, in the same stewartry. Samuel, Dr. Brown's great grandfather, was appointed minister of Kirkmabreck in

1701, from whom was descended the late Dr. Thomas Brown, the celebrated metaphysician. The family for generations were remarkable for their great cheerfulness and benevolence of temper. Even to this day their characters are still remembered in that part of the county where they resided, and a cave is still shown where, in the time of the persecutions of Charles the Second, they used every night to leave a supply of provisions for a party of the Covenanters. The deceased obtained his education in one of the most distinguished academies in the South of Scotland, and took a good position in classics; having chosen the Medical Profession as his career, he became in due time apprenticed to the late Mr. Samuel Shorbridge, an eminent Surgeon in Dumfries, where he had ample opportunities of not only seeing general practice, but likewise the practice of the Infirmary. During his apprenticeship he spent his winters in Edinburgh, and devoted himself almost entirely to anatomy and surgery. He became a Member of the College in 1828. Shortly afterwards he was offered an appointment to go out to India as Surgeon, and accepted it; during the voyage he several times showed traits of great coolness and courage, and when he returned was rewarded with a very high testimonial. Ambitious to become a good operative surgeon, he went to Paris, and became a dresser to Dupuytren, in the Hotel Dieu, where he soon became very much respected by the baron for his kindness to the patients, and for his coolness and decision under trying emergencies, he having had charge of a vast number of cases admitted during the revolution of the three days in 1830. Indeed, his family have now in their possession a bullet fired at him by the rebels while attending the wounded at the barricade, which passed through his hair, but without injuring him; he saw the bullet drop, quietly picked it up, and put it into his pocket. Having added to his stock of surgical knowledge he left Paris, and, after some consideration, settled in Whitechurch, Salop, where he rapidly obtained a first class practice, which he retained until he left in 1850. During his residence there the poor were always his friends, and he was always a friend to the poor, who came far and near to have the benefits of his surgical skill. Being an excellent anatomist he was called upon frequently to perform some of the boldest and most delicate operations in surgery; he had a steady hand and a keen eye, was cool and decided in his measures, leaving nothing to chance where life was involved, never sparing himself, night or day, whether his attendance was upon the rich or the poor. His kindness of manner, and scrupulous conscientiousness, endeared him to all classes. He had a keen sense of the honour due by the public to the Profession, whose dignity he upheld by the exemplary discharge of his duties, by his uprightness and integrity, so that when he left the field he carried away with him the esteem and good wishes of the whole district. He graduated at Aberdeen in 1850, and shortly afterwards settled in Leamington, and was appointed Surgeon to the 2nd Warwickshire Militia, an appointment he retained until within a few weeks of his death, which took place on the 14th of October. The respect and esteem in which he was held by the Regiment is ably expressed in the local journals.

CHERMSIDE, T., M.D., at Portaferry, co. Down.

CHRISTIE, JOHN, L.F.P.S. Glasg. 1842; on May 11, at Irvine, Ayrshire, N.B., aged 47.

CHUTE, —, Surgeon, of Tralee, co. Kerry, killed by a fall from his horse in September, 1856.

CLARKE, Sir CHARLES MANSFIELD, M.D., on September 7th, at Brighton, aged 75. The deceased gentleman has left behind him an honourable name, and the respect of many attached friends. As a special practitioner he succeeded at an early period of life, and made a good fortune. His manners were agreeable, and he possessed considerable fluency of expression,—a great enhancement of other social qualities. For many years he held the office of President of the Society for the Relief of Widows and Orphans,—one of the most valuable institutions we possess.

CLARKE, Sir ARTHUR, Knt., A.M. and M.D. St. And. 1803; F.R.C.S. Eng. (Hon.) 1844; M.R.C.S. 1811; on November 9th, at his residence in Dublin. The deceased gentleman was for many years physician to the Bank of Ireland, and to the Metropolitan Police. He was the Author of several successful works "On the Application of Iodine in Tubercular Consumption," to which malady he devoted much of his attention. He died, at the advanced age of 83, of low fever, ending in bronchitis, after a short illness of a week. He was universally respected and esteemed by all who knew him for his amiable and charitable disposition, and is deeply lamented by every member of his family and a numerous circle of friends.

CLAYTON, D. O'R., M.D., at Kiltegan, co. Carlow.

CLEMENT, CHARLES, M.D., Physician to the Civil Hospitals, on May 5th, at Paris.

COLEMAN, JOHN, M.R.C.S. Eng. 1840; L.S.A. 1839; on October 23, at Dover.

COMRIE, PETER, L.R.C.S. Edin. 1812; Half-pay Surgeon R.N.; in May, at Muthill, Perthshire, aged 71.

CONWAY, BERNARD, L.R.C.S. Edin. 1847; L.S.A. 1850; on March 7, at Leicester.

COULTON, JOHN CALTHORP, Surgeon, late of Kingsbridge, Devon, at King's Lynn, Norfolk, on August 1.

COUPER, WILLIAM, M.D., Professor of Natural History in the University of Glasgow, on August 4th, at his residence, Lochbrae Cottage, New Kilpatrick, N.B., aged 70. Dr. Couper had been for some time previous to his decease in feeble health; on the 2nd instant he experienced a severe attack of paralysis, which rendered one of his sides powerless, and completely deprived him of speech, and in this prostrated and sad condition he continued till he expired. Dr. Couper was connected with the University of Glasgow for more than a quarter of a century, and was distinguished not only for his talents as a Professor and a man of learning, but for his polite and gentlemanly demeanour, his mild disposition, and kindliness of heart.

CRADDOCK, CHARLES, M.R.C.S. Eng. 1819; L.S.A. 1818; of 6, Chapel-place, Cavendish-square, London, on November 25th, at the residence of his niece, in Holles-street.

CRAWFORD, WILLIAM, M.D., at Bicton House, Shrewsbury.

CROASDAILE, EDWARD, M.D., on December 31st, 1856, at Boulogne-sur-Mer, aged 76.

CURRAN, —, M.D., on October 2nd, at his residence, Waterloo House, Waterloo-road, Dublin, aged 75.

DAMPIER, NATHANIEL JOHN, F.R.C.S. Eng., on April 26th, at Bryanstone-street, Portman-square, London. The deceased gentleman practised in London as a consulting surgeon a few years ago, but his health gave way, and he took up his residence at Bath, where he hoped to recover, but continuing to decline, he came to town a few days before his death, with the view of obtaining further medical assistance, when he was very suddenly seized with erysipelas, which destroyed life in a few hours. Mr. Dampier was devoted to his profession, and had had considerable experience and success as an operating surgeon. He was educated at Guy's, and was only 36 years of age.

DANIEL, JAMES, Surgeon, at Carrickmacrass, co. Monaghan.

DAVIES, DAVID, Surgeon, at Ruabon, Denbighshire.

DAVIES, GRIFFITH, Surgeon, at Machynlleth, Wales.

DAVIES, JOHN, M.R.C.S. Eng. 1853, L.S.A. 1840; on February 19, of pneumonia, at Coleshill, Warwickshire.

DAVY, EDMUND, F.R.S., Professor of Chemistry to the Royal Dublin Society, on November 5th, at his residence, Kinnag Lodge, co. Dublin, aged 72. Mr. Davy was a native of England, and was cousin to the late Sir Humphry Davy, Bart. The following resolution, in reference to his death, was passed at the first meeting for the session 1857-8, of the Committee of Chemistry of the Royal Dublin Society:—"Resolved,—That this Committee desire to record their deep sense of regret at the death of Mr. Edmund Davy, F.R.S., M.R.I.A., Hon. Mem. R.D.S., who filled the office of Professor of Chemistry to the Society during a period of thirty years, with such credit to himself and benefit to the public. His scientific attainments, his unremitting attention to his public duties, his numerous discoveries in chemistry, his high moral character, in every way adapted him for the position he occupied, and will serve to perpetuate his memory

as an eminent chemist and a successful teacher, as well as one who devoted a lengthened period of his life to the promotion of science."

DAWSON, JOHN, M.R.C.S. Eng. 1834; L.S.A., Union Medical Officer, &c., on January 22nd, at his residence, Tolleshunt D'Arey, Essex, aged 47.

DE MUSSY GUENEAU, —, M.D., lately, at Paris.

DEVINE, BERNARD, L.A.C., at Oldeastle, co. Meath.

DEWSBURY, PETER RICHARD, L.S.A. 1824; at Tring, Herts, in January.

DINHAM, ROBERT, M.R.C.S. Eng. 1842; L.S.A. 1844, at Taunton.

DODS, GEORGE DOUGLAS, Staff Surgeon of H.M. Forces, on August 16th, aged 40.

DONOVAN, RICHARD HUNGERFORD. M.R.C.S. Eng., in November, 1856. at Kilrush, Ireland.

D'ORBIGNY, M. ALCIDE, the eminent naturalist, the celebrated Professor of Palæontology at the Museum d'Histoire Naturelle of Paris, and so well known by his scientific travels in South America, died on June 30, after a long and painful illness.

DOWLING, —, M.D., on May 12th, at Mountmellick, Ireland, after a long illness, aged 50.

DRAYTON, GEORGE B., Surgeon, formerly of Gloucester, on September 19th, at his residence, Ball's Pond-road, Islington, London, aged 72.

DRIVER, THOMAS, M.D., H.E.I.C.S., on January 1st, at Sauchiehall-street, Glasgow.

DUFFY, JOSEPH, Surgeon, at Eagle House, Finglas, co. Dublin.

DUNN, ROBERT, Surgeon, at Heriot-row, Edinburgh, in July, 1856.

DYKES, GEORGE S., M.R.C.S. Eng. 1853; L.S.A. 1854; on October 13th, at Wakefield, aged 25.

EASTWOOD, THOMAS, M.R.C.S. Eng. 1854; L.F.P.S. and L.M. Glasg. 1853; on May 16, at Oldham, aged 29.

EKINS, —, M.D., at Ardee, co. Louth.

ELLIOT. J., M.R.C.S. Eng., and L.S.A. 1823, on July 9th, at Paris-street, Exeter, aged 56.

EVANS, JAMES JOHN, for many years Surgeon in the Government Emigration Service, on January 17th, at Holland-street, Clapham-road, London, aged 41.

EVANS, THOMAS, M.D., at Stockwell Park House, Surrey, on March 1. Dr. Evans was born at Kidwelly, in South Wales, in 1800, and was educated at Trinity College, Dublin. His professional studies were pursued in England, Germany, and France, and he held a successful practice in London for many years. Having married a daughter of Mr. Angell, of Rumsey House, Wilts, and being much occupied of late years in attending to his father-in-law's interests and property, especially in the neighbourhood of Stockwell, he was reluctantly compelled to discontinue his professional practice. He found time, however, for many good and philanthropic works, and rather increased than otherwise his ever-ready exertions to assist many deserving persons whom he knew to be struggling honourably against the difficulties and hardships of life; and these services were to him a source of much delight. Every movement which he believed would contribute to the removal of wrong and the establishment of what is just and right among men, received from him spontaneous and zealous support; and very many of the questions of the day found in him the advantage of an energy and activity, combined with a clear

power of expression, and wit, which he possessed in an eminent degree. He has died respected and regretted by a very large circle of friends, and beloved by a deeply-attached family.

EVEREST, CHARLES E., late Surgeon H.E.I.C.S., Bengal, and Surgeon to the Presidency of Nepaul, on April 2, at 4, Leighton-terrace, Kentish Town.

EYRE, SIR JAMES, M.D. Edin., 1834; L.R.C.P., London, 1836; of Brook-street, suddenly, on June 19, at the residence of a friend in Clapham. Sir James Eyre was born in 1792. His father was a Buckinghamshire clergyman. From 1806 to 1811 he was a pupil of Mr. Davenport, a Surgeon of Harborough. In 1811 he became house pupil of Mr. Phillips, the Surgeon to the Marylebone Infirmary. In 1812 he became House-Surgeon to this Infirmary. He attended the Windmill street School, and St. Bartholomew's, and in 1813 went to Hereford to assist the late Mr. Griffiths. He came to town in 1814 to pass the College of Surgeons, and returned to Hereford to practise as a Surgeon. He married in 1816, worked hard as a Surgeon, was elected a member of the corporation, and in 1829 Mayor of Hereford, his father, then 78 years of age, coming to preach the inauguration sermon. In 1831, on the accession of William IV., an address of congratulation was presented to the sailor king, and the Mayor of Hereford was knighted, the Mayors of Hereford and Liverpool being the only two who received the distinction on that occasion. From 1831 to 1833 Sir James studied medicine afresh in Edinburgh and Paris, and took the degree of M.D. in Edinburgh in 1834. He settled in London in the same year, and was elected Physician-Accoucheur to the St. George's and St. James's Dispensary, which office he filled for seventeen years, when he gave up midwifery practice. He became a licentiate of the College of Physicians in 1836. In 1845 he published his work on "Exhausting Diseases," strongly recommending the use of the oxide of silver. In 1852 his "Stomach and its Difficulties" appeared. For several years past he resided in Brook-street, but he never had an extensive medical practice in London. He attended Her Majesty's *levée* on Thursday, and was quite well until late that evening, but on Friday morning he had gone from among us. The following account of his death is from the daily papers:—On Saturday, June 20, Mr. W. J. Payne, Coroner, held an inquest at the Bowyer Hotel, Clapham, on the body of Sir James Eyre. It appeared that the deceased and his lady were staying at the residence of Mr. Scholey, Lauriston-house, on a visit. On Thursday he had attended the Queen's *levée*, and sat up playing at whist till a quarter before one o'clock on Friday morning, when he remarked, "I think it is time to leave off playing at cards," and went up to bed, his lady having preceded him. He was in no way excited, but was in his usual health. About five o'clock the same morning Lady Eyre's bell rang, and on the servant going up, the deceased was found in the bed by her side, dead. Mr. R. C. Parrott, Surgeon, who was one of the whist party, expressed his conviction that death had resulted from some vessel of the brain having given way. Verdict, "Natural death." It would appear that no post-mortem examination was made.

FALCONER, DAVID, of the Madras Medical Service, on November 8th, at Bath.

FARLEY, NATHANIEL, M.R.C.S. Eng. 1855, Staff Assistant-Surgeon in Crimean Army, &c., and formerly of Clones, Ireland.

FERGUSON, JOHN, Surgeon, H.M. 45th Regiment, on July 26, at Hill Cottage, Irvine, Ayrshire, aged 77.

FIELD, F., Surgeon, at Newhall-street, Birmingham.

FIFE, GEORGE, M.D. and L.R.C.S. Edin. 1827, Physician and Professor of Clinical Medicine, Materia Medica, and Therapeutics at Queen's College, Birmingham, &c., on May 10th, in London, aged 50. The deceased gentleman had lately been residing in London, and had suffered from considerable nervous excitement and loss of sleep, to allay which he had procured some solution of morphia, of which, it is supposed, he took too large a dose, for he was found dead in his bed. An inquest was held on the following Monday, at the Spotted Dog, in the Strand, by Mr. Payne, and the jury returned a verdict, "That the deceased died from an overdose of morphia, he being at the time in a state of intoxication, but that he had no intention of wilfully destroying his life."

FISKE, SAMUEL, Surgeon, lately, at Saffron Walden. "Mr. Fiske was formerly in good practice in partnership with his brother, but had retired for some years, except that he continued to visit gratuitously many of his former poorer patients and their families. He had served the office of mayor six times, and was an active and impartial magistrate. He was one of the originators of the Saffron Walden Horticultural Society, and performed the duties of its Secretaryship, from its formation in 1819, to the time of his decease. At his interment the members of the Corporation attended, and the Council followed in procession through the town. Every mark of respect to the memory of the deceased was paid by the residents, and at a late hour of the night the Saffron Walden loyal band performed the 'Dead March' in the Market place."

FORSYTH, GEORGE, M.D. and C.M. Glasg. 1813; at Carriekfergus, co. Antrim, where he had held several appointments for a considerable time prior to his decease.

FRECKLETON, GEORGE, M.D., late of Liverpool, on November 3rd, at Cheltenham, aged 65.

FREER, JOHN, M.D. and L.R.C.S. Edin. 1809; formerly Assistant-Surgeon of the Royal North British Fusiliers and Rifle Brigade at Waterloo, died at Sutton Coldfield, Warwickshire.

FULLARTON, ROBERT, Surgeon, at Edinburgh.

FURNESS, THOMAS ALBASON, F.R.C.S., Eng. 1854; M.R.C.S. 1839, Surgeon to the Newcastle Dispensary, and Lecturer on Anatomy and Operative Surgery at the College of Practical Science, on May 18, at Newcastle.

GALWEY, ST. JOHN, M.D. Edin. 1801, M.R.C.S. Eng.; Physician to the Cork County Infirmary, on February 25, at Mallow, Co. Cork.

GARBETT, CHRISTOPHER, Acting Superintending Surgeon, at Cawn-pore, from wounds, after one day's suffering, aged 52.

GARDNER, JOHN, M.D. Glasg. 1836; L.F.P.S. Glasg. 1841; Fell. 1851; on June 23, at his residence, 141, George-street, Glasgow, aged 53. He was a man of sterling worth and most amiable disposition, extensively known and highly esteemed by his professional brethren, and a large circle of friends.

GARNER, HARTWELL, M.D., of the 12th Irregular Cavalry, with SUSAN, his wife, and one of their children, massacred at Segowlic, on July 23rd.

GASQUET, RAYMOND, M.R.C.S. Eng. 1811; at 26, Euston-place, London.

GEOFFROY, Dr., of Avignon, and Chief Physician of the Asylum at Vaucluse, was killed by a patient during a visit he paid to him. An epi-

leptic patient, concerning whom no distrust whatever was felt, inasmuch as he was mild and obedient during the lucid intervals, and manifested great attachment to M. Geoffroy, complained to him of a pain in his leg. While the Physician was stooping down to examine the part, the wretched man plunged a pair of strong scissors (he being a tailor by trade), that he had in his hand, into his side. Death speedily followed. M. Geoffroy, a person of considerable wealth, attended the Asylum out of pure benevolence, and has died universally deplored.

GEPP, GEORGE ASSER, F.R.C.S. Eng. 1844; M.R.C.S.; Senior M.S.A., &c. &c., and fifty-seven years Surgeon to the Gaol and House of Correction at Springfield, on December 11th, at Chelmsford, aged 88.

GILL, WILLIAM GEORGE, M.R.C.S. Eng. 1847; L.S.A. 1842; at his residence, York-place, Islington-green, London, at the early age of 32 years, of phthisis pulmonalis. The success which attended his short professional career demands more than a passing notice, for it rarely falls to our lot to record similar gratifying results in our hard-worked but ill-paid Profession. The deceased was the eldest son of Mr W. Seth Gill, of White Lion street, Pentonville, a gentlemen well known as a most successful practitioner in medicine. He was educated at King's College Hospital, and won the esteem of his teachers by his industry and diligence. He obtained the diploma of the College of Surgeons in 1847, and the licence of the Hall in 1852; he gained several parochial and other appointments, which he held with credit to himself and benefit to those entrusted to his charge. Some months since failing health obliged him to take a partner, Dr. Bradford, to assist in the arduous duties of his extensive practice. Amongst other legacies, we hear that he has bequeathed 100*l.* to the Medical Benevolent College, and 100*l.* to the poor of Islington. Mr. Gill died respected and esteemed by all who knew him.

GILTHORPE, JOHN, Surgeon, in practice prior to 1815, at Nottingham, aged 75.

GLANVILLE, JOHN, M.R.C.S. Eng. 1805, at Wedmore, Somerset.

GLASSON, GEORGE, M.D., at Devonport.

GOLDSTONE, GEORGE, M.R.C.S. Eng. 1815. on December 24th, 1856, at the Royal Medical Benevolent College, Epsom.

GORDON, JOHN, Surgeon, at Bradford, Yorkshire.

GORDON, ROBERT H., F.R.C.S.I. 1845; L.R.C.S. 1835; on September 16, at Castledawson, co. Londonderry.

GOYDER, CHARLES S., M.D., formerly Resident Physician of the Gate Helmsley Lunatic Asylum, on December 12th, at Spofforth, Wetherby, Yorkshire, aged 28, highly respected

GRANT, GEORGE, M.D. Edin. 1824; L.R.C.S. Edin. 1811; Surgeon R.N. 1813; on April 4th, at Richmond-hill, Surrey, aged 65.

GRAY, JAMES B., A.M., M.D., Principal of Berwick College, Maine, U.S., &c., formerly of Chelmsford, Essex, on November 1, of typhus fever, aged 39.

GRIFFITH, —., M.D., at Builth, Breconshire, in July.

GREIG, JOHN, Surgeon, at 84, Crown-street, Aberdeen.

GRUGGEN, H. M., M.D. St. Andrew's, 1845; M.R.C.S. Eng. and L.S.A. 1844, on May 20, at Chichester. Dr. Gruggen was discovered in his dressing-room, lying on the floor before his dressing-table, his hand still grasping the razor, which he appeared to be in the act of using, when the seizure, which deprived him of life, took place. Death appears to have been almost instautaneous. Dr. Gruggen had an extensive prac-

tiee, and was much respected, not only in his professional capacity, but also in private circles.

HAINSWORTH, CHARLES, L.S.A. 1821, on October 9th, after a long and painful illness, aged 58.

HALL, MARSHALL, M.D. Edin. 1812; F.R.C.P. 1841; F.R.S., &c.; on August 11th, aged 67. The deceased gentleman had long been suffering from stricture of the œsophagus, accompanied by malignant ulceration. All remedial measures were unavailing, and he died eventually of exhaustion at Brighton, whither he had removed. From his entrance into the Profession Dr. M. Hall devoted himself with sedulous zeal to the cultivation of its scientific branches, and he has left traces of his great ability in several departments of study. In Dr. Marshall Hall the Medical Profession has lost one of the most distinguished Physicians of the present day, and science one of its brightest ornaments. As an original investigator, Dr. Marshall Hall is entitled to the highest praise, and his physiological researches place him in the same category with Harvey, Hunter, and Sir Charles Bell. Since the great truth developed by Sir Charles Bell, demonstrating the compound nature of the spinal nerves, no greater physiological discovery has occupied the scientific and medical world than the theory of the reflex function of the nerves by Dr. Marshall Hall; and his name will be handed down to posterity as one of the most successful investigators of the phenomena of nervous action. Not only is the theory of the reflex function to be regarded as an important physiological truth, but it has led to the most valuable practical results in the diagnosis and treatment of disease; and many vital operations, both healthy and morbid, formerly inexplicable, now receive a satisfactory explanation in consequence of Dr. Hall's researches. It is to be regretted that the character of a man to whom science owes so much should have been obscured by peculiarities of temper and disposition, bringing down upon him from many quarters feelings of animosity which must have embittered some of the best days of his life, and which led to personal consequences unbecoming a philosopher.

HAMILTON, JOHN, M.D. Glasg. 1835; F.R.C.S.I. 1844; M.R.C.S. Eng. 1829; L.M. Dub. 1828; Surgeon to the Union Workhouse, &c.; in January, at Omagh, Ireland.

HAMILTON, SAMUEL, L.R.C.S. Edin. 1814; Medical Officer of the Workington District, Coekermouth Union; formerly Surgeon to the Workington Dispensary; Author of a pamphlet on "Asiatic Cholera." Mr. Hamilton died very suddenly, on December 6th, a martyr to the slavery of the Poor-law system, having been on his feet four days and nights in succession. His age was 64.

HARPER, CHARLES HARRIS, Assistant-Surgeon H.E.I.C.S., Madras establishment, drowned at Sitang, Moulmein, on July 1st.

HARRIS, HORATIO PHILIP, Assistant-Surgeon H.E.I.C.S., Civil Surgeon, &c., killed by the rebels at Cawnpore, aged 33; and, aged 31, MYRA, wife of the above-named gentleman.

HARWOOD, THOMAS, M.R.C.S. Eng. 1833; L.S.A. 1834; at Kirton, Boston, Lincolnshire.

HAY, JOHN MACDOUALL, M.D., Civil Surgeon, Bareilly Station, East Indies, killed at Bareilly on May 31st.

HAYCRAFT, WILLIAM TUTIN, M.D. Edin.; L.R.C.P.; Physician to the Royal Kent Dispensary, &c., in 1856, at Greenwich, Kent.

HAYDEN, GEORGE THOMAS, M.B. and A.B., T.C.D. 1834; L.R.C.S.I. 1826; Surgeon to the Anglesey Hosp; late Lecturer on Anatomy, Phy-

siology, and Surgery at the Original School of Medicine, Peter-street, &c., on July 30, at 82, Hareourt-street, Dublin. The deceased was Author of several works and papers.

HAYES, HENRY, Surgeon, at Timoleague, co. Cork.

HEATHCOTE, T. GODFREY, Esq., Surgeon 10th Regiment Bengal Native Infantry, massacred at Cawnpore, on July 15th; also, GERTRUDE, his wife, and their two youngest children.

HEPWORTH, WILLIAM, Surgeon, at Morley, Leeds.

HEWITSON, B. W., M.D., F.R.C.S., Deputy Inspector-General of Hospitals, on March 15, at Redhill, aged 69.

HISLOP, WILLIAM, L.R.C.S. Edin. 1853, on April 30, at Greenlaw, Berwickshire.

HODDING, WILLIAM HENRY, M.R.C.S. Eng. and L.S.A. 1826; at 84, Gloucester-place, Portman-square, London, in November, 1856.

HODGSON, W., Surgeon, on May 15th, at Hull.

HOLLAND, J., Surgeon, on September 11th, at Chesterfield, aged 40. In him the Medical Profession has lost one of the stars from its banner, and society one of its brightest ornaments. At once the devoted student and the accomplished surgeon, the provincial circle in which he lived and moved and practised had not yet learned his true value, when he is lost to it for ever. Adorned with every manly virtue, with a heart overflowed with all the kindly feelings of our better nature, cut off thus prematurely in the prime of life, and in the midst of professional prosperity, how deeply his early death is felt as a local public loss may be judged by the number of sorrowing relatives, and friends and professional brethren, and processions of Freemasons and Oddfellows which attended his remains to the grave.

HOLMES, GEORGE SMYTH, M.D. Glasg. 1847; L.R.C.S. Edin. 1847, &c., on September 13th, at his residence, Glenarm, co. Antrim.

HOLMES, JAMES ROBINS, M.R.C.S. Eng. and L.S.A. 1826, of Kidlington, Oxon., on September 3rd, aged 53.

HOME, GEORGE, Staff-Surgeon, on September 28th, at York.

HOSKEN, R., M.R.C.S. Eng. 1833; Surgeon 2nd Battalion Light Cavalry, H.E.I.C.S., on November 30th, 1856, at Nusseerabad.

HOWELL, JOHN, Deputy Inspector-General of Military Hospitals, on May 28th, at Palermo, Sicily, aged 79.

HUGHES, RICHARD, Surgeon, of Nantwich, Cheshire, on February 1st, aged 62.

HUME, JOHN ROBERT, M.D., St Andrew's 1816; C.B. and one of H.M.'s Commissioners in Lunacy, and for many years private physician to the late Duke of Wellington, on March 1st, at his residence, 9, Curzon-street, May-fair, London, aged 75.

HUNT, MARRIOTT, M.R.C.S., of Milner-street, Chelsea, on August 13th, aged 57. The deceased was son of the late John Hunt, founder of the *Examiner*.

HUNTER, MICHAEL, M.D. Glasg. 1842; L.R.C.S. Edin. 1842; formerly of Newtownlimavady, Ireland, and late of Melbourne, New South Wales, in the Hospital of which place he died in May last.

HUNTLEY, GEORGE HASSAL, L.S.A. 1843; on June 17th, at Howden. It is the lot of only few to pass to the grave whose memory will be held in greater esteem than that of the late Mr. Huntley, of Howden Pans. He and his father had practised in the parish of Wallseid, for upwards of eighty years, as surgeons. The deceased was a native of the village, in which his name will long be cherished as the friend of the

poor and needy. In his professional capacity Mr. Huntley displayed more than average ability, which was fully recognised in the district in which he spent his useful life. He was well known as an expert and successful operator in cases of accident, and holding colliery and other extensive appointments his talent was frequently put to the test; his opinion and aid was frequently sought in different cases by his professional brethren, and his judgment very often guided their operations.

IRVINE, JOHN, M.R.C.S. Eng. 1807; Surgeon R.N. 1803; for many years District and Admiralty Surgeon and Agent, on July 3, at Rosebank, Moville, Ireland, aged 72.

JACQUET, FELIX, French Military Surgeon, from pneumonia, aged 38.

JEFFREY, WILLIAM, M.D., on July 3rd, at Paisley, N.B.

JESTON, THOMAS, M.R.C.S. Eng. and L.S.A. 1848; District Union Medical Officer, of Nettlebed, Oxon., on November 24th, at the residence of his father, Henley-on-Thames.

JOHNSON, SAMUEL, M.D., on June 11th, at Foxley House, Redditch.

JOHNSTON, ALEXANDER, Surgeon, on September 25th, at Stirling, N.B.

JOHNSTONE, JOHN, M.D. and L.R.C.S. Edin. 1838; Assistant-Surgeon Royal North Devonshire Militia, &c., formerly of Newtonards, co. Down, from which place he emigrated, and has since died.

JONES, EVAN, L.S.A. 1828; at Machynlleth, Montgomeryshire.

JONES, SAMUEL, JEMSON, Surgeon, in practice prior to 1815; on April 14, at his residence, Farthingstone, Weedon, Northamptonshire, aged 61.

JOSEPH, EDWARD, M.R.C.S. Eng. and L.S.A. 1832, on March 7th, after three months' great suffering, at his residence, 41, Manchester-street, London, aged 52.

JUKES, FREDERICK, M.R.C.S. Eng. 1819, L.S.A. 1820, on September 12th, at Birmingham, aged 61.

KANE, —, M.D. Pennsylvania 1843. This gallant, enterprising Arctic explorer, died lately at the Havanas. He was born at Philadelphia in 1822; took his degree of Doctor of Medicine at the University of Pennsylvania in 1843, and soon after went to China, as Surgeon to the American embassy. After exploring the Philippines, traversing India, visiting Ceylon and Egypt, suffering from the plague, he returned to America. He then visited the West Coast of Africa, suffered from the remittent fever of the country. He then served in the Mexican war, and afterwards in the first American expedition in search of Franklin. The history of his last Arctic expedition, and his rescue on the coast of Greenland, will be fresh in the recollection of our readers. His voyage to England, and his last illness, followed rapidly on each other, and an eventful life was closed at the early age of 35."

KEATE, ROBERT, Serjeant-Surgeon to Her Majesty, &c., on October 2nd, at his residence, Hertford-street, May-fair, aged 80. Dr. Keate was a good surgeon, and a frank, honest, hearty, straightforward man. As a specimen of the rough, manly Englishman, he was thorough. In the prime of his days he was much liked by the students of St. George's, who respected him for his candid and homely bearing.

KELLY, THOMAS KNOX, M.R.C.S. Eng. 1840; L.S.A. 1848; L.M. Dub.; on March 26th, at 19, Addington-place, Camberwell.

LANGLEY, FREDERICK, L.S.A.; District Medical Officer of the Bingham Union, Nottingham.

LANGSTAFF, JOSEPH, Esq., F.R.C.S., of the Hon. East India Company's Medical Service, on December 6, 1856, of apoplexy, in his 79th year, at his residence, 9, Cambridge-square. Mr. Langstaff obtained his Commission in 1799, left for India the same year, and remained in the East until the end of 1839. During the forty years which he thus passed in active service in India he proved a valuable and energetic public officer, and passed through all the grades of the Medical Service, terminating his public career as President of the Medical Board of Calcutta. In this lengthened period Mr. Langstaff took a part, as an esteemed and valued Medical Officer, in many of the important events which characterise Indian history during the first half of the present century. He was the Medical attendant attached to Lord Metcalfe's Embassy to Rungeet Singh, from whom he personally received many evidences of esteem. He was also attached to the Marquis of Hastings' Army in the Maharatta Campaign in 1817, when the cholera made its first appearance. He retained to the last a vivid recollection of all the circumstances connected with the origin of this pestilence, which has since then devastated the universe. Mr. Langstaff returned to his native country in the possession of good health, and has lived many years to enjoy his hard-earned honours in the bosom of his family. At his death he was, we believe, the oldest medical officer of the Bengal Presidency. Mr. Langstaff was the father-in-law of Dr. Henry Bennet, of Grosvenor-street.

LANGSTON, —, Surgeon, at Cross-street, St. George's East, London.

LA THANGUE, ROBERT, Surgeon, in practice prior to 1815; in February, at his residence, 1, King David-lane, Shadwell, London.

LEWIS, JOSEPH, M.R.C.S. Eng. 1845; at Machynlleth, Montgomeryshire.

LINDSAY, WILLIAM, M.D., Senior Medical Inspector, on December 13, at the Royal Hospital, Haslar, aged 57.

LITHGOW, ANDREW, M.R.C.S. Eng. 1811; Surgeon R.N.; Consulting Surgeon to the Royal Infirmary and Eye Infirmary, Weymouth, on December 30, 1856.

LLOYD, ROWLAND, M.R.C.S. Eng. 1845; L.S.A. 1846, at Dolgelly, Merionethshire.

LOMAS, THOMAS, L.S.A. 1827, on September 10th, after a long and painful illness, at his residence, Belper, Derbyshire, aged 54.

LONG, WILLIAM HARRIS, M.R.C.S. Eng. 1834; Senior Surgeon to the Swansea Infirmary, on August 6, at Nicholaston, Gower.

LONSDALE, EDWARD F., F.R.C.S. Eng. (Hon.) 1843; M.R.C.S. Eng. 1834; suddenly at his residence, Montague-street, Russell-square, on the afternoon of September 11th. He had suspected the existence of heart disease for some time, and a few months since he consulted an eminent Physician, who examined him carefully, and considered that his symptoms depended upon derangement of the stomach. He had occasional pain and uneasiness in the region of the heart and stomach, and he complained sometimes of giddiness. On Wednesday week he went round the Orthopædic Hospital with one of his colleagues, and complained several times of a sharp, catching pain, which he thought might be due to muscular rheumatism. He remarked that the pain seemed to affect his diaphragm and some of the muscles of respiration. He said, in a half-serious manner, "The fact is, I have got disease of the heart." The evening before his death he brought up a considerable quantity of blood, having previously suffered from slight hæmoptysis two or three months ago. On the morning of the 11th inst., he sent for his friend Dr. G. O. Rees, but was well enough to sit up in his room, though he did not see any patients. Dr. Rees called about one o'clock, and while conversing with Mr. Lonsdale, the latter unfortunate gentleman suddenly brought up an immense quantity of blood, and instantly expired. Mr. Lonsdale was a thoroughly good surgeon, a most sincere and warm-hearted friend, and a strictly honourable and upright man, of high independent spirit. These characteristics were always conspicuous both in his private and professional relations. To the patients of the hospital he was extremely kind and attentive. By his death society has lost an amiable man, and the Profession an honourable and distinguished member. At the time of his death he held the appointments of surgeon to the Orthopædic Hospital and to the Artists' Benevolent Fund. He was the Author of a "Treatise on Fractures," which was his best production. His "Observations on the Treatment of Lateral Curvature of the Spine" also exhibited abilities of a very high order. He also published some lectures a few years since in the *Medical Gazette* and his other contributions to the Medical Journals evinced the ardour with which he pursued his Profession.

LORIMER, GORDON, late of Medical Staff H.E.I.C.S. St. Helena, on October 4, at St. John-street, Chichester, aged 67.

LUTLEY, ROBERT E., M.R.C.S. Eng., and L.S.A. 1843; at Stogursey, Somerset.

MCARDLE, EDWARD, F.R.C.S.I., at Ardee, co. Louth.

MACAULAY, —, M.D., Surgeon to H.M.'s 40th Reg., on October 30th, 1856, at Melbourne, Australia. The circumstances attending the decease of Dr. Macaulay were of a most painful character. We are informed that after an inspection of troops by the Governor, between twelve and one o'clock, Ensign Pennefather rushed out of his room with a six-barreled revolver in his hand, and meeting Ensign Keith, he presented and fired at him, the ball passing through his cheek and out at the back of his neck. At this time Dr. Macaulay was seated in a chair on the grass in front of his quarters, reading. The doctor was an invalid, from an accident. Pennefather ran to where Dr. Macaulay was sitting, and placing the pistol on the doctor's mouth, he fired, and the ball passed out at the back of his neck. The murderer then placed the pistol to his own head and fired, the ball entering his right temple. Dr. Macaulay died in his chair after one or two ineffectual attempts to speak or respire. Evidence was conclusive as to the insanity of Pennefather.

McBRYDE, —, Surgeon, at Kirkmaiden, Wigtown, N.B.

MITCHELL, —, M.D., on December 22nd, at Carisbrook, Isle of Wight. The deceased gentleman assisted at the post-mortem examination of Napoleon Bonaparte.

MOFFAT, WILLIAM, Army Surgeon, 1808; at 4 Woodland's-road, Glasgow, aged 74. Mr. Moffat served with the 48th Regiment in the Peninsula as assistant-surgeon from the year 1800 to the close of hostilities, and the return of his regiment to Britain. He had nine clasps for Talavera, Albuera, Badajos, Salamanca, Vittoria, Pyrenees, Nivelle, Orthes, and Toulouse. He retired from the army in 1815, and has ever since practised medicine in this city. He was a man of singularly mild and unobtrusive manners, and remarkable for the simplicity and truthfulness of his character. He was also a most consistent Christian, anxious at all times to show that there was a perfect harmony between his religious professions and his personal conduct. For more than thirty years he was a leading member of the Baptist Church, in which he filled the office of a deacon; and wherever he was known he was esteemed for his unostentatious but manly nature, and his kindly disposition.—*Glasgow Courier*.

OFFICER, ALEXANDER, L.R.C.S. Edin. 1823; L.A.C. Dublin. 1828; on June 8, at 73, York-street, Belfast, aged 53.

OGLE, JAMES ADEY, Regius Professor of Medicine at Oxford University, &c., on September 25th, at Old Shoreham, Sussex, after an illness of only thirty hours, aged 64. Dr. Ogle was a Fellow of the Royal Society and of the Royal College of Physicians of England, and at the time of his death held the honourable offices of Regius Professor of Medicine at Oxford, together with the Aldrichian Professorships of Medicine and Anatomy, and the Clinical Professorship attached to the Radcliffe In-

mary, to which he was the Senior Physician. The deceased was a member of Trinity College at Oxford. He took a first class in Mathematics in the year 1813, and became Batchelor of Medicine in 1817. In 1820 he graduated as M.D., and in 1824 was elected a Physician to the Radcliffe Infirmary and Aldrichian Professor of Medicine. He was for one term Mathematical Examiner in 1825. The Clinical Professorship being vacant in 1830, he was appointed to it by convocation; and in 1851, on the death of Dr. Kidd, he was selected to be Regius Professor of Medicine by Lord John Russell's Government, that office carrying with it the Anatomical Chair of the University. As Clinical Professor, Dr. Ogle gave clinical instruction for many years at the Radcliffe Infirmary. His style was graphic and energetic: his views of medicine sagacious and sound. He was greatly esteemed by his medical brethren, not more for his upright bearing and hearty frankness, than for his undeviating courtesy and kindness, even to an opponent from whose views he dissented. On his good nature, fairness, and justice, according to his opinion, all could always reckon. In early life he lectured on comparative anatomy; and on his appointment to the Regius Professorship of Medicine, which then unhappily had attached to it by statute the Anatomical Chair, his sense of duty led him to lecture again on anatomy and physiology, though with the scanty means the University afforded him; for, as many readers know, the Anatomical Museum at Christ Church is a private, not a university collection. In the same spirit he undertook the office of Examiner in the New Natural Science School in its second year, and performed the task—no light one—with his usual energy, the examination comprising such works as Owen's Homologies. The University of Oxford has gone through many changes within the last ten years, and in none more than in the development of its scientific resources. Though Dr. Ogle watched rather than led these movements, his opinions were extensively sought and valued. His loss is, therefore, deeply felt in the circle—no small one—in which he lived.

OLIVER, JAMES WATSON, L.S.A. 1845, on September 5th, at Stilton, Hants.

OLMSTED, J. H., M.D., of Staten Island, New York, on November 24, at Nice, Italy, aged 32.

RADNOR, WILLIAM, M.R.C.S. Eng. 1823; L.S.A. 1822; late of Surrey-street, Strand, and Herne Bay, Kent, on March 16th, at 27, Little-chau, Strasse, Dresden, of paralysis of the lungs, aged 56. The deceased gentleman was formerly Surgeon to the St. Clement's Danes Workhouse, and was struck by lightning in 1835, in Arundel-street, Strand, while attending a patient; apoplexy and paralysis ensued, from which he never sufficiently recovered to enable him to resume his professional duties. Mr. Radnor was educated at Harrow School; he was an excellent classical scholar, his mind was stored with varied and general information; he was an acute observer and a bold practitioner; as an Accoucheur he obtained much celebrity.

RAINFORTH, JOHN, Surgeon, on June, 7th, at School-hill, Bolton, aged 78.

RANDALL, J. MAYOR, M. and L.S.A.; at Farnham, Surrey.

RAYNER, JOHN, F.R.C.S. Eng. (Hon.) 1844; M.R.C.S. 1830; L.S.A. 1829; Surgeon to the Stockport Infirmary, Dispensary, and Fever Wards, on April 29, at Stockport, Cheshire.

REES, GEORGE AUGUSTUS, M.D. Lond. 1844; M.R.C.S. Eng. 1835; L.S.A. 1834; at his residence, 45, Finsbury-square. The deceased gentleman was Author of Treatise "On the Diseases of Children;" Essay on "Atalektasis Pulmonium."

REYNOLDS, PETER, Surgeon, at Kilbeggan, Ireland.

RICHMOND, JOHN, late Superintending-Surgeon H.E.I.C.S., at Madras, on August 8, at Dover, aged 54.

RIPLEY, RICHARD, Surgeon, in practice prior to 1815; at Whitby, Yorkshire, in December 1856.

ROBERTSON, DONALD, Surgeon, at Dunkeld, N.B., on April 22

ROBERTSON, JOHN, M.D., Inspector-General of Hospitals, on July 13th, at Madrid.

ROBERTSON, THOMAS STORM, M.D., St Andrews 1844; Giessen, 1842; M.R.C.S. Eng. 1832; F.R.C.S. 1845; L.S.A. 1831; on the 6th of

August, at Assembly-row, Mile-end, aged 48. The deceased had latterly complained of severe pains in the head, and inability to sleep. He had been much excited and harassed in attending a medical friend. On the night of August 5th, he went to bed as usual, and on the next morning he was found dead in bed. A bottle containing hydrocyanic acid was found on his dressing-table. Mr. Wells, surgeon, stated the result of a post-mortem examination he had made. The jury returned the subjoined verdict:—"That Thomas Storm Robertson was found dead in bed, and on a post-mortem examination of his body, his death appeared to have occurred from a congestion of the vessels of his body, caused by an over-dose of hydrocyanic acid taken as a sedative to procure relief from violent headache and sickness, and not with any intention to destroy life." The deceased was highly respected in the Profession, and was a clever anatomist.

ROBINSON, CHARLES, L.S.A. 1834, on May 2, at Middleham, Yorkshire, aged 44.

ROBINSON, WILLIAM, M.D. and L.R.C.S. Edin. 1842, at Hayton, Carlisle.

Mr. Ryland was a Jacksonian Prize man, and the Author of a valuable Treatise on the Diseases and Injuries of the Larynx and Trachea; he died much esteemed and respected by his professional brethren, who admired his high sense of honour and independence of character no less than his mental cultivation and social disposition. In his bosom neither guile nor deceit had a residence.

SALLE, —, M.D., of Nancy. The lamented deceased was completing the operation of tracheotomy, which he had undertaken upon a child suffering from putrid sore-throat. Dr. Salle, who was only twenty-nine years of age, seeing the trachea quickly filling with blood, put his lips to the wound, and drew by inspiration the fluid which was ready to choke the child. The next day, the same putrid state of the fauces and the tonsils appeared in M. Salle, and forty-eight hours afterwards he died, in spite of the efforts made by his colleagues to save the life of their noble-minded friend.

SALMON, WILLIAM ABRAHAM, M.R.C.S. Eng. 1847; L.S.A. 1846; at Wedmore, Wells, Somerset.

SALTER, JOHN MITCHELL, L.S.A. 1817 ; on March 7, after a long illness, at Stourpaine, Blandford, Dorset.

SAUNDERS, EBENEZER, M.R.C.S. Eng. 1828 ; L.S.A. 1826 ; on March 30, at his Villa, Chatteris, Cambs., aged 53. The deceased gentleman was a native of Romsey, Huntingdonshire, where his father was a highly respectable farmer and landowner. At an early age he was articled to George Girling, Esq., M.R.C.S. (now of St. Ives, Hunts), then practising at Chatteris, and, at the conclusion of his medical education, succeeded Mr. Girling, at Chatteris, in 1826. For nearly 20 years he engrossed the whole of the respectable practice of the district. At the end of that time, about 12 years since, in returning from a neighboring village, he was suddenly attacked by symptoms of amaurosis, so violent in their first onset that he could scarcely see to drive himself home. His sight improved for a time, but gradually failed again to such an extent as to necessitate his retirement from practice. During the last few years of his life, he at intervals passed large quantities of urinary calculi. His sufferings during these attacks were most excruciating, till at length his naturally robust frame became unequal to the contest with the dire malady. Mr. Saunders was a most painstaking and laborious practitioner ; he was unobtrusive and unostentatious in his character, and unremitting in his perseverance in the discharge of his professional duties. He was thoroughly devoted to his patients, and in several instances which fell under the notice of the writer, lives valuable to the community were undoubtedly saved (under the Divine blessing), through his patient and unremitting attention. He was no noisy babbler in medical matters, but one of those who carefully, hour by hour, and day by day, in those lingering cases which so try the patience of the practitioner, watched the sufferer, prepared at every turn to grapple with the foe, and if possible, to expel him. He was one of those who required to be well-known to be appreciated. His afflictions by drawing him into retirement had rendered him somewhat misanthropic, and to the stranger his manner might appear to be forbidding, but to those who knew him well it was very different. The writer only became *intimately* acquainted with him at the commencement of his last illness, and was much surprised at the great natural powers of his mind, and the depth and extent of his professional knowledge. Though for years shut out from the world of literature, yet he was by no means behind his more fortunate brethren. His practical experience, matured by sound judgment, rendered his opinion of great value, and his loss will be deeply felt by a large circle, whom he benefited by years of services which they felt no pecuniary recompence could repay.

SAYLE, GEORGE, M.R.C.S. Eng. and L.S.A. 1843 ; on April 7, after an illness of five days, from laryngitis, aged 35. He had been in a precarious state of health with bronze disease for some time, but his lately improved condition and aptitude for exertion led his friends and himself to believe that he might eventually recover. He was Surgeon to the West Norfolk and Lynn Hospital ; Coroner for the West Norfolk District, and one of the Town Council of the borough. He was an ardent sanitary reformer, but a warm Conservative in politics, and took much interest in public business, in which he showed considerable ability ; and though somewhat given to egotize, and occasionally warm and abrupt, he was a ready orator, and his firmness, fearlessness, and independence gained him many friends and admirers, as was shown by his invariable

return by large majorities when opposed in the Middle Ward, which he represented for upwards of eight years.

SCHWEIGGER, Professor, recently died at Halle, at the University of which place he long held the Professorship of Physics. His discoveries in Electrical Crystallization gave him a world-wide celebrity, and the electro-magnetic multiplier, which he invented, still bears his name. He was born at Erlangen in 1779, at which place he first engaged in teaching, and afterwards at Nuremburgh. Since 1819 he filled a Professor's chair at Halle. The 'Journal für Physik und Chemie,' of which he was the editor, became one of the most important journals published in Germany relating to natural science, and it will long continue a valuable repertory of the discoveries made in chemistry and physics during the period of its career. The idea of establishing the annual meetings of German Naturalists and Physicians (since imitated in our own British Association for the Advancement of Science) first originated with Schweigger, and was carried out by Oken.

SCOTT, EDWARD JOHN, M.D. Edin. 1834; M.R.C.S. Eng. 1832, Senior Medical Officer of the Royal Portsmouth Hospital and South-East Hants Eye Infirmary, &c., on May 4, at Portland Lodge, Southsea, aged 44. He was a gentleman as much distinguished for his great professional talent, as he was beloved by all who knew him, for his kindness and benevolence of character. A strong love of his profession led to unusually early success. He performed the operation of lithotomy upwards of twenty times unfollowed by a single death. He also performed other operations with a like favourable result—amputation at the shoulder joint, laryngotomy, tracheotomy, &c. &c. He was well known as the senior medical officer of the Royal Portsmouth, Portsea, and Gosport Hospital, an institution in which he took the deepest interest, and which through his talent rapidly rose to prosperity and eminence. Dr. Scott won the respect and confidence of his richer patients to an unusual degree, while he gained their affectionate regard; but it is the wailing of the poor that will proclaim how full of generous sympathy for their sufferings was his great heart, only too sensitive for the happiness of its possessor.

SCUDAMORE, J. T., Surgeon, in practice prior to 1815; in October, at 26, Castle-street, Canterbury.

SEDGWICK, ROGER, M.R.C.S. Eng. 1812; on April 2nd, at Borough-bridge, Yorkshire, aged 65.

SEDGWICK, WALTER MURRAY, M.R.C.S., on May 2, at his residence, Pasha, Antigua, aged 28. The deceased was a son of Dr. S. SEDGWICK.

SEMPLE, WILLIAM, M.R.C.S. Eng. 1827; L.S.A. 1818; on September 26, at 38 Upper-street, Islington.

SHAW, JONATHAN, L.S.A., on July 3, at Hyde, aged 39.

SHEPPARD, JAMES, M.D. Aberdeen; at Stonehouse, Devon.

SIMONS, JOHN, M.R.C.S. Eng. and L.S.A. 1843; on January 20, at Birmingham, aged 46. Mr. Simons, by industry and patient perseverance in well-doing, had just gained for himself, under great and long continued difficulties, a remunerative practice. He was cut off in the prime of life, after a short illness, by typhus fever, caught in the exemplary performance of his arduous duties as Medical Officer of the Parish.

SIMONS, WILLIAM, Surgeon, in practice prior to 1815; at Harpenden, Herts.

SIMPSON, CHARLES, M.R.C.S. Eng. and L.S.A. 1838; Surgeon to

the Stamford and Rutland Infirmary, Borough Gaol, and two Union Districts, on March 31, at Stamford, aged 45.

SIMPSON, JAMES, Surgeon-Dentist, son of the late JAMES SIMPSON, of 53, Strand, on September 8, at Maidstone, aged 46.

SINCLAIR, ROBERT, C.M. Glasg. 1831; on July 9, at Port Charlotte, Islay, N.B.

SINGLETON, SAMUEL, M.R.C.S. Eng. 1843; L.S.A. 1843; at Fore-street, Edmonton, Middlesex.

SKELTON, JOSEPH, M.D., Battalion Surgeon of the Coldstream Guards, on April 8th, at Abbey-road, St John's-wood, aged 43. Dr. Skelton embarked from England with his regiment for the seat of war in February, 1854; and, after serving at Varna during the following summer, where his regiment suffered severely from privation and disease, he re embarked with his regiment on the Crimean expedition. He was present at the battle of the Alma, during the greater part of which he was under fire. His arduous exertions on that occasion, combined with the fatigue which he experienced on the subsequent march of the British army from Old Fort to Balaklava, led to an attack of hæmoptysis; but, on the emergency which arose at the battle of Balaklava, he was suddenly called upon to leave his bed, and to resume his duty in the field. His health then entirely broke down, and having been invalided, he left the Crimea for England two days after the battle of Inkermann. Shortly after his return to England, Dr. Skelton had the honour to be included among those officers of the Guards who received from her Majesty the medal for distinguished conduct in the field. Before his health was sufficiently re-established, he returned to the Crimea in September, 1855, and served with his regiment during the rest of the campaign. His health, however, had been thoroughly shattered by the Crimean hardships, and a short time after his return to England another attack of hæmoptysis led to his premature decease. Very few medical officers in the army have been more generally respected and esteemed, not only by his medical con'rères, but by all those with whom he served.

SKEOCH, CHARLES, Surgeon, R.N. at Stewarton, Ayrshire, on October 17.

SMITH, ALEXANDER, L.R.C.S. Edin. 1820; suddenly, at Kirkealdy, Fifeshire, in September.

SMITH, GEORGE, Surgeon, at Haslemere, Surrey.

SMITH, HUGH, L.R.C.S. Edin. 1823; at Bank-street, Kilmarnock, N.B.

SMITH, JOHN WOODMAN, M.B. Aberd. 1849; M.R.C.S. Eng. 1849; at Dingwall, Ross-shire, N.B.

SMITH, PATRICK, Surgeon, at Old Castle, co. Meath.

SMITH, RICHARD, M.R.C.S. Eng. 1801, late of the firm of Smith and Eady, of Chertsey, Surrey, on February 13th, at the residence of his son, the far-famed Albert Smith, in Percy-street, Bedford-square. The deceased gentleman practised at Chertsey for fifty years, and was highly respected. He had attained his 79th year.

SMITH, THOMAS WADE, M.R.C.S. Eng. 1843; in practice prior to 1815; at Dirleton House, Stroud, Gloucestershire.

SMYTH, WILLIAM GRAY, M.D. Glasg. 1828; on April 2, at 59, Vauxhall-walk, Lambeth, where he had practised upwards of twenty-five years, aged 63. His son, a medical student, expired on the same day, and at the same hour.

SORBY, W., Surgeon, after a short illness, at Hulme, Manchester, on May 11th, aged 64.

STACK, ROBERT, A.B., M.D., and Ex-Scholar, T.C.D.; L.M. Dub. 1837; Surgeon to the Hospital and Poor House, &c., at Newport, Monmouthshire.

STEEL, FRANCIS, M.D. Glasg. 1805, Fell. late Pres. F.P.S. Glasg., on June 1, at 104, West Regent-street, Glasgow, aged 77.

STERRY, HENRY, Surgeon, on December 1, at the Grange-road, Bermondsey, aged 85. In the decease of Mr. Sterry the Medical Profession has sustained a severe loss. He formed one of the last surviving links between this and the past generation. The son of an Essex clergyman, he was left an orphan very early in life. After a dressership at St. Thomas's under Mr Birch, he became a member of the Royal College of Surgeons, and commenced practice in Bermondsey in 1794. Without connexions and without friends, his life is a striking proof to the younger members of his profession, that perseverance and integrity bring their own reward even in this world, as they realised for him a competency which enabled him to pass the latter days of his life in ease and comfort. But however deeply his loss may be felt by the Profession, far more deeply will it be realised by the large number of those who shared his friendship, and by the numerous recipients of his private charity. For more than half a century he has been known as the firm supporter and generous patron of the School for the Indigent Blind. His attendance at the weekly committees was most regular and punctual. For more than forty years he very rarely missed a meeting, and all this whilst engaged in the active pursuit of a large and laborious practice in a poor and densely populated neighbourhood. Of late years he devoted several hours almost daily to this institution. He was also an active member of the committees of the School for the Deaf and Dumb, the Refuge for the Destitute, and of King's College Hospital; and it will be long ere these institutions meet with a more zealous or more sincere friend.

STEVENSON, WILLIAM, L.F.P.S. Glasg. 1812; M.R.C.S. Eng. 1812; Consulting Surgeon to the Birkenhead Infirmary, Dispensary, and Maternity Hospital; at 57, Hamilton-square, Birkenhead.

STEWART, HORATIO A., L.R.C.S.I. 1840, M.D. Glasg. 1841, Professor of Materia Medica at the Queen's College, and Surgeon and Clinical Lecturer at the General Hospital, at Belfast, aged 36.

STODDART, JOHN, Surgeon, at Keswick, Cumberland.

STRAKER, —, M.D., C.B., &c., Physician to the Bombay Army, died lately. He had been in the service upwards of thirty-three years, was actively engaged in the Sikh campaign as Superintendent-Surgeon of the Bombay column of the Army, and was also present at Mooltan and Gujerat.

STRANG, WILLIAM, L.F.P.S. Glasg. 1838; on July 1, at 118, South Portland-street, Glasgow, aged 49.

STUART, MORRIS, Surgeon, residing in Woburn-buildings, London, committed suicide in May, by taking hydrocyanic acid.

SUTTON, HENRY, Surgeon, at Upper North-street, Brighton.

SYME, DAVID, L.R.C.S. Edin. 1811; on July 29, at Blairgowrie, N.B.

TAYLOR, MALLALIEU, M.D., and L.R.C.S. Edin. 1847; on January 21st, at Ashton-under-Lyne, aged 31.

TAYLOR, J., Surgeon, at Evesham, Worcestershire.

TEAGE, WILLIAM, Surgeon, on May 18, at Townstall, Dartmouth.

THENARD, the celebrated chemist, at the advanced age of 80. He maintained his ardent love for science to the last, and will be especially missed by young aspirants for scientific honours, whom he especially delighted to encourage. He has died universally regretted; and the Académie des Sciences, on hearing of his death, which took place the evening before their weekly meeting, at once adjourned, as is its excellent custom whenever it loses one of its celebrated members. One of the last acts of M. Thénard's admirable career was the foundation of a new Benevolent Society for scientific persons, or, as he styled them, the friends of science. He was formerly a Peer of France and Chancellor of the University, as also a member of the Institute, and a Grand Officer of the Legion of Honour. France knows how to honour her sons of science.

THOMAS, HENRY C., Surgeon, of Lower Norwood, on August 22nd, aged 27.

THOMAS, JAMES PRICHARD, M.R.C.S. Eng. and L.M. 1854; on March 11, at Pont-y-Pridd, Glamorganshire.

THOMPSON, —, at Moneymore, co. Londonderry.

THOMPSON, J., Surgeon, at Manchester.

THOMPSON, PETER JOHN, M.R.C.S. Eng. and L.S.A. 1839; Surgeon to the Ironbridge Dispensary, at Madeley, Salop.

THORNTON, FREDERICK, F.R.C.S.I. 1844; L.R.C.S. 1841; L.M. Dub. 1839 and 1841; Medical Officer of the District Lunatic Asylum, in December 1856, at Ballinasloe, co. Galway.

THORP, JOHN, Surgeon, at Maldon, Essex, on April 1st, aged 80.

THRESHIE, JOHN, L.R.C.S. Edin. 1811; at Monnyhive, Dumfries, W.B.

THURSFIELD, THOMAS, M.R.C.S. Eng. and L.S.A. 1828; on December 8th, 1856, at Kidderminster, after a short and severe illness, aged 51.

TINLING, BENJAMIN BELL, L.R.C.S. Edin. 1814; at Little Corby Hill, Warwick Bridge, Carlisle.

TOLMIE, JAMES, M.D., on May 7th, of inflammation of the lungs, after an illness of only four days, at his residence, Campbelton, Ardersier, N.B. The deceased gentleman was M.R.C.S. Eng. 1819; L.F.P.S. Glasg. 1817; Aet. Garris. Surg. Fort George; Aet. Asst. Surg. Inverness Milit.; Paroch. Med. Off. Ardersier and Retty, and J. P. Author of "Statistical Account of the Parish of Ardersier," 1841. Contrib. on "Cholera," *Edin. Journ. Med. Sci.* 1849. A correspondent writes: "The deceased commenced his practice in his native place, a field not before occupied by any medical man, and somewhat unpromising with respect to emolument; being strongly attached to the people and the place of his birth, he declined the repeated solicitations of his friends and admirers to remove to a more extended field of labour, where his talents and medical skill could not fail to command an extensive patronage, and secure a more lucrative practice than could be looked for in the locality which he selected. I quote the following well-merited compliment to his memory in the 'Medical Journal,' of July last. 'Those who knew him intimately and who could appreciate his talents could not fail to be struck with the acuteness and originality of his observations, his refined taste, and his varied and extensive requirements as a literary man. His professional knowledge and success secured to him the implicit confidence of his patients, and their ready submission to his prescriptions and operations. We know, moreover, that he was regarded by his profes-

sional brethren as a man of no ordinary mind, well versed in the theory of medicine, and successful in its practice.' When we look at the deceased's attainments and his field of practice, we cannot forbear quoting, as peculiarly appropriate, the well known lines,

'Full many a flower is born to blush unseen,
And waste its sweetness on the desert air.'

Unwilling, however, that his memory, and the esteem in which he was held, should die with his friends and acquaintances, a handsome monument has been erected over his grave with the following inscription :

" 'Erected by public subscription, to the memory of James Tolmie, Surgeon of the R.C.S.L. and F.P.S. Glasgow, who died at Campbelton, 7th of May, 1857, aged 61 years. He practised in this parish and the surrounding districts for thirty-eight years, and commanded the respect and esteem of all who knew him, for his sterling worth, refined taste, and his varied acquirements as a scholar. This tablet is erected in grateful remembrance of his professional skill, his unwearied and disinterested attention to the poor, and also as a token of respect and sympathy for his sorrowing widow and family.' "

TRANTER, POLYDORE, M.R.C.S. Eng. 1838 ; at Hautville, Guernsey.

TROTTER, WILLIAM, M.D., forty years Physician to the Morpeth Hospital, on April 30, at Morpeth, aged 68.

TUCKER, SAMUEL REEVE, M.D., Assistant-Surgeon, 7th Regiment Bengal Irregular Cavalry, on May 10th, at Edinburgh.

TURNER, JAMES SAMUEL, M.R.C.S. Eng. 1824 ; L.S.A. 1828 ; Surgeon to the Royal Kent Dispensary ; Medical Officer of Health, &c., on January 24, at 9, Plumstead-place, Woolwich.

URE, ANDREW, M.D., F.R.S., &c., on January 2nd, at 18, Upper Seymour-street, Portman-square,

VERITY, RICHARD, M.D., on March 18th, at Dean lodge, Bedfordshire, aged 69.

VICKERS, W. RANDALL, M.R.C.S. Eng. 1823 ; L.S.A. 1822 ; Surgeon to the Police ; at 32, Baker-street, Portman-square, London.

WALKER, HENRY, Surgeon, H.E.I.C.S., late Professor of Physiology and Comparative Anatomy in the Calcutta Medical College, and formerly Surgeon to the Governor-General Lord Hardinge, on May 22nd, at Hendon, Middlesex, aged 54.

WARD, WILLIAM, Surgeon, on December 21st, at Fovant, Salisbury.

WARNER, CHARLES BRUCE, M.R.C.S. Eng. 1806 ; on November 19, 1856, at Cirencester.

WASHBOURNE, THOMAS, M.R.C.S. Eng. 1820 ; L.S.A. 1819 ; at Corsham, Wilts.

WATERS, JOHN, M.D. Glasg. 1832 ; L.R.C.S.I. 1829 ; L.M. Dub. 1831 ; at Parsonstown, Ireland. The deceased was, for nearly twenty-eight years, the chief medical practitioner in the town of Birr (Ireland), where his kindly disposition and unceasing efforts at improving the condition of the people had endeared him to a numerous circle of admirers and friends. We regret that his aversion to writing prevented him from ever publishing any of his cases, though perhaps none ever possessed ampler materials. A profound physiologist and most accurate diagnoser of disease, he often seemed, as if by intuition, to discover both the disease and its appropriate remedy. An excellent surgeon, and a brilliant operator, it is believed that he was *the first* in the British Islands who *successfully*

performed Amussat's operation for imperforate anus. He was as much beloved in private as he was admired in public life, and when, on the 9th of last January, he was suddenly taken away at the early age of 48, the town and county mourned for him as a public loss. A handsome monument has been erected to his memory by public subscription.

WATSON, ABRAHAM, Surgeon, in practice prior to 1815; in April, at Deansgate, Bolton-le-Moors.

WATSON, JAMES C., M.D., of the 58th Regiment N.I., H.E.I.C.S., Bengal Presidency; on January 27th, aged 34.

WAUDBY, SAMUEL, M.R.C.S. Eng. 1842; L.S.A. 1841; late for 14 years House-Surgeon to the Hereford Infirmary; on June 15th, of intermittent fever, on board Peninsular and Oriental Service Company's ship *Alma*, of which he was Surgeon, aged 37.

WEBB, WILLIAM, M.R.C.S. Eng. 1848; L.S.A. 1849; in November, at Llangollen, Denbighshire.

WEIR, WILLIAM, Surgeon, in practice prior to 1815; at Eskbank, Cannonbie, Dumfries, at an advanced age.

WEST, GEORGE, M.R.C.S. Eng. 1833; L.S.A. 1834, L.S.A. Dub. 1831, &c., of 5, Northampton-place, Haekney-road; on June 26th, at Hastings, aged 55.

WHEELER, ROBERT, Apothecary to the Bandon Dispensary, Cork, on May 5.

WHITING, JOSEPH B., M.R.C.S. Eng. and L.S.A. 1823; on August 18th, at King's Lynn, aged 55. The deceased gentleman expired suddenly through the rupture of a blood-vessel.

WHITMARSH, GEORGE, Surgeon, R.N., late of Downton, Wilts, on October 20th; at Slinton, Sussex, aged 46.

WHYTE, ROBERT, M.D.; on July 4th, at Naples.

WIBLIN, WILLIAM, M.R.C.S. Eng. 1842; L.S.A. 1843; on December 21, 1856; at Alfred street, Bedford-square, aged 40.

WICKENDEN, JOSEPH, M.R.C.S. Eng. and L.S.A. 1816, F.G.S., &c., on July 5th, at Birmingham, aged 62. Mr. Wickenden took a leading part with Sir Charles Hastings, M.D., in the formation of the Provincial Medical and Surgical Association, and was a member of its General Council up to the period of his death. He had gained, by his gentlemanly character and deportment, the respect, not only of his colleagues, but of the Profession generally, who most sincerely and most deeply feel and deplore his loss. "He was a man of chastened and cultivated intellect, sound in faith, and pure in morals."

WIGHTMAN, CHARLES, M.D. Edin. 1808; L.R.C.P.; Physician to the Dispensary, &c., on August 19, at his residence, Newcastle-on-Tyne. The deceased was Author of "A Treatise on the Sympathetic Relation between the Stomach and the Brain, and throughout, between the Digestive and the Nervous Systems, in the Causation and Cure of Diseases," 1840.

WILLCOX, JOHN, L.S.A. 1851; at 11, Bath-row, Birmingham.

WILLIAMS, J., Surgeon, R.N.; F.R.C.S. Eng. (Hon.) 1844; M.R.C.S. 1807; at Southsea, Hants.

WILLIAMS, THOMAS, late Surgeon H.E.I.C.S. Madras Establishment; on January 11th, at Promenade-terrace, Cheltenham, aged 70.

WILSON, ADAM, Surgeon; at 10, Lothian-street, Edinburgh.

WILSON, JAMES, Senior M.D. This excellent man and well-known physician died on the 30th of September, at his residence in Hope-street,

in the 75th year of his age, after a severe illness of three weeks' duration, borne with exemplary patience and fortitude. Dr. Wilson was a native of Douglas, in the Upper Ward of Lanarkshire where he was born on the 30th of June, 1783; and after having received a medical education at this University he settled in Carlisle as a surgeon. Having practised his profession there for several years, he removed to Glasgow under the immediate patronage of the late Dr. Jeffrey, Professor of Anatomy in the College, who entertained a high respect for his abilities, and whose friendship he enjoyed during the remainder of the life of that venerable individual. In the earlier part of his professional career, he was associated with the late Mr. John Grieve, with whose family he afterwards formed a more endearing connexion; and on Mr. Grieve's death he succeeded to a small, but well-established, family practice, which laid the foundation of his future success in life. For at least forty-two years he followed his profession in this city, and gradually acquired a well-deserved and an extensive reputation as a physician-accoucheur. The confidence reposed in his skill and judgment by his professional brethren was so great that he was much consulted by them in cases of difficulty, and for many years he taught that branch of his art to which he was more particularly devoted in the Portland School of Medicine, and for one session he supplied the place in the college of the late Dr. William Cumin, when that gentleman retired to Bath. As a lecturer he was eminently successful, for he was plain and practical, and his pupils felt that he was thoroughly master of his subject; while in the private exercise of his professional duties he commanded and obtained the confidence and esteem of his numerous patients, whose counsellor and friend he became as much as their medical attendant. At the time of his death Dr. Wilson's reputation had been long and firmly established, and though, from his unobtrusive manners, he was little heard of beyond the circle of his profession, no name stood higher within it. Personally Dr. Wilson was a just and righteous man, whose conduct was habitually under the control of deep religious and moral convictions, and we have never known any one who at all times and under all circumstances exhibited so completely the triumph of principle over impulse. His equanimity never forsook him even in the midst of distress and suffering, and when sorrow weighed upon the hearts of others, and the tenderest feelings of nature were lacerated by domestic bereavement, no sympathy was more freely and unaffectedly given than that of the benevolent physician whose art, assiduously and generously applied, had failed to ward off the inevitable and fatal blow. Many besides the writer of these lines will miss that benevolent face which never looked upon them but with kindness, and that voice which never spoke to them but in accents of tenderness. Dr. Wilson, at the time of his death, had been an elder of the church for fifty years. He was a member of the Free Church, and an office-bearer of Free St. John's; but it is needless to add that his benevolent nature was incapable of harshness of any kind, and that his intimacy with his old friends of the Establishment was never interrupted for one moment by the disruption.

BANKERS.

Messrs. Goslings and Sharpe, Fleet-street.

This Society has been established upwards of a century and a half, and is the oldest Life Assurance Institution in existence. Its principles are essentially those of Mutual Assurance, and the whole of the profits are divided among the members.

Policies entitling assurers to participate in the profits, and in virtue of which the lives assured are admitted members of this Corporation, are now issued exclusively on the bonus plan established in 1845; but policies are also granted for fixed sums (without participation in profits) upon a reduced scale of premiums, on the lives of persons who do not, in right thereof, become members.

Assurances may be effected on the lives of persons in every station or profession, and upon every contingency depending on human life. No charge is made for policy stamps.

The rates of premium required by this Society are moderate; the sums assured by its policies are guaranteed by a large accumulated capital invested in the Government funds, freehold estates, and other approved securities; and the expenses of management amount only to about 3 per cent. on the annual income.

The Directors are empowered to lend money upon mortgage of freehold estates, life interests, &c.; and loans of sums not less than 20*l*. are granted upon the security of the Society's policies after three years' payments have been made.

Prospectuses and every information may be obtained at the Office.

Life Assurances are granted under an extensive variety of forms, and at Moderate Premiums ; the Rates for the *Younger Ages* being lower than those of many of the older and most respectable offices.

Participation of Profits. *Four-fifths*, or Eighty per Cent. of the declared Profits will be divided quinquennially among those entitled to participation.

Non-participating Scales of Premium. Policies issued at minimum Rates without participation in profits.

Life Policies are not liable to Forfeiture by the Lives Assured proceeding beyond the prescribed limits without the cognizance of the holders of such Policies.

Reduced Extra Rates for residence out of Europe.

No charge for Stamps or Medical Fees.

Fire Assurances, both at home and abroad, are accepted at very Moderate Premiums.

The Assured participate in the *Fire Profits* in respect of Policies in force for five complete years at each period of Division.

Losses by *Lightning* are made good ; and the Company are liable for Losses by *Explosion*, except when occasioned by Gunpowder, or in cases specially provided for in the Policy.

Detailed Prospectuses will be furnished on application.

This Office having been established forty-nine years, more than sufficient time has elapsed to test the soundness of the principles on which it has been conducted. During that period, its prosperity and the magnitude of its operations has been constantly increasing.

In the

LIFE DEPARTMENT

The Accumulated Premiums are over £1,600,000. And the Annual Income exceeds £184,000.

Bonuses have been declared on Policies to an amount greater than the sum originally assured.

Premiums have been extinguished, where the parties assured have applied the bonus in reduction of the Annual Premium.

The Surplus Premiums for the Five Years ending Christmas, 1854, amounted to £268,691—the whole of which belonged to the policy holders.

The next valuation will be made up to Christmas, 1859. Policies on the Participating Scale, in England or Ireland respectively, which may be effected before that date, will, if the parties be then alive, participate in the surplus in proportion to the time they may have been in force.

The sum of £3,130,975 has, up to the end of the year 1856, been paid for claims under Life Policies, of which amount a very considerable part was for Bonuses.

The following TABLE shows the total additions made to Life Policies for £1,000, effected in London or through an Agent in Great Britain, which had been in force for the Thirty-eight Years ending at Christmas, 1854.

Persons assuring in Great Britain have the option of
Participating Rates of Premium, or of
Non-Participating Rates.

The Directors beg to announce that the rates of Premium have been

recently revised and re-adjusted in accordance with a long experience, and that

The New Scale will be found very advantageous to persons desiring to commence assuring early in life.

The Non-Participating Scale is particularly adapted to parties wishing to assure a fixed sum only, at a fixed rate of Premium, and on low terms.

Premiums may be paid Annually, Half-yearly, or by a limited number of Annual Payments. The last-named mode of Assurance originated with this Office in 1816.

No extra Premium is required for the voyage to or residence in any part of Europe, during peace.

Nor on the lives of persons in the army or navy while residing in the United Kingdom in time of peace.

Advances are made on Life Policies to the extent of their value.

Or the Directors will purchase the Interest of the Assured at an equitable price.

Lapsed Policies may be revived within three months.

Policy Stamps are not charged for.

CHARLES ANSELL, Actuary.

FIRE DEPARTMENT.

The Company undertakes the assurance of Property in the Manufacturing, Agricultural, and other districts, on favourable terms. Risks of extraordinary hazard on special agreement, upon survey.

An Allowance for the loss of Rent of Buildings rendered untenable by Fire is one of the advantages offered by the Company.

Tables of rates, forms of proposal, and any information needful to effect Life or Fire Assurances, may be obtained on application to the Office, No. 92, Cheapside, London, or to any of the Company's Agents.

CHURCH OF ENGLAND LIFE AND FIRE ASSURANCE INSTITUTION, 5, LOTHBURY, LONDON.

LIFE.

This Institution adopts both the **Proprietary** and **Mutual** systems of Life Assurance, and the Policy-holders in BOTH BRANCHES are fully protected by the *large Subscribed Capital of One Million Sterling*, guaranteed by a numerous and influential body of Proprietors, whose names and addresses are periodically enrolled in the High Court of Chancery, pursuant to the provisions of the Special Act of Parliament (IV. & V. Vict. cap. 92), empowering the Company,—independently of the Fund accumulated from the Premiums on upwards of 5,000 Policies.

FIRE.

Premiums for Assurance against Fire are charged at the usual moderate rates, with a reduction of 10% per cent. on the Residences and Furniture of Clergymen, and the Buildings and Contents of Churches and Church Schools.

Prospectuses, the necessary Forms, and every requisite information for effecting Assurances, may be obtained on application at the Head Office, as above, or to any of the Agents of the Company.

WM. EMMENS, Manager.

* * The Rates of Premium charged by this Institution for residence in India, the Cape of Good Hope, and Australia (where the Company has Branches) are peculiarly favourable to Assurers.

* * Medical men remunerated in all cases for their Reports.

MUTUAL BRANCH.

Assurers on the Bonns system are entitled, at the end of five years, to participate in nine-tenths, or 90 per cent. of the profits.

The Profit assigned to each Policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase varying, according to age, from 66 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "whole-term" premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in One Month after proofs have been approved.

Loans upon approved security.

NO CHARGE FOR POLICY STAMPS.

Medical Attendants paid for their reports.

Persons may, in time of peace, proceed to, or reside in, any part of Europe or British North America, without extra charge.

The Medical Officers attend every day at a quarter before Two o'clock.

The Public are invited to examine for themselves the advantages gained for assurers by the plan on which Policies are granted by this Office.

Assurances may be effected for any sum from £20 to £5,000 upon any known system of Life Assurance.

No entrance or admission money required.

All Premiums are made payable on one of the usual quarter days.

Claims payable in three months after satisfactory proof of death shall have been given.

A Board of Directors and Medical Officers are in attendance on Tuesdays, at two o'clock, and every facility is afforded for effecting Assurances on any other day.

Medical Referees are paid by the Society for their professional report upon all cases referred to them.

Forms of Proposal, and every information, may be obtained on application to any of the Agents, or at the Office, No. 17, New Bridge-street, Blackfriars, or by letter to the Secretary.

CHARLES JAMES THICKE, Resident Secretary.

The Directors of the British Mutual Life Assurance Society, in order to encourage parties desirous of making small investments, or obtaining loans from 25*l.* to 1,000*l.*, beg to invite attention to the

BRITISH MUTUAL SUBSCRIPTION LOAN ASSURANCE CLASSES,

which have been established upon the following principles:—

Each Class consists of Members, who each subscribe 1*l.* per month for fifty months for every £50 of the Capital Fund or Stock of the Class to which he belongs. Each Member to subscribe not less than 10*s.* (for £25), nor more than £5 (for £250) per month.

The Funds so raised are advanced each month by way of anticipation to that Member who may be willing to give the greatest bonus for the priority of the advance—i.e., for receiving at once, instead of waiting till he has completed his subscriptions, the ultimate amount of the sum he may subscribe for, such bonus to be paid in equal monthly proportions extending over the remaining period of duration of his Class.

The Member so entitling himself to the priority will simply have to give a Bond, joined by two approved sureties, or, if more convenient to himself, such other security as shall be approved by the Trustees of his Class for the due payment of his future subscription and bonus.

Several Classes have been already established, and others are now in course of formation, and will shortly commence operations. Persons desirous of joining, or of obtaining any further information, may apply at the Offices of the British Mutual Life Assurance Society, 17, New Bridge-street, Blackfriars.

ASSURANCES may be effected on Lives, Survivorships, &c. &c., as stated in the Society's Prospectus, to any amount not exceeding 5,000l.

The whole available Bonus is the sole property of Life Assurers, no part whatever is taken from it to be shared amongst proprietors. The greatest advantage to Life Assurers necessarily results from this principle of Mutual Assurance, that at the end of every fifth year return is made to every Assurer of that which is then found to be an excess of payment made by him, beyond that which the circumstances of the case required, as proved by experience.

The Fee to the Medical Referees is paid by the Society.

Applications for Prospectuses, or further information, to be made at the Office, 3, BROAD SANCTUARY, WESTMINSTER.

JAMES INGLIS, Secretary.

CLERICAL MEDICAL AND GENERAL LIFE ASSURANCE SOCIETY.

REPORT OF THE DIRECTORS presented at the Annual General Meeting, held at the Society's Office, No. 13, St. James's-square, London, FRIDAY, November 27th, 1857:

It will be in the recollection of the Proprietors, that, at Two Extraordinary General Meetings held on the 1st and 28th of January last, the period for holding the Annual Meetings was altered from March to November, in order that *earlier* publicity might be given to the state of the Society's affairs at the end of June, that being the period fixed by the Deed for the termination of each financial year. In consequence of this alteration no Meeting took place in March last, and it is therefore now the duty of the Directors to lay before this Meeting a statement of the transactions of the Society for the *Two* years ending June 30th, 1857.

The number of New Policies issued within that period was **1,097**:

The amount of Assurances granted was **£605,300**; and

The New Premiums arising therefrom amount to **£20,729** per Annum.

The Assurance Fund, notwithstanding the payment in cash of **£65,384** as Bonus, since the declaration in January, has increased during the two years by no less a sum than **£55,676**.

From these facts it will be readily perceived, that during the period under notice, the progress of the Society has been in no degree retarded by the effects of the war, by the state of the money market, or by the active competition which has existed amongst kindred Institutions.

After the full and comprehensive statements made at the Extraordinary Meeting in January last, when the **SIXTH BONUS** was declared, the Directors feel that there is little further now to communicate; but they cannot refrain from mentioning that the Bonus then divided, which averaged 46 per cent. in Reversions, and 27 per cent. in Cash, on the Premiums received since 1851, has given general satisfaction, and has tended materially to sustain and advance the high estimation in which the Society has been so long held by the Public.

An Account of the Proceedings at the last **BONUS MEETING** setting forth the Assets and Liabilities of the Society, and also the **FAVOURABLE POSITION IN WHICH PERSONS WHO NOW ASSURE** will be placed, can be obtained on application.

The Business of the Company comprises Assurances on Lives and Survivorships, the Purchase of Life Interests, the Sale and Purchase of Contingent and Deferred Annuities, Loans of Money on Mortgage, &c.

The realised Assets of this Company amount to upwards of £1,300,000.

The Annual Income is about £220,000, assuring upwards of £4,850,000.

At the quinquennial Division, in 1857, about £208,000 was added to the sum assured under Participating Policies.

The lives assured are permitted, in time of peace, without extra charge, to reside in any country (Australia and California excepted) north of 33 degrees north latitude, or south of 33 degrees south latitude, or to pass by sea (not being seafaring persons by profession), between any places lying in the same hemisphere and beyond those limits.

All Policy Stamps and Medical Fees required on effecting Assurances are paid by the Company.

By recent enactments, persons are exempt, under certain restrictions, from Income Tax, as respects so much of their income as they may devote to Assurance on Lives.

The Annual Reports of the Company's state and progress, Prospectuses and Forms, may be had, or will be sent, post free, on application at the Office, or to any of the Company's Agents.

The advantages offered by this Society are—ECONOMY combined with SECURITY, and LOWER RATES of Premiums than those of any other Office, which entitle the Assured to participate in the profits, and *considerably lower* than those of any other *Mutual Assurance Society*.

The WHOLE OF THE PROFITS are divided every fifth year among the Assured, and a Bonus is added, after the payment of the Fifth Annual Premium, to every Policy effected on the Participating Scale, if a claim accrue thereon prior to the next division of Profits.

The sum of 397,000*l.* was added to Policies at the last Division, in 1854, which produced an average Bonus of 67*l.* per cent. on the Premiums paid.

Number of Policies in force, upwards of 7,400:

The Assurance Fund amounts to 1,575,000*l.* Income upwards of 240,000*l.* per annum.

No charge for Policy Stamps, nor for Service in the Yeomanry or Militia Corps.

The subjoined Table shows the advantages offered by the Society, resulting from low Premiums, and a division of the *entire profits* among the Assured:—

The Equitable Society has now been established for nearly a century,—was the first institution of the kind ever formed on the principle of mutual liability and mutual benefit,—and few institutions have been attended with such uniform success and prosperity throughout a period of equal duration, or more completely realized the intentions of their founders. Commencing its career for the express purpose of securing to great numbers of persons in particular situations of life and circumstances of fortune the benefit of Life Assurance, it has provided comforts and competence that could not otherwise have been rendered certain, to many thousands of families;—nor ever, but in two instances, disputed a claim out of its numerous and vast engagements, the extent of which may be gathered from the fact of its having issued above Thirty-nine Thousand Policies since its commencement, and paid in claims, bonuses, and the purchase of policies upwards

Twenty-nine Millions Sterling.

To those desirous of assuring their lives for the same great object for which thousands have resorted to it in times past, the Equitable Society still offers the security of an immense Capital, and the right to participate on equal terms with most of its present members in a Surplus reserved out of the profits and accumulations of many preceding years of prosperity and frugality—a fund so ample, that the annual interest on it is more than six times the amount of the yearly expenses of management of every kind, and leaves the premium of every new member to be invested and improved free from any deduction or charge on that account.

The Capital of the Society, on the 31st of December 1856, amounted to **£7,000,000**; and the Income of the Society from the Interest on that Capital, and from Annual Premiums, exceeds **£400,000**.

This Society is established on the tried and approved principle of Mutual Assurance. The funds are accumulated for the exclusive benefit of the Policy-holders, under their own immediate superintendence and control. The Profits are divided annually, and applied in reduction of the current Premiums. Policy-holders participate in Profits after payment of five Annual Premiums.

The Annual General Meeting was held on the 28th May, 1857, when an elaborately detailed Report of the affairs of the Institution was presented to the Members. After a rigid investigation, it was satisfactorily ascertained that the state of the funds was such, that the Policy-holders' allowances might be safely increased, during the present year, from $31\frac{1}{2}$ to $32\frac{1}{2}$ per cent., whilst it was clearly shown that, from the extreme care and caution observed in avoiding any undue appropriation of the surplus, such allowances would hereafter, from time to time, be considerably augmented. It was also clearly shown that the amount of business transacted during the past and preceding years was such as to prove incontestably that the Society firmly maintains its footing, and enjoys, to the fullest extent, the confidence and support of the public.

The Members present at the Meeting were fully satisfied with the Report, and resolved unanimously that a reduction of $32\frac{1}{2}$ per cent. should be made in the current year's Premium payable by all Policy-holders now entitled to participate in the Profits.

Credit is allowed for half the Annual Premiums for the first five years.

The following Table exemplifies the effect of the present reduction.

Policies may be effected without loss of time, formalities being carried through at the office every day, from ten to four; Saturdays, ten to two; medical officer daily at eleven. The Board assembles on Thursdays at half-past twelve.

Loans may be obtained in connexion with Policies effected with the Company. There has been advanced in this respect upwards of £200,000 since July, 1848.

The Society's progress during the last nine years may be judged of from the following list:—

Year ending	New Premiums.			Year ending	New Premiums.		
1849 ...	£5,615	11	8	1854 ...	£8,115	16	7
1850 ...	8,281	2	1	1855 ...	9,118	15	3
1851 ..	5,124	3	4	1856 ...	19,111	11	5
1852 ...	9,421	19	0	1857 ...	23,748	18	9
1853 ...	10,436	1	2				

The success of the Society's operations during the preceeding year, it will be seen, has been exceeded by that of the year just past; the new premiums in the former having been £19,111 11s. 5d., and in the latter £23,748 18s. 9d., making together £42,860 10s. 2d. in the two years, without including any single risk or premium, of great amount, or entering upon amalgamations with other societies. Within the same period a liberal bonus upon policies of three or more years' standing has been declared and paid; and, in addition to the discharge of claims from deaths, of working expenses and collateral charges, the general assets of the Society have been augmented by between Fifty and Sixty Thousand Pounds, the bulk of which has been invested in the names of the Society's Trustees in the Public Funds. Influenced by such evidences of prosperity, the Directors of the "Gresham" thus prominently draw the attention of the public to the successful results that have been achieved.

Annual Reports, Prospectuses, and other forms, on application.

Active and influential persons will be appointed as agents on liberal terms, in districts where the Society is not already sufficiently represented.

LIFE DEPARTMENT.

Medical Fees allowed by this Company.

Under the provisions of an Act of Parliament this Company now offers to future Insurers **FOUR-FIFTHS OF THE PROFITS, WITH QUINQUENNIAL DIVISION,** or a **LOW RATE OF PREMIUM,** without participation of Profits.

The next division of Profits will be declared in June 1860, when all Participating Policies which shall have subsisted at least one year at Christmas 1859, will be allowed to share in the Profits.

At the Five Divisions of Profits made by this Company the total Reversionary Bonuses added to the Policies have exceeded 913,000*l*.

At Christmas 1854 the Assurances in force amounted to upwards of 4,240,000*l*., the Income from the Life Branch in 1854 was more than 200,000*l*., and the Life Assurance Fund (independent of the Guarantee Capital) exceeded 1,700,000*l*.

Loans granted on Life Policies to the extent of their values, provided such Policies shall have been effected a sufficient time to have attained in each case a value not under 50*l*.

UN SOUND LIVES.—Persons who are not in such sound health as would enable them to insure their lives at the Tabular Premiums, may be insured at such extra Premium as the Directors may deem adequate to the increased risk thereby incurred.

Every renewable Policy is held in force during the 30 days allowed for its renewal, provided the Premium shall be paid within that period.

A Policy taken out on Own Life is held to be valid in case of suicide, death by duelling, or by the hands of justice, to the extent of any bona fide interest acquired therein by other parties.

Age admitted in all cases upon proof being furnished satisfactory to the Directors.

Appearances taken any day, but the usual day of appearance is Friday, at one o'clock.

Appearances also taken by appointed Agents of the Company in most parts of the United Kingdom and Continent of Europe, without Fine for non-appearance in London.

No additional Premium required from Naval and Military Men, unless when called into actual service.

No additional Premium required during peace for passing by sea from one part of Europe to another.

No charge made for Entrance Money or Admission Fees.

No charge for Policies.

FOREIGN RISKS.—The extra Premiums required for the East and West Indies, the British Colonies, and the Northern parts of the United States of America, have been materially reduced.

In the FIRE DEPARTMENT, Insurances are effected upon moderate terms; and no charge is made for the Policy.

LIFE DEPARTMENT.—The important advantages offered by the plan and constitution of the Life Department of this Society are :

That Insurers are protected by a large invested Capital, upon which there is no Interest to pay, and for which no deduction of any kind is made ; which enables the Directors to give the whole of the Profits to insuring Members. That the Profits are divided annually amongst all Members of five years' standing, and applied towards reducing Life Insurance to the lowest possible rates of Premium.

The abatement of Premium on all Policies of five years' standing was in 1842, 1843, and 1844 at the rate of 45*l.* per cent. in each year ; in 1845, 1846, 1847, and 1848, 50*l.* per cent. in each year ; and in 1849, 1850, 1851, 1852, 1853, 1854, 1855, 1856, and 1857, 52*l.* 10*s.* per cent. in each year ; and it is expected that an equal abatement will in future be annually made.

Persons insuring their own lives, or the lives of others, may become members. Persons who are willing to forego participation in the profits can insure at a lower rate than that charged to Members.

The following Table will show the effect of the Reduction of Premium made by the Society on Members' Policies that have been five years in force :

Age when Insured.	Sum Insured.	Annual Premium for first Five Years.	Reduced Premium.
	£	£ s. d.	£ s. d.
30	100	2 13 5	1 5 6
40	100	3 7 11	1 12 3
30	500	13 7 1	6 7 0
40	500	16 19 7	8 1 3
45	1,000	38 19 2	18 10 1
40	2,000	67 18 4	32 5 2
45	5,000	194 15 10	92 10 6

This system of reducing the Premiums affords immediate benefit to the Members, and enables them to insure a further sum upon their lives equal to more than one-third of the present policy, without any additional outlay.

No charge for Policy Stamps.

FIRE DEPARTMENT.

Insurances are effected on every description of property at the usual rates.

FOUR-FIFTHS, or 80 per cent. of the Profits are assigned to Policies every fifth year, and may be applied to increase the sum insured to an immediate payment in cash, or to the reduction and ultimate extinction of future Premiums.

At the fifth appropriation of profits for the five years terminating January 31, 1856, a reversionary bonus was declared of 1*l*. 10*s*. per cent. on the sums insured, and subsisting additions for every premium paid during the five years. This bonus on policies of the longest duration, exceeds 2*l*. 5*s*. per cent. per annum on the original sums insured, and increases a policy of 1,000*l*. to 1,638*l*.

The next appropriation will be made in 1861, and parties who insure during the current year will participate in the profits to the fullest extent.

ONE-THIRD of the Premium on Insurances of 500*l*. and upwards, for the whole term of life, may remain as a debt upon the Policy, to be paid off at convenience; or the Directors will lend sums of 50*l*. and upwards, on the security of Policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Proposals for insurances may be made at the chief office, as above; at the branch office, 16, Pall-mall, London; or to any of the agents throughout the kingdom.

LIFE ASSOCIATION OF SCOTLAND.

FOUNDED 1838.

(Empowered by Royal Charter and Act of Parliament.)

The EIGHTEENTH ANNUAL MEETING of the LIFE ASSOCIATION of SCOTLAND was held within the EDINBURGH OFFICE on 14th July 1857; SIR JAMES FORREST of Comiston, Bart., in the Chair.

The following is an abridgment of the Report by the Directors, and the detailed Statements as at 5th April, 1857, that were submitted to the Meeting:—

	Number.	Sums.
The Applications for Life Assurances received during the year were	1456	for £736,358
Of which the Directors accepted only	1158	„ £581,986
The Amount of Annual Premiums payable on these 1158 Assurances is		£19,860

There were also Thirteen Transactions for Annuities during the year, amounting to £443 per annum, and for which the Association received £4,968 12s. 8d.

The Annual Income from Premiums and Interest on Investments is now upwards of ONE HUNDRED AND TWENTY-FOUR THOUSAND POUNDS.

The Total Life Assurances since the commencement of the Association amount to upwards of TEN THOUSAND for £4,319,760. The Progress of the business is shown in the following Table:—

Assurances since December, 1838, up to these Dates.	Annual Income.
5th April 1842 - - - 258 for £131,824	£4,524
Do. 1845 - - - 610 „ 327,249	10,492
Do. 1848 - - - 1,195 „ 617,945	19,656
Do. 1851 - - - 3,878 „ 1,571,981	45,970
Do. 1854 - - - 7,015 „ 2,770,686	80,673
Do. 1857 - - - 10,203 „ 4,319,760	124,318

The Directors have continued to give their most careful attention to the Investment of the Funds, and to decline making any advances on personal security, whether in connection with Assurance Policies or not. The Assurance department of the business, therefore, derives no aid from that source.

Although there are now nearly 8,000 Policies in force on the books, only 63 of the assured have died during the year; the Sums Assured being £35,333

The Auditor (Mr Wood, Accountant) audits the accounts monthly, as well as revises the whole at the end of the year; and the Accounts now submitted to the meeting are certified by him.

An allocation of Profit is made *every year* to participating Policy-holders of five years' standing, and the Profit thus allocated (instead of being, as in other offices, a sum payable at death) is handed to them *in money*. The Premiums have thereby been considerably reduced, beginning with those due at the end of the sixth year.

Life Department.

This Corporation has granted Assurances on Lives for a period exceeding 130 years, having issued its first policy on the 7th June, 1721.

Two-thirds, or 66 per cent. of the entire profits are given to the Assured.

Policies may be opened under any of the following plans, viz.—

At a low rate of premium, without participation in profits, or at a somewhat higher rate, entitling the Assured, either after the first five years, to an annual abatement of premium for the remainder of life, or, after payment of the first premium, to a participation in the ensuing quinquennial Bonus.

The abatement for the year 1858 on the Annual Premiums of persons who have been assured under Series "1831" for five years or longer, is upwards of 34 per cent.

The high character which this ancient Corporation has maintained during nearly a century and a half, secures to the public a full and faithful declaration of profits.

The Corporation bears the whole expenses of management, thus giving to the Assured, conjoined with the protection afforded by its Corporate Fund, advantages equal to those of any system of Mutual Assurance.

Premiums may be paid Yearly, Half-yearly, or Quarterly.

All Policies are issued free from Stamp Duty, or from charge of any description whatever, beyond the Premium.

The attention of the Public is especially called to the great advantages offered to Life Assurers by the Legislature in its recent enactments, by which it will be found that to a defined extent Life Premiums are not subject to Income-tax.

The fees of Medical Referees are paid by the Corporation.

Annuities are granted by the Corporation, payable Half-yearly.

Every facility will be given for the transfer or exchange of Policies, or any other suitable arrangement will be made for the convenience of the Assured.

Prospectuses and all other information may be obtained by either a written or personal application to the Actuary or to the Superintendent of the West-End Office.

Department of Medical Statistics—William Farr, Esq., M.D., F.R.S.

By the Annual Report of 1853, it appeared that the number of Policies then in force was 3,434, insuring £1,337,500, and yielding an income of £55,207.

At the SIXTEENTH ANNUAL MEETING, held on the 26th November, 1857, it was shown that on the 30th June last,—

The Number of Policies in force was 6,255

The Amount Insured was £2,917,598 13s. 10d.

The Annual Income was £125,113 3s. 8d.

The New Policies issued during the last Five Years are as follows, viz:—

	Policies.	Sums Assured.	Ann. Pr-em.s.
1853	922	... for ... £402,176	yielding £16,934
1854	1,119	534,188	22,758
1855	1,129	538,084	22,609
1856	1,137	556,769	24,051
1857	1,207	570,282	23,015

Two Bonuses have been declared (in 1848 and 1853) adding nearly 2 per cent. per annum on the average to sums assured, and by which a Policy of £1,000, issued in 1842 on a healthy life, is now increased to £1,260.

Profits divided every five years—next division in 1858.

The Society has paid claims on 781 Policies, assuring £312,884 since its establishment in 1841.

Premiums for India have been computed on the actual results of European Life in that Colony, extending over the whole period of the East India Company's experience, and will be found generally lower than those of other companies, and especially favourable for military men.

Civil rates charged on the lives of military officers holding civil appointments, for the term of such appointments.

Immediate reduction to English rates on the Assured returning to Europe permanently to reside.

Policies may be made payable either in London or in India, at the rate of Two Shillings sterling per Company's Rupee.

GENERAL ADVANTAGES.

Assurances are effected at home or abroad on healthy lives at as moderate rates as the most recent data will allow.

No extra premium is required on healthy Lives in the Army or Navy unless in actual service.

The Policies issued by this Society give greater facilities to parties going to or residing in Foreign Climates than those of most other companies.

Invalid Lives Assured on scientifically constructed tables based on extensive data, and a reduction in the premium is made when the causes for an increased rate of premium have ceased.

Policies issued free of stamp-duty and every other charge, except the premium.

Medical men are paid a guinea for each report, and receive the same advantages as Solicitors for any business they may introduce.

Notices of Assignment are registered and acknowledged without charge.

Assurers incur no risk of Copartnership as in Mutual Offices, but are free from all liability.

A Capital of Half-a-Million sterling, fully subscribed (in addition to a large income and accumulated assets) affords a complete guarantee for the fulfilment of the Company's engagements.

Active working Agents wanted in vacant places.

Prospectuses, Forms of Proposal, and every other information, may be obtained on application to any of the Society's Agents, or of

THE FOLLOWING IMPORTANT BENEFITS ARE AFFORDED BY THIS COMPANY:—

1st.—A guaranteed Return will be made at any time for the surrender of existing whole term Policies, effected by even rates, of 40 per cent. of the amount of ordinary Premiums received thereon. This is an advantage which it is believed has not hitherto been afforded by any other Assurance Company.

2nd.—A person desirous of surrendering his Policy may receive, instead of a payment in cash, a new Policy for an equivalent sum, not subject to further payment of Premium.

3rd.—Credit given for one-third of the Premiums upon whole term Policies.

4th.—Notices of assignments received and registered, and acknowledged if required.

5th.—No claim will be disputed, except in case of palpable fraud: an unintentional error will not vitiate a Policy.

6th.—No entrance money or fee of any kind, nor any charge made for Policies.

7th.—Loans are granted on deposit of Policies of five years' standing to the extent of their value.

8th.—No appearance before the Court of Directors required.

This Society is conducted on the basis of Mutual Assurance, and there being no proprietary body to share the profits with the Assured, the entire advantages belong exclusively to the Members.

A Division of Profits takes place every year, in which all Members' Policies upon which five full yearly Premiums have been paid are entitled to participate.

Members have the option of receiving their respective shares of profit either in Reduction of their Premiums, or in equivalent Additions to the sums assured by their Policies.

Premiums may be paid annually, half-yearly, or quarterly, at the convenience of the Assured, and a portion of the Premiums on Policies issued for the whole term of life may remain unpaid by special agreement.

Loans are granted on approved security in connection with Life Assurance.

The Society's capital, accumulated solely from Premiums, exceeds £300,000, and its annual income exceeds £55,000.

SECRETARY—John Hoddinott, Esq.

PHYSICIAN—John Maclean, M.D., F.S.S., 29, Upper Montagu-street, Montagu-square.

BANKERS—Messrs Ransom, Bouverie, and Co.

No Charge for Policy Stamps or Medical Fees.

The Rates of Premium are those adopted by the principal Life Offices; the Rate without Bonus is lower than that of most other Offices.

The Bonuses are added to the Policies, or applied to the reduction of Premiums.

Policies issued by this Office are purchased at their full value; or Loans may be obtained upon them after they have been in existence five years.

If a party neglect to pay for the renewal of his Policy, he may repair the omission any time within twelve months, upon proof of good health.

The profits (subject to a trifling deduction) are divided among the Insured. The plan upon which they are divided gives to each party insured a share proportionate to the amount of the Premiums he has contributed.

In addition to this advantage, which is now offered to the Policy-holders in this Office, an annual addition or Bonus is made to each Policy in anticipation of the Quinquennial Division of Profits.

The following Extract, from the LIST of CLAIMS paid by the "PROVIDENT," is published with the sanction of the parties interested in the Policies, some of whom have accompanied their acknowledgment of the unexpected advantages with an earnest desire that the widest circulation may be given to the publication.

FIRE, LIFE, and MARINE ASSURANCES may be effected with this Corporation on advantageous terms.

Life Assurances are granted with, or without, participation in Profits; in the latter case at reduced rates of Premium.

Any sum not exceeding £15,000 may be assured on the same Life.

The Reversionary Bonus on British Policies has averaged 48 *per cent.* upon the Premiums paid, or very nearly 2 *per cent. per annum* upon the sum assured.

The future divisions of Profit will take place every Five Years.

The Expenses of Management, being divided between the different Branches, are spread over *a larger amount of Business than that transacted by any other Office.* The charge upon each Policy is thereby so much reduced as to account for the magnitude of the Bonus which has been declared, and to afford a probability that a similar rate will be maintained at future Divisions.

This Corporation affords to the Assured a liberal participation in Profits, with exemption under Royal Charter from the liabilities of Partnership;—a rate of Bonus equal to the average returns of Mutual Societies, with the guarantee not afforded by them, of a large invested Capital-Stock;—the advantages of modern practice, with the security of an Office whose resources have been tested by the experience of nearly a Century and a half.

* * * The Medical Attendants of persons proposed for Assurance are always consulted by the Corporation, and remunerated for their Reports. This Office was the first among the leading Companies to adopt the practice.

FIRE BRANCH.

Insurances against Fire are received upon nearly all descriptions of property in the United Kingdom, the Colonies, and most Foreign Countries; the rates of premium are exceedingly moderate, and governed in each case by a careful consideration of the risk proposed.

The Fire premium in 1856 amounted to no less than £151,733, thus placing the Company among the very largest Offices in the Kingdom.

LIFE BRANCH.

The rapid growth of this Branch is shown by the NEW business alone of the past Three years—

Year ending	No. of Policies.	New Premiums.
1854	396	yielding £4,567
" 1855	654	" 8,370
" 1856	758	" 11,864

The great increase of new business in the last two years is consequent on the magnitude of the Bonus in 1855, being no less than £2 per cent. per annum on the sum assured—ONE OF THE LARGEST EVER DECLARED.

The most important element of this high prosperity has been the small amount of general expenditure charged against the Life branch, from the Fire department having borne, through its extraordinary magnitude, by far the larger portion of the charges indispensable to every Office, leaving the Life department comparatively unweighed by expense. Thus only could so large a Bonus have been declared.

Messrs. Tatham, Upton, Upton, and Johnson, 20, Abchurch-lane.

This Company offers the security of a large paid-up Capital, held in Shares by a numerous and wealthy Proprietary, thus protecting the Assured from the risk attending Mutual Offices.

There have been three Divisions of Profits, the Bonuses averaging nearly 2 per cent. per annum on the sums assured from the commencement of the Company, or from 30 to 100 per cent. on the premiums paid.

Sums Assured.	Bonuses added.	Payable at Death.
£5,000	£1,987 10 0	£6,987 10 0
4,000	1,590 0 0	5,590 0 0
3,000	1,192 10 0	4,192 10 0
2,000	795 0 0	2,795 0 0
1,000	397 10 0	1,397 10 0
500	198 15 0	698 15 0

To insure 100*l.* payable at death, a person aged 21, pays 2*l.* 2*s.* 4*d.* per annum; but as the profits have averaged 1*l.* 18*s.* 4*d.* per cent., per annum, the additions in many cases have been almost as much as the premiums paid.

The Premiums, nevertheless, are extremely moderate, and only one half the Annual Premium need be paid for the first five years, when the Assurance is for life.

Loans granted on approved personal security.

Parties effecting Policies with this Office in Scotland will secure every facility and advantage which they can obtain by assuring with an exclusively Scotch Office.

Prospectuses and every information afforded, on application at the Office, in London.

SECRETARY.—Michael Elijah Impey, Esq.

Life Assurance Companies may be placed among the most useful institutions of modern times, and their increase shows that their value is daily becoming more appreciated. A very large proportion of the property of this kingdom is comprised in Entailed Estates, Estates held by persons as Tenants for Life, Chnreh Property, Pensions, Annuities, Money receivable under Wills, &c.; all showing the importance of these Societies to the more opulent classes, while, in the middle ranks of society, there are now but few whose means of supporting their families depend upon their own personal exertions, or are derived from incomes which cease at their deaths, who do not gladly seize upon the means thus afforded them of leaving some provision for the future maintenance of their surviving dependants; in short, there are but few situations in life in which it is not desirable, at some period, to enter into a contract for Assurance.

ONE-FIFTH of the ascertained Profits of the five preceding years is divided between the Policy-holders and Shareholders; three-fourths to the former, and one-fourth to the latter. The remaining four-fifths are set apart to enter into the averages of the preceding years, and thus to provide against unforeseen contingencies.

The Assured have the option of appropriating their Profits to the immediate redemption of their Premiums, or as a Bonus to the Sum Assured.

Persons proposing Assurances will not be subjected to any unnecessary form or delay, and females will not be required to appear before the Board, but may attend the Medical Officer at his residence, or be attended by him at their own.

When application is made for assuring a life subject to more than ordinary hazard, an augmented premium, proportionate to the increased risk, will be charged, which will be regulated by the strictest attention to justice between the Society and the Assured.

All Policies, becoming Claims, will be discharged within three months after the decease of the Assured shall have been proved to the reasonable satisfaction of the Directors.

Policies are granted in London, and by resident Committees at Calcutta, Madras and Bombay, on Indian risks, at very advantageous rates, calculated from the records of the East Indian Government, showing the true risk of life during residence in India, and after retirement from foreign service.

AGENTS IN INDIA.—MESSRS. BRADDON and Co., Calcutta; MESSRS. BAINBRIDGE and Co., Madras; MESSRS. LECKIE and Co., Bombay.

All Medical fees and Policy Stamps paid by the Office.

DR. LITTLE ON DEFORMITIES.

In 8vo, with 160 Engravings and Diagrams, price 15s., cloth,

ON THE NATURE AND TREATMENT OF THE DEFORMITIES OF THE HUMAN FRAME,

By W. J. Little, M.D., Physician to the London Hospital, Founder of the
Royal Orthopædic Hospital, &c.

CONTENTS.

- I. Deformities in general.
 - II. Contractions from Wounds and Diseases of Joints, Accidents, Rheumatism, &c.
 - III. Contractions from Spasm, Paralysis, Burns, Habitual Retention in One Position.
 - IV. Deformities from Rickets, Weakness, and Curvatures of Bones.
 - V. Congenital Distortions and Dislocations, Club-Foot, Club-Hand, &c.
 - VI. Congenital Malformations, Monstrosities.
 - VII. Distortions of the Spine, Lateral, Angular, Rachitic, &c.
- Appendix :—On Relapsed and Neglected Cases. Index.

"Dr. Little has brought together from all sources the existing knowledge of the profession regarding the nature and treatment of deformities; and he has also contributed not a little information from the stores of his own abundant and enlightened experience."—*'Association Medical Journal.'*

"This is a great work—great, because it is a practical treatise on every possible form of distortion and malformation to which the body is liable, with minute instructions as to the remedy of such as can be benefited by art..... Dr. Little in this edition presents himself, laden with experience and fortified at every point by a careful series of observations, the value of which is apparent to the reader in passing from one page to another."—*'Boston (U.S.) Medical and Surgical Journal.'*

"Certainly the most complete treatise we possess on deformities, every page bears marks of the good sense of the writer, and of his profound acquaintance with the subject."—*'British and Foreign Med. Chir. Review.'*

"Dr. Little's labours have largely contributed to the extension and perfection of the modern methods of healing the deformities of the human frame. In all that relates to the pathology and cure of these affections he is second to none as an authority, and the present edition will enhance his already high reputation. We unreservedly commend Dr. Little's production as the best treatise on the subject in any language."—*'The Lancet.'*

"A sound and judicious practical treatise."—*'Medical Circular.'*

".....This extract will give a good idea of the useful and practical manner in which Dr. Little's book is written."—*'Med. Times and Gazette.'*

"Certainly the most complete work on the subject in the language."—*'Philadelphia Medical Examiner.'*

Demonstrators of Anatomy—Henry Tyrrell, L.R.C.S.I., and Francis B. Quinlan, A.B., M.B., T.C.D., L.R.C.I., Assistant-Surgeon to St. Vincent's Hospital, and Medical Officer to the North Dublin Dispensary, Blackhall-street.

TERMS OF ATTENDANCE.

Qualified Matriculated Students, Free; Non-matriculated Students, 2l. 2s. for each Course.

At the termination of the Session Public Examinations will be held, when, in addition to the usual Prizes in each class, Three Gold Medals will be awarded for the best answering in the following combined subjects:—

1. Anatomy, Physiology, and Chemistry.

2. Surgery and Practice of Medicine.

3. Chemistry, Materia Medica, and Medical Jurisprudence.

The Examinations consist of three parts—Written, *Vivâ Voce*, Practical or Demonstrative.

The School is in a central situation, and within a few minutes' walk of the principal Hospitals of the city. An extensive and most complete Laboratory has been fitted up, in which students can pursue the study of Practical Chemistry, Pharmacy, and Toxicology under the superintendence of the respective Professors.

The certificates issued for attendance on Lectures at this School are fully recognised and received by the King and Queen's College of Physicians in Ireland, the Colleges of Surgeons of Dublin, London, and Edinburgh, the Queen's University in Ireland, the Universities of London, Glasgow, Aberdeen, and St. Andrew's, the Faculty of Glasgow, the Army, Navy, and East India Medical Boards, and by the Apothecaries' Halls, Dublin and London.

The Summer Session, of which due notice will be given, will commence in April, 1858. It will include Lectures on Practical Chemistry, Materia Medica, Medical Jurisprudence, Botany, Natural History, and Comparative Anatomy.

Further particulars may be learned from the Honorary Secretary, Dr. Robert Cryan, 1, Hardwicke-place, or from any of the other Professors.

Logic and Metaphysics—Thomas W. Moffett, LL.D.

The Matriculation Examinations, in the Faculty of Medicine, commence on the third Tuesday of October.

Additional Matriculation Examinations are held on the 24th of November.

Matriculation is necessary for those Students only who intend to proceed for the degree of M.D. in the Queen's University, or to become candidates for Scholarships, Exhibitions, or Prizes in the College.

SCHOLARSHIPS AND EXHIBITIONS.

In the Faculty of Medicine Six Junior Scholarships, of the value of £20 each, and Six Exhibitions of the value of £15 each, are appropriated as follows :—Two Scholarships and Two Exhibitions to Students of the first, second, and third years, respectively. Also, Two Senior Scholarships of the value of £40 each, and Two Exhibitions of the value of £25 each, are appropriated to Students of the fourth year.

In addition to the Scholarships and Exhibitions above mentioned, Prizes are awarded by each Professor at the close of the Session.

Scholars of the first, second, and third years, are exempted from a moiety of the Class Fees.

The Medical School of the Queen's College, Galway, affords every means for the acquisition of Medical and Surgical knowledge.

MUSEUMS.—An extensive Museum, illustrative of *Anatomy and General Pathology, Materia Medica and Toxicology*, has been provided; and to facilitate the study of the *Obstetric* branch of Medical Science, the College has purchased the *Montgomery Museum*.

HOSPITALS.—The Hospitals, to which Students are admitted, contain TWO HUNDRED BEDS, and are visited every morning by the Medical Professors, who deliver Clinical Lectures.

In order to induce Medical Students to attend the practice of the Hospitals during the entire course of their Education, the Fee for Hospital Attendance and Clinical Lectures conjointly has been reduced to £2 for each Session.

COLLATERAL SCIENCES.—Laboratories and every requisite appliance exist for the cultivation of Chemistry and Natural Philosophy. The College is furnished with a Museum of Natural History, and a Botanical Garden. Botanical excursions are conducted by the Professor in the proper season.

Further information may be had on application to the REGISTRAR, from whom Copies of the Prospectus may be obtained.

By order of the President,

WILLIAM LUPTON, M.A., Registrar.

DR. STEEVENS'S HOSPITAL, AND MEDICAL COLLEGE.

W. E. STEELE, M.D.,

Fellow and Registrar of the King and Queen's College of Physicians in Ireland.

ABINGTON ABBEY

(NEAR NORTHAMPTON),

Established for Patients labouring under MENTAL DERANGEMENT, and conducted by THOMAS PRICHARD, M.D., Fellow of the Royal College of Physicians, Edinburgh, and formerly Medical Superintendent of the Glasgow Royal Asylum for Lunatics.

For terms and further information, apply to Dr. Prichard, Abington Abbey, Northampton.

MUNSTER HOUSE, NEAR FULHAM,

THREE MILES FROM HYDE-PARK CORNER,

For the Care and Recovery of Nervous, Epileptic, and Insane Gentlemen.

Proprietor, Mr. CYRUS ALEXANDER ELLIOTT, Surgeon, late of
Cowper House, Old Brompton.

ESTABLISHED 1825, FOR PRIVATE PATIENTS ONLY.

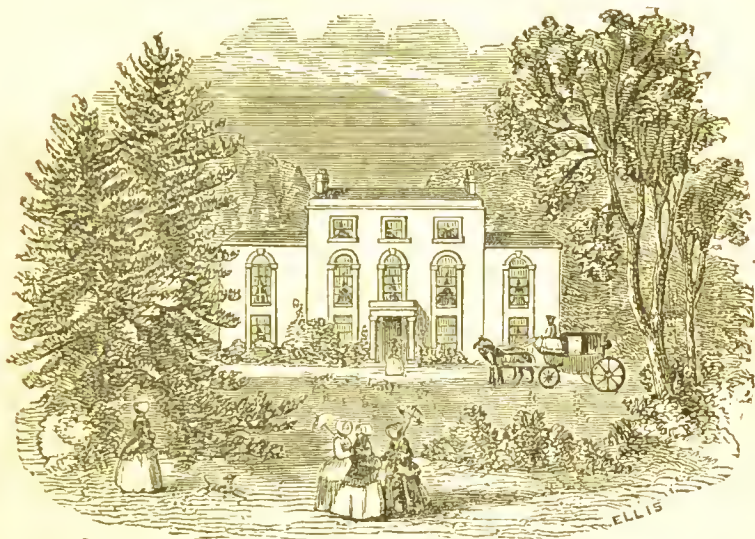

MUNSTER HOUSE, once the Hunting Seat of his Majesty King Charles II, contains twenty-nine rooms, and is situated on the road from London to Fulham, in the highest and healthiest part of the parish, and upon a gravelly soil. The pleasure grounds are eight acres, entirely walled in, ornamented with fountains and gold fish, statuary and rockwork, terraces and parterres, conservatories and summer-houses, and studded with noble trees and flowering shrubs; the whole offering most cheerful inducements for recreation, exercise, and amusement, which consists of a Bowling-green and Bowling-alley, Swings and Roeking-horses, Billiard and Reading-rooms, with Newspapers, Periodicals, and Musical Instruments, and a Library well stored with books.

An additional House (not seen in the view) has been built, containing a Hall, large and lofty Dining, Sitting, and Bed-rooms, seventeen separate rooms, Washing and Bath-rooms; the whole erected, arranged, heated, ventilated, and lighted with gas, under the sanction and advice of the Commissioners in Lunacy.

This Establishment has the advantage of being near to London, and yet as rural as any of our country villages. It is easy of access for Professional and other visits, by the Putney Omnibuses, every ten minutes from the Bank and London-bridge Railway Station, and it is also within three-quarters of a mile of the Putney Station upon the Windsor Railway.

EFFRA HALL, NEAR THE CHURCH, BRIXTON,

THREE MILES FROM THE BRIDGES,
For the Cure and Recovery of Nervous, Epileptic, and Insane Ladies.
ESTABLISHED AT COWPER HOUSE, OLD BROMPTON, 1825,
FOR PRIVATE FEMALE PATIENTS ONLY.
Proprietor, Mr. CYRUS ALEXANDER ELLIOTT.

The House, surrounded by its Lawn, walled-in Gardens, Meadow, and Orchard of Five Acres, has long been admitted to be one of the most beautiful and secluded residences in this well-known healthy locality, proverbial for its pleasant walks and varied scenery. The greatest care has been taken to render this an Establishment for Recovery and a Domestic Home, rather than an Asylum in the general acceptance of the term; and being exclusively for the reception of Females, a greater extent of Liberty and Recreation is available than can possibly be obtained in houses where both sexes are admitted. The additions and detached buildings have been erected at considerable expense, on the most approved plans.

The Faculty and the friends of patients are invited to view, in Effra Hall and Munster House, the arrangements expressly made for the various forms of Mental Disease, which have, by experience, been found to assist so materially the Medical and Moral Treatment, by affording Classification to the Insane, Quietude to the Nervous, and to the Epileptic those accommodations which are so particularly required. The number of Recoveries in these Establishments has not been exceeded by any others, and restraint is not nor has been used in any case.

Those patients whose cases permit are allowed (accompanied) to walk and ride into the country, and attend Divine Worship; and if change of air is considered requisite, will, by the request of their friends, be sent to the Sea Coast. The proprietor has a cottage always in readiness for a case not admissible into an Asylum.

Omnibuses pass Effra Hall every Five Minutes, from the City and Oxford-street.

For the Terms (which are more moderate than in most private Houses), and Attendants, apply to Warren H. Diamond, M.R.C.S. and L.S.A., Medical Superintendent, as above, or to Munster House; and to W. V. Pettigrew, M.D., F.R.C.S. of England, 7, Chester-street, Grosvenor-place.

PRIVATE INSTITUTION FOR THE TREAT- MENT OF THE INSANE, SANDYWELL PARK.

NEAR CHELTENHAM, GLOUCESTERSHIRE.

CONDUCTED BY DR. MITCH

(Many years Physician to the Gloucester County Lunatic Asylum).

SANDYWELL PARK has been long known as one of the most admired and healthful residences in the county of Gloucester. The Mansion is situated in a finely-timbered Park of 120 acres in extent, with Gardens, Plantations, and a Farm attached to it. It is on the Cotswold Hills, overlooking the Vale of the Severn, amidst varied and beautiful scenery; and though only five miles from Cheltenham, is perfectly secluded, and affords every facility of access without publicity.

The Mansion has been much improved and considerably enlarged, and by means of additional buildings has been made to consist of two houses attached to each other, effecting not only a separate residence for the two sexes, but a complete classification of patients, with accommodations for either sex, on any required scale; whilst the arrangements are such as to afford separation or social intercourse, according to the varied condition of each invalid, or the wishes of the relatives or friends.

This Institution, therefore, possesses all the requisites for the successful treatment of every form of mental disorder. It embraces the means of domestic quiet, privacy, and security from observation, without close confinement; facility for exercise of all kinds in the open air, and of amusements within doors, suited to the wants as well as to the tastes and habits of the invalid; and as the Physician and his family reside in the house, and live with the patients, the establishment assimilates itself to that of a country gentleman, with this advantage, that it combines the solace of domestic life, and the benefits of social communion, with the indispensable watchfulness of the *medical* eye.

There are also separate houses on the Estate for those Patients whose friends wish them to avoid association with others.

A Chaplain is also attached to the Establishment.

The Commissioners in Lunacy report, at their visit in March, 1848, "That the arrangements appear to be extremely judicious, and that altogether they have never seen any Private Establishment with which, in point of situation, construction, and means of varied exercise and amusements, they have had greater reason to be satisfied."

For any other particulars, or for terms (which will depend on the accommodations required), applications made to Dr MITCH, Sandywell Park, near Cheltenham, will receive every attention.

PRIVATE LUNATIC ASYLUM, FARNHAM HOUSE, FINGLAS.

RESIDENT MEDICAL ATTENDANTS.

JAMES DUNCAN, Sen., M.D., and
NUGENT B. DUNCAN, M.B., F.R.C.S.I.

This Establishment, which has now been opened upwards of thirty-eight years, is situated about three miles from Dublin, and presents many advantages as a place of residence for persons labouring under mental diseases.

The house itself is placed in a cheerful situation, where it commands an extensive view of the Dublin Mountains; while the extent of its accommodation admits of a regular classification of the inmates according to the nature of their malady.

There is a house for the reception of a limited number of females (with gardens and exercising grounds entirely separated from the male establishment), who are attended exclusively by females.

Several large and distinct exercise grounds are attached to the various divisions of the building, so that no intercourse between the patients of the different classes is permitted to take place which might have an injurious effect upon any of them. There are also separate buildings for the removal of the noisy patients.

The medical Attendants reside constantly in the Asylum, and thus, besides devoting their own time and energies to promoting the comfort and recovery of the invalids entrusted to their care, by their very presence tend to prevent the occurrence of those abuses which so often arise from the ignorance or improper conduct of ordinary attendants.

A billiard-table, spring-board, and other exercises suitable to the house, are provided for the use of the inmates when the state of the weather prevents their going out; while other occupations engage their attention in the various exercise grounds.

Newspapers, Periodicals, and the use of an extensive Library, are permitted to such patients as may be capable of deriving advantage from them.

Music, cheerful society, and interesting amusements occupy the evening.

Provision is also made for the regular attendance of Chaplains of the different Persuasions and their performance of Divine Service in the house—while those whose state admits of it attend Public Worship in the neighbourhood, and are taken on excursions, and to places of public amusement.

Further particulars may be known on application to Dr. DUNCAN, either at the Asylum, or 39, Marlborough-street.

ARDEN HOUSE, WARWICKSHIRE.

PRIVATE ASYLUM for the cure and care of a very limited number of persons, of the higher classes, labouring under Mental and Nervous Affections. Established by the late Mr. BURMAN, and now in possession of GEORGE RUSSELL DARTNELL, M.R.C.S. Engl., Deputy Inspector General of Army Hospitals, H.P., and lately Staff Surgeon Superintendent of the Government Asylum for Military Lunatics.

ARDEN HOUSE,—centrally situated in one of the Midland Counties, in the neighbourhoods of Warwick, Leamington, and Stratford-on-Avon,—stands upon elevated ground, in a peculiarly healthful and picturesque locality. The Grounds and Gardens are very extensive, tastefully laid out, and planted; there are no boundary walls, or other objects calculated to impart a prison-like appearance to the mansion, which simply resembles that of a country gentleman. The present proprietor is a married man, whose family have been accustomed to study the comforts and amusements, and soothe the minds of persons suffering from impairment of the mental powers; and few circumstances, it is well known, conduce more to the recovery of the insane than cheerful association (properly regulated) with young persons in a normal state of mental health.

References and Testimonials of the most unexceptional character can be given.

Address, ARDEN HOUSE, HENLEY-IN-ARDEN, BIRMINGHAM.

BENSHAM ASYLUM, GATESHEAD-ON-TYNE.

This Asylum, which is pleasantly situated on an eminence commanding extensive views of the Tyne and Ravensworth Vallies, has recently been transferred, with the licence, to Dr. GEORGE ROBINSON, of Newcastle-on-Tyne, under whose constant superintendence the friends of persons mentally afflicted may rely upon their being treated with the utmost attention and humanity. There are now several vacancies for private patients, of all classes, there being no longer any contract for the reception of pauper lunatics, and the whole arrangements of the Asylum having been greatly improved.

For terms, &c., apply to Dr. GEORGE ROBINSON, at the Asylum, or at 25. Eldon-square, Newcastle-on-Tyne.

BURMAN HOUSE LUNATIC ASYLUM, HENLEY-IN-ARDEN, WARWICKSHIRE,

CONDUCTED BY

GEORGE FAYRER, M.D., F.R.C.S., Resident Proprietor.

Patients of both sexes will be received into the above very old-established Asylum for the treatment of Mental Derangement.

* * * Henley-in-Arden is situate in the county of Warwick, is fourteen miles from Birmingham, eight from Stratford-on-Avon, eleven from Leamington, and nine from Warwick.

November, 1857.

PRIVATE ASYLUM FOR MENTAL DISEASES.

CITTADELLA, BLACK ROCK ROAD, CORK.

Proprietor and Resident Physician—JOSHUA BULL, A.B., M.D.

This Institution continues to be conducted on the same system which has been hitherto attended with such very great success, the unusually large proportion of cures being attributable to the total absence of bodily restraint, to the uniform kindness and liberality of treatment, and the arrangement of the buildings and grounds admitting of a proper system of classification. A detached building for convalescent ladies is nearly completed. It has a sheltered southern aspect, and will be provided with every requisite comfort.

DROITWICH ASYLUM.

Established in 1791.

Many and great Improvements having taken place in this Establishment, it is now licensed to Sir Charles Hastings, M.D., D.C.L., and Mr Martin Ricketts, F.R.C.S., for the reception of private Patients only.

The Grounds are well arranged and extensive, which, combined with moderate charge for Board and Medical Attendance and the great preponderance in the proportion of cures over that of mortality, render it an Establishment well suited for the recovery of the Insane.

The Terms and Forms of Certificates may be obtained on application to Mr Francis I'ou Bennett, M.R.C.S., Medical Superintendent, Asylum Droitwich.

PRIVATE HOUSE OF RETIREMENT

(For the reception of Insane Persons of both Sexes),
DUNNINGTON HOUSE, NEAR YORK.

This Establishment is in a retired and healthy situation, about four miles from York; its domestic comforts, gardens, and pleasure grounds attached, render it equal to any other Establishment in the kingdom. The Patients are under the immediate superintendence of Mr. and Mrs. Hornby, and partake of all the enjoyments of a domestic life. The amusements are varied and numerous. The Billiard Table and Bowling Green afford ample exercise for those whose unhappy situation renders walking or riding exercise from home improper. The house is attended by an eminent Surgeon, *but the friends of any Patient may make their own choice of a Medical adviser when occasion requires.* Patients attended from their own residences. Travelling expenses only charged. The terms will vary according to the accommodation required.

RETREAT FOR MENTAL INVALIDS,

EARL'S-COURT HOUSE, OLD BROMPTON.

Ladies suffering from Mental and Nervous Disorders will find a most desirable home, with extensive Pleasure Grounds, an easy and convenient distance from London, where there is cheerful society, and every comfort and amusement studied.

Terms, regulated by the accommodation required, can be had on application, or forwarded by post, with the highest testimonials from the leading members of the Medical Profession.

PRIVATE RESIDENCE FOR MENTAL INVALIDS.

At ACOMB HOUSE, two miles from York, Twelve Patients, of the Upper and Middle Classes, are received by Mr. J. W. METCALFE, M.R.C.S., &c., formerly for many years Medical Superintendent of the York Asylum, and Senior House Surgeon of the Southern Hospital, Liverpool.

Mr. METCALFE resides at Acomb House.

ELM HOUSE ASYLUM,

QUEEN'S ELM, BROMPTON, NEAR LONDON.

Established by Miss ELLIOTT, 1840

Miss ELLIOTT continues to receive a limited number of Ladies mentally afflicted. The arrangements are conducted upon the plan of a private family, combining Medical and Moral Treatment. The House and Grounds are pleasantly situated, and have been recently much enlarged and improved. Experienced Nurses sent to any part of the country.

PRIVATE ASYLUM FOR THE INSANE,

FAIRFORD RETREAT, FAIRFORD, GLOUCESTERSHIRE.

The above Establishment has been conducted by the present Proprietors for upwards of a quarter of a century, and possesses an uninterrupted series of favourable Reports from the Commissioners in Lunacy, the Visiting Justices, and from Recovered Patients and their Friends.

Terms moderate, and varying according to the accommodation required.

For particulars apply to Messrs. ILES, the Proprietors.

GROVE HALL ASYLUM,

BOW, LONDON.

The arrangements in this Asylum for Private Patients have been much increased, and are specially adapted for the accommodation of patients from the middle classes of society.

Terms, from One to Two Guineas per week.

The Asylum is within three minutes' walk of the Bow Station of the Camden Town Railway from Fenchurch street, and is one mile from the Stratford Station of the Eastern Counties Line.

Further particulars may be obtained on Application to the Proprietor or Resident Medical Superintendent.

GROVE HOUSE ASYLUM,

ACOMB, NEAR YORK,

Is pleasantly situated on an eminence commanding an extensive view of the surrounding country. It has a regular Medical Attendant, and the comfort of Patients is secured by the personal superintendence and management of Mr. and Mrs. PEARSON. Being situated within two miles of York, the Asylum is easily accessible. For terms, apply to the Proprietor, Mr PEARSON, Grove House, Acomb, York.

MENTAL AND NERVOUS AFFECTIONS.

HALLIFORD HOUSE, SUNBURY, MIDDLESEX.

This beautiful and secluded residence, standing in a small park of eighteen acres, and convenient of access, either by omnibus or railway, is appropriated to the reception of a limited number of patients suffering under the milder forms of Mental disorder. They have the advantage of the constant personal care and companionship of the Resident Physician and his family, and in all the arrangements relating to their domestic and moral management, great care is taken to avoid whatever may be calculated to remind patients of the circumstances necessitating their temporary separation from family and friends. They have also the advantage of cheerful society, carriage exercise, and a variety of amusements—chess, billiards, archery, &c.—and, in any case requiring it, a separate suit of apartments is available.

Terms and other particulars may be learned upon application to Dr. SEATON, the Resident Proprietor.

Dr. S. is at liberty to refer to several leading London Physicians, amongst others, to Dr. Roots.

HAYDOCK LODGE,

ASHTON-IN-MACKERFIELD, LANCASHIRE,

Two Miles from the Newton Bridge Station, on the Manchester
and Liverpool Railway.

ASYLUM FOR MENTAL AND NERVOUS COMPLAINTS

UNDER THE SUPERINTENDENCE OF MR. AND MRS. SUTTON.

Visiting Physician.—F. RENAUD, Esq., M.D., Manchester.

Resident Surgeon.—T. WHITE, Esq.

Chaplain.—The Rev. EDW. PIGOT, M.A.

This Mansion, pleasantly situated in an extensive park about three miles in circumference, and lying in a retired district, midway between Newton-le-Willows and Ashton-in-Mackerfield, possesses many natural advantages for the treatment and cure of persons afflicted with mental disorders. The soil is sandy, and lies on the red rock,—a circumstance that implies freedom from humidity and purity of water.

HAYDOCK LODGE, having been built about sixty years ago as the country seat of an opulent gentleman, is arranged internally and externally so as to ensure a large amount of domestic comfort. The day rooms are large and lofty, and the sleeping apartments numerous and perfectly unexceptionable. Extensive lawns and woodlands surround the house, and a garden, four acres in superficial area, adjoins it. To these, as well as to the park, Patients have free access, under proper superintendence. There is also a farm of nearly sixty acres, upon which the Gentlemen Patients are very generally induced to employ themselves.

The alterations within the Mansion have been such only as were necessary to ensure domestic comfort and classification. Altogether, the house resembles a large private residence, rather than a public institution.

Out-door exercise, as an occupation, forms an essential part of treatment, when the weather is fair; and when the days are unpropitious, in-door amusements are substituted.

The religious wants of such of the Inmates as are in a fit state are provided for by the Rector of the parish.

The highest Medical and general references can be given, and further particulars, and blank forms of certificates, may be had on application to the Superintendent, whether personally or by letter.

LONGVILLE HOUSE,

NEEDHAM MARKET, SUFFOLK.

A place for the temporary reception of Invalids, or Convalescents, previous to their restoration to their friends, has long been a desideratum; and it is an established fact, that in a large proportion of cases, a sudden change from strict confinement to absolute liberty has been followed by a return of the mental affliction. In order to diminish the frequency of these relapses. Dr. BEDINGFIELD purposes to receive patients when discharged from Asylums as cured, for one, two, three, or more months, according to requirements.

Dr. BEDINGFIELD also receives patients who may manifest early symptoms of mental alienation, and who may reasonably be expected to be benefited by a temporary separation from their friends, but whom it would be unnecessary to subject to personal restraint.

NERVOUS AND MENTAL DISEASES.

HARTFIELD HOUSE, DRUMCONDRA, DUBLIN.

ESTABLISHED, A.D. 1843.

This Retreat, surrounded by handsome pleasure grounds and gardens, having all the character of an elegant private residence, and free from any appearance of an Asylum, is conducted on the most improved modern system.

The practice of non-restraint is strictly adhered to, which, with the mildest and most soothing treatment, and the absence of every thing having the least appearance of coercion, has always been productive of the best results, as is testified by the large proportion of Patients annually restored to mental health and vigour.

The classification of disease is also carefully attended to; those afflicted with idiotey and violent mania being *totally* separated from those whose malady is of a milder form.

There is a separate wing appropriated to the reception of Ladies, amongst whom classification is also particularly observed.

Persons to whom complete privacy is an object, and whose peculiar tastes render such an arrangement desirable, are allotted a suite of apartments, with attendance, etc., quite distinct from the ordinary routine of the house.

The greatest facilities for carrying out the above system are afforded by the size and architectural arrangement of the Establishment.

Doctor Lynch and his family reside constantly on the premises, and devote their entire attention to the care of their Patients.

More detailed information will be given on application to the Proprietor.

COUNTY OF HADDINGTON, EAST LoTHIAN.

A Home for Invalids of both sexes, where all the arrangements are conducted in a way so as to resemble as near as possible a Private Family.

The House is situated in a very healthy locality, ten miles east of Edinburgh; the Garden and Grounds well enclosed, giving full scope for out-door exercise and amusements.

The Proprietor has had long experience in the management of the Insane, and his whole attention is devoted to their comfort and restoration.

Terms for Board, Clothing, and Medical Attendance, from 30*l.* to 40*l.* per annum. For extra accommodation, &c. &c., a higher rate is charged.

Referencees to the Sheriff of Haddingtonshire, or any of the Medical Gentlemen in the locality.

For further particulars, apply to GEORGE DAVIE, Proprietor.

INSANITY.

TUE BROOK-VILLA, GREEN-LANE,

SITUATED ABOUT THREE MILES FROM LIVERPOOL.

Erected expressly for the care and cure of those invalids, of both sexes, whose mental afflictions render absence from home desirable and necessary.

This House is in the Italian style of Architecture, light and airy throughout; its various Corridors, Sitting and Bed-rooms, commanding extensive views from all the windows and from the Garden and Pleasure Grounds.

The internal arrangements are complete, where everything is combined with the kindest care and attention, for the restoration of the unhappy invalids.

Mr. and Mrs. Owen have had upwards of twenty years' experience in the care and treatment of the Nervous, and those mentally afflicted.

The terms vary according to the circumstances and accommodation required. Experienced attendants sent to remove invalids if required.

CROSSE AND BLACKWELL,

Purveyors in Ordinary to Her Majesty, respectfully invite attention to their PICKLES, SAUCES, TART FRUITS, and other table delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. The practice of colouring pickles and tart fruits by artificial means has been discontinued, and the whole of their manufactures are so prepared that they are not allowed to come in contact with any deleterious ingredient. A few of the articles most highly recommended are, Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Jams, Jellies, Orange Marmalade, Anchovy and BLOATER Pastes, Strasbourg and other Potted Meats, and Calf's-foot Jellics of various kinds for table use. C. and B. are also sole Agents for M. Soyer's Sauces, Relish, and Aromatic Mustard; and for Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. The above may be obtained of most respectable Sauce Vendors throughout the United Kingdom; and wholesale of

The objects of the Society are—

1st. To provide a safe and efficient medium by which the Medical Profession may secure more certain and regular payment for their services; with every consideration for the convenience of those who are willing, but unable, directly to discharge their liabilities; with rigour from those who are able, but have not the disposition to remunerate medical men.

These ends to be accomplished without interfering with the valuable time of the Members of the Profession, or exposing them to the unpleasantness which necessarily attends applications for money, or to the uncertainty and risk of employing private collectors.

2nd. To assist members with information and advice in the purchase and sale of practices.

3rd. To raise a Benevolent Fund by devoting to that object the profits arising from the general operations of the Society.

The Society consists of qualified Medical Practitioners *only*. Annual subscription, One Guinea; a firm, consisting of two partners, a Guinea and a half; a firm of three partners, Two Guineas.

The general business is carried on by a staff of officers at the central office, 43, Lincoln's-inn-fields, together with trustworthy employes appointed in town and country, the whole of whom are under the direction and superintendence of the Committee.

The Metropolitan Members of the Committee, with the Trustees, are responsible for all moneys received by the Staff.

THE MEDICAL PROFESSION, at the suggestion of an old and valued Member, have endeavoured to found an Asylum for those of their Brethren who, from ill health, want of success, or other adverse influences, have sunk into poverty, and for the Widows of Medical Men in reduced circumstances; with this is combined a School, devoted, in part, to the gratuitous education of Orphans of Medical Men. The purposes are as follows:—

FIRST,—To maintain an Asylum, in which 100 Pensioners, who must be duly-qualified Medical Men, or their Widows, not under 50 years of age (possessing incomes of at least £15 a year), shall be provided with three furnished rooms each, and with such additional assistance and accommodation as the funds may permit.

SECONDLY,—To provide a School, in which a liberal education will be given to 200 boys, the Sons of duly qualified Medical Men; thirty-five of whom will be educated, boarded, clothed and maintained entirely at the expense of the Institution, while the remainder will be charged at the lowest rate which is found to be practicable.

THIRDLY,—To grant Annuities, and occasional pecuniary assistance to distressed Members of the Medical Profession or their families, as the funds of the College may from time to time permit.

There is a Chapel for Divine worship, according to the ritual of the Church of England.

Donors of TEN GUINEAS are Life Governors of the College; Subscribers of ONE GUINEA Annually are Governors during the continuance of their Subscription. All Subscriptions are payable in advance on the 1st of January in each year.

The Governors vote by ballot, either personally or by proxy, and have votes in the proportion of one for each GUINEA subscribed annually, for every TEN GUINEAS given, for every TWENTY GUINEAS collected.

Any information with regard to the details of the Institution will gladly be communicated to parties addressing inquiries to the Secretary, at the Offices of the College, 37, Soho-square, by whom Subscriptions and Donations will be thankfully received. Subscriptions will also be received by the Treasurer, the Members of the Council, the Honorary Local Secretaries, and the following Bankers:—Messrs. Goslings and Sharpe, 19, Fleet-street; Coutts and Co., 59, Strand; Drummonds, Charing-cross; Glyn and Co., 67, Lombard-street; Scott and Co., Cavendish-square; Hoare and Co., Fleet-street; the Union Bank of London, Regent-street Branch; Williams, Deacon, Labouchere, and Co., Birehin-lane; and Cunliff and Co., Manchester.

JAMES'S FLVER POWDER.

PHYSICIANS AND OTHER MEDICAL PRACTITIONERS

having complained of the frequent use of Antimonial Powder, instead of the

“ GENUINE JAMES'S POWDER ”

prescribed, have represented to Messrs. NEWBERY that the price of the Powder has greatly led to this fraudulent practice, and has also greatly prevented the more general use of the Powder; Messrs. Newbery have therefore yielded to the suggestions of the Profession, and have reduced the price; and, to secure the use of the genuine medicine, recommend that the same should be prescribed as prepared by Messrs. Newbery from the only copy of the process left by Dr. James in his own handwriting, thus “ Pulv. Jacobi Ver.” (Newbery's).

The price for dispensing will henceforth be reduced from 21s. to 9s. an ounce.

The Genuine has the name “ F. Newbery, 45, St. Paul's, London,” engraved on the Government Stamp.

TO THE MEDICAL PROFESSION.—NOTICE.

WEST-END DISPENSING ESTABLISHMENT.

In consequence of numerous errors which have occurred of late years through the carelessness of inexperienced Dispensers of Medicine, Messrs. CURTIS deem it expedient to reassure the Profession and the Public that their method of transacting business precludes the probability of mistake, thus offering peculiar advantages for the Dispensing of Medicines, and fulfilling the best wishes and interests of the Profession and the Public.

15, Crawford-street, Bryanstone-square.

Messrs. CURTIS

continue to receive the most satisfactory results from Medical Men in favour of “ PASMA ” (or Healing Powder), the Remedy for Excoriations, Burns, Ulcers, and Eruptions; also a Prophylactic of Abrasions in Delicate, Tender, and Irritable Skins. Messrs. Curtis feel called upon to caution Medical Men against spurious imitations, and to inform them that the genuine is not a Metallic Preparation (nor a secret one), the Proprietors having informed the Profession its exact composition. Messrs. Curtis also draw the attention of Medical Men to their LIQUOR OF TARAXACUM DENSLEONIS, of great strength, and free from the inert matter; from the fresh root, and prepared without heat. Also to their EXPRESSED JUICES, LIQUORS, MEDICINAL EXTRACTS, TINCTURES, &c. &c.

DR. JAMES'S FEVER POWDER.

“ Mr. James thinks it necessary to inform the public that he has appointed Messrs. Butler and Harding, Chemists, 4, Cheapside, corner of St. Paul's, London ; and Charles Butler, M.D., 54, Lower Sackville-street, Dublin, his sole Wholesale Agents ; the former for England, Scotland, &c., and the latter for Ireland. Of whom, and of their country agents, the public may obtain the genuine medicines, which are authenticated by the signature of R. G. G. James on the label of every packet, bottle, and box, as under.

“ Mr. James has the testimony of the most eminent Medical men in favour of his medicine, proving that it is far more efficacious in its effects, more certain and more to be depended upon, than any of the spurious preparations to which his name is unjustifiably attached.

PURE COD LIVER OIL.

PREPARED BY

MESSRS. REW AND CO.,

OPERATIVE AND DISPENSING CHEMISTS,

282, REGENT-STREET.

In soliciting the attention of the Medical Profession to our COD LIVER OIL, we beg to inform those gentlemen who may have been disappointed in their experience of this really valuable remedy, that we have been led to adopt measures for procuring an abundant supply of Oil from fresh livers of Cod Fish taken on our own shores, not only that we may be enabled at all times to guarantee its PURITY and FRESHNESS, but also to avoid the sophistication which nearly all the foreign Oil undergoes before it gets to the Patient; this has been particularly noticeable for the last three or four seasons, and to this must be attributed much of the disappointment consequent on the use of this remedy.

We have several instances where the ordinary Oil of commerce has been taken with no other effect than nausea and general disturbance of the system, while the Oil, as PREPARED BY US, has been attended with the most SUCCESSFUL RESULTS.

Having these proofs before us, we feel justified in calling the attention of the Profession to this article, and solicit its more general adoption.

For the use of Patients, it is sold in Bottles (Half-pints, Pints, and Quarts) at 2s., 3s. 6d. and 6s. 6d.

For Surgeons, in Tins containing One or Two Gallons.

STRUVE'S MINERAL WATERS,

ROYAL GERMAN SPA, BRIGHTON,

UNDER HER MAJESTY'S ESPECIAL PATRONAGE.

STRUVE and CO. beg to direct attention to the above establishment, where for nearly thirty years past all the most efficient Mineral Waters have been prepared, and have been admitted by the best English and foreign authorities to be identical in physical properties and medicinal effects with the natural ones. Numerous attempts are, however, made to impose inferior preparations upon the public, by using Struve and Co.'s old bottles, imitating their labels and stamps, and by the use of the designation "*Brighton Seltzer*," "*Brighton Fochingen*," &c., while a careful analysis of some of these, stated to be prepared "according to the most accurate analysis," has shown the total absence of iron in the professed chalybeates, and a general disregard to their true chemical composition.

STRUVE and Co. beg to state that they have not the remotest connection with any of these parties; and respectfully request the public to observe *carefully* that the name of "STRUVE" is on the label as well as on both sides of the red stamp over the cork, which has the words "ROYAL GERMAN SPA, BRIGHTON," beneath the Royal Arms, and that all the half-pint bottles are now simply lettered round the shoulder, "DR. STRUVE'S MINERAL WATERS."

The frauds alluded to relate more particularly to the Seltzer, Fochingen, and Vichy Waters. Orders for Struve's Bottled Mineral Waters continue to be executed by George Waugh and Co., Chemists to the Queen, 177 Regent-street (*West side*), London, and by numerous other respectable houses in London and the provincial towns, where a prospectus may be obtained gratis.

The Pump Room opens in May and closes in November.

THE PROPRIETOR OF KING'S

EFFERVESCENT CITRATE OF MAGNESIA

Respectfully calls the attention of those members of the Medical Profession who have not used this agreeable and mild preparation to the numerous and flattering testimonials which have been given by eminent Physicians and Surgeons in extensive public and private practice, who recommend it as a Saline Aperient and Febrifuge. The proprietor requests a fair trial of its merits, as he does not recommend it as a remedy in any case: therefore it is not a Quack Medicine. He trusts to professional recommendation and approval for its full and fair introduction to general use as a Saline Aperient.

The Testimonials and a sample will be sent post-free on application to the proprietor, WM. W. KING, 15, Percy-street, Tottenham-court-road, London. Sold by all Chemists in London, and throughout the Empire, in Bottles, 1s. 9d., 3s. 4d., and 6s. 3d. each. The large bottles are suited for professional use. A liberal discount is allowed on orders sent direct to the Laboratory as above.

SPIRITS OF WINE FOR THE FACULTY

May always be obtained from us, of extraordinary Strength and Purity, at the lowest remunerative prices, for CASH on delivery.

For Current Quotations, see Weekly Medical Periodicals.

HENRY BRETT and Co., Old Furnival's Distillery, Holborn.

TARRATT'S BANDAGE AND STRENGTHENING PLASTER.

This Plaster, from the nature of the composition, and the material on which it is spread, is adapted for a permanent bandage, as it neither produces irritation of the skin, nor, when applied, does heat cause it to lose its adaptation to the part. Having these qualities, it is peculiarly valuable in the treatment of ulcerated legs, varicose veins, &c., where equal and constant support is required. Several of the most eminent surgeons continue to use this Plaster in their practice, preferring it in certain cases to any other. It is well suited for exportation and use in warm climates, the high temperature having less effect on it than on any other plaster.

The Profession are referred to Messrs. Westwoods & Hopkins, Wholesale Druggists, Newgate-st., where the Plaster may be had in packets, containing three yards, for 2s.6d., or spread upon skins of chamois leather, at 3s.6d.

Westwoods and Hopkins also call attention to their Compound Adhesive Plaster for fractures and wounds, as likewise to their Concentrated Preparations, Essences, &c.

FRANCIS L. PUCKRIDGE,

Sole Inventor and Manufacturer of the late Mr. R. Liston's
WATERPROOF TRANSPARENT ISINGLASS MEMBRANE
PLASTERS.

Now patronised by Mr. Liston's successor, Mr. Quain, in his hospital and private practice; patronized likewise by Mr. W. Fergusson, Surgeon of King's College Hospital, Mr. J. M. Arnott and Mr Wormald, of Bartholomew's Hospital. Used for Amputations and other serious wounds requiring observation without exposure to the air.

F. L. P. begs to state there are two qualities, and it is particularly beneficial for Spinal complaints, Ruptures, or any weakened part; likewise for Burns or Scalds, will remove the pain in a very short time. Also, a defensive Skin, to apply between the wound and the lint, and causes less pain in dressing. Likewise a superior Gauze Lisse, of the same adhesive properties as the Membrane. Also, superior Tinted Court Plasters, and Tinted Gold-beater's Skin, by the yard and in cases.

F. L. P. offers his most grateful thanks for the encouragement and kind patronage he has received from the Medical Gentlemen of England and foreign parts, and hopes to merit a continuance of their favours by manufacturing his Plasters with the same unremitting care as heretofore.

F. L. P. begs particularly to introduce to the surgeon-dentist, for tender gums, a delicate Plaster, that will adhere to the gold or ivory, and at the same time heal and protect the gums from pressure.

May be had of the Proprietor, 4, York-place, Walworth-road, Surgical Instrument-maker, Chemist, &c., with improved directions how to apply.

S. MOULTON AND CO.

Beg to acquaint the Medical Profession and the Trade generally, that they continue to Manufacture India-rubber Hydrostatic Beds and Cushions, free from smell, and suitable for all climates.

S. M. and Co. are the original Manufacturers of these useful articles, which they supply at the same prices as charged by them during the last six years.

Lists of sizes and prices can be obtained at the Manufactory, Kingston India-rubber Mills, Bradford, Wilts.

PATENT SELF-ADJUSTING TRUSSES.

SALMON, ODY, and Co.

Most respectfully inform the Public that their Patent Self-Adjusting Trusses afford more ease and security for the relief of Hernia than any other instrument for the Purpose. They will answer for right or left side, requiring no under-strap or any galling bandage. Persons in the country are requested to send the circumference of the body one inch below the hips.

CAUTION.

As many mercenary Druggists are vending an inferior article, purchasers are requested to observe that "Salmon, Ody, and Co., 292, Strand, London," is marked upon the leather case.

Sold by one or more Druggists in every city and principal town in the United Kingdom.

PATENTEES OF THE
**ELASTIC STOCKING, KNEE-CAP, SOCKS, ABDOMINAL
BELTS, &c.,**

For Varicose Veins, Weak, Swollen, or Dropsical Affections, Accident to the Knee Joint, Increase of the Synovial Fluid, and in all Rheumatic and Gouty Affections.

J. BRADSHAW begs particularly to call the attention of the Profession to the improvements he has made in the above articles, whereby all the objections hitherto existing have been overcome.

J. B. has likewise made arrangements for the Manufacture of all Surgical Bandages in India-rubber, vulcanized on a principle whereby the elasticity is preserved and not affected by climate, the Bandages being all made from patterns taken from each particular case; a perfect fit is secured thereby, preventing the many evils arising from undue pressure being applied to any part, which must always be the case providing the Bandage is not adapted to each particular case.

Prices, which will be found as low as other makers', notwithstanding the advantages offered, together with directions for measurement, will be sent on application, per return of post.

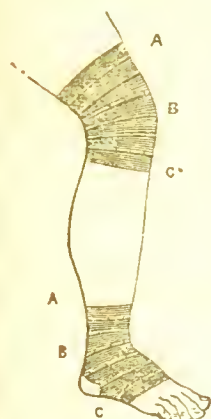

SPARKS AND SON,

Patentees and Manufacturers of the Spiral Elastic Surgical Bandages, Ankle Socks, Leggings, Knee Caps, &c.

SPARKS AND SON,

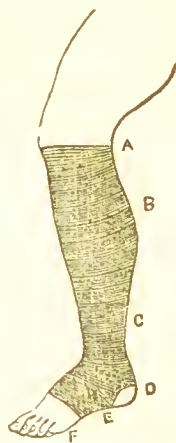

(Established 1830.)

28, CONDUIT-STREET, BOND-STREET, LONDON,

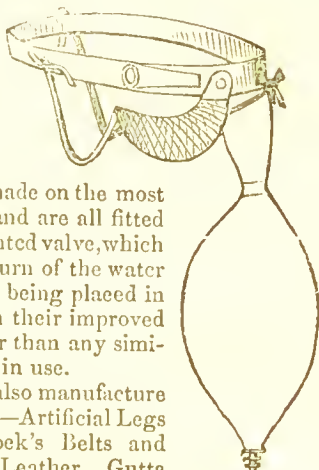

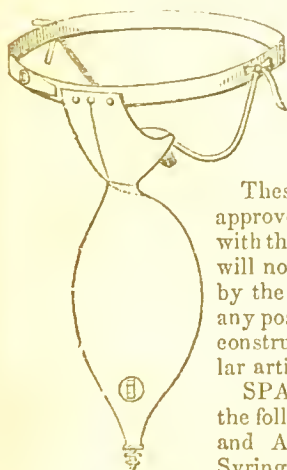

Beg to call attention to their Elastic Stockings, Knee Caps, Ankle Socks, Wrist Bands, &c., made either to lace or draw on without lacing, decidedly superior to any other article now in use, which they have now brought to the greatest perfection, and are strongly recommended in all cases where support may be necessary. They are light and elastic, and, being washable, do not produce that injurious heat so much complained of in all other Bandages.

The only Patent Elastic Bandages ever invented that secure permanent compression to the part affected without seams or lacing.

INDIA-RUBBER URINALS, FOR MALE AND FEMALE RAILWAY TRAVELLERS, INVALIDS, AND CHILDREN.

These Urinals are made on the most approved principles, and are all fitted with the recently invented valve, which will not allow any return of the water by the upper part, by being placed in any position, and from their improved construction are better than any similar articles at present in use.

SPARKS & SON also manufacture the following articles:—Artificial Legs and Arms, Dr. Locoek's Belts and Syringes, Moulded Leather, Gutta Percha, and other Splints, every de-

scription of Trusses, with or without springs, Instruments to relieve and cure Deformity, India-Rubber and Elastic Cotton Bandages, Arm Slings, Air Cushions, Waterproof Bed Sheets, Belts and Bandages for Cholera, and every contrivance to relieve the Invalid and Wounded, &c. &c.

* * * Hospitals, Unions, and other Public Institutions supplied on the lowest possible Terms.

Country Orders are to be accompanied by a Money Order, payable at the Post-office, Piccadilly, London, addressed to SPARKS and SON.

**DR. CAPLIN'S ELECTRO-CHEMICAL
BATH ESTABLISHMENT,
9, YORK-PLACE, BAKER-STREET, PORTMAN-
SQUARE.**

For the extraction of Mercury, Lead, and other Metallic or inert insimilable substances, which, by their presence in the human organism, impair the vital functions, and produce that extended range of chronic diseases which have hitherto baffled every known resource of the healing art; such as Secondary Symptoms, Simple and Mercurial Rheumatisms, Articular and Scattered Concretions, Liver Complaints, Obesity, Menstrual Irregularities, Hysteria, Nervous Irritability, General Debility, Jaundice, Paralysis, Sciatica, Neuralgia, Lumbago, and every disease resulting from the retention of morbid matter in the system.

The taking of the Bath is most soothing and comfortable, generally affording immediate relief to the patient, and may in all cases, either acute or chronic, be tried without the least danger.

For the scientific demonstration of its *modus operandi*, see the Second Edition, price 1s., 8vo., of

**DR. CAPLIN'S TREATISE ON THE ELECTRO-
CHEMICAL BATH,**

And the Relation of Electricity to the Phenomena of Life, Health, and Disease.

W. Freeman, 69, Fleet-street, and at the Author's Establishment, 9, York-place, Portman-square.

TO THE MEDICAL PROFESSION.

Dr. CAPLIN being anxious, in the interest of suffering humanity, to fairly establish the value and propound the use of this new therapeutic agent, earnestly solicits Medical and Scientific Gentlemen to visit his establishment, in order to investigate the nature and test the merit of this discovery; when he will be most happy to furnish them with every information they may wish on the subject, from 2 to 4 o'clock, daily.

Gratuitous consultation daily, from 9 to 10 o'clock A.M.

N.B. Will shortly be published, a Book of Cases treated by this method, in which its successful application will clearly be demonstrated.

Dr. CAPLIN begs also to intimate that he has added to his establishment a first-class Bath Room, well ventilated, elegantly fitted up, and affording every possible comfort.

PATRONISED BY HER MAJESTY THE QUEEN.

**DR CAPLIN'S
HYGIENIC GYMNASIUM, KINESITHERA-
PIC AND ORTHOPÆDIC INSTITUTION,
9, YORK-PLACE, BAKER-STREET, PORTMAN-SQUARE.**

A Special Establishment for Ladies and Children.

Prize Medal at the Exhibition of all Nations, 1851.

The only one awarded for Gymnastic Apparatus and Spinal Instruments.

GYMNASTICS is the science of regulating bodily exercise in accordance with the anatomical structure of the human body, in order to produce the physiological phenomena by which the equilibrium of the muscular system is preserved or re-established, and the regularity of the human frame obtained in harmony with the free play of the vital functions,—these conditions being indispensable to *health, beauty, and happiness.*

KINESITHERAPY is the science of preventing and curing disease by movements. This system, introduced by Ling, of Sweden, particularly consists in the practice of passive movements, offering the advantage to be used with helpless invalids and young children of the most delicate constitution.

ORTHOPÆDY is the scientific and philosophical appliance of means to the cure of

DEFORMITIES OF THE SPINE.

The combination of these three systems into one is the foundation of the principle of DYNAMOGENESY,* founded by Dr. CAPLIN. His establishment has been created for the purpose of carrying out this system to all its extent.

In conclusion, his Gymnasium is furnished with every variety of apparatus that a course of *physical education* may require, and the ultimate result is, that by healthy and amusing exercises, the strength, symmetry, elegance, and beauty of the human frame are developed, the vital function stimulated, health secured, mental capacity improved, and happiness increased.

Kinesitherapy, as already stated, affords a remedial agent and wholesome preventive in the incipient stage of weakness, debility, and predisposition to malformation.

The Orthopædic department constitutes the curative process for DEFORMITIES OF THE SPINE, by the additional appliances of Mechanical assistance, Manipulations, Local Vapour Douches, or Electricity, as the case may require. This mode of treatment constitutes the alleviating system introduced by Dr. CAPLIN, as, instead of causing pain, it relieves the patient. Thus, whether lateral, outward, or inward curvature of the Spine, if attended to in time, will be promptly and perfectly cured; and even in its worst form, the evil is arrested at once, the appearance of the figure greatly improved, the health restored, the mental condition and spirits renovated. *Vide* Dr. Caplin's "Lectures on the Causes and Nature of Deformities of the Spine, and the rational means of curing that disorder." Second Edition, price 1s., to be had at Dr. Caplin's Institution, 9, York-place, Baker-street, Portman-square.

Consultations from 10 to 1 o'clock.

* Dynamogenesis signify the means of regenerating the physical strength and vital force of the organism. *Vide* Dr. Caplin's Treatise on that subject, price 6d, second edition, to be had at his establishment.

BY HER MAJESTY'S LETTERS PATENT.

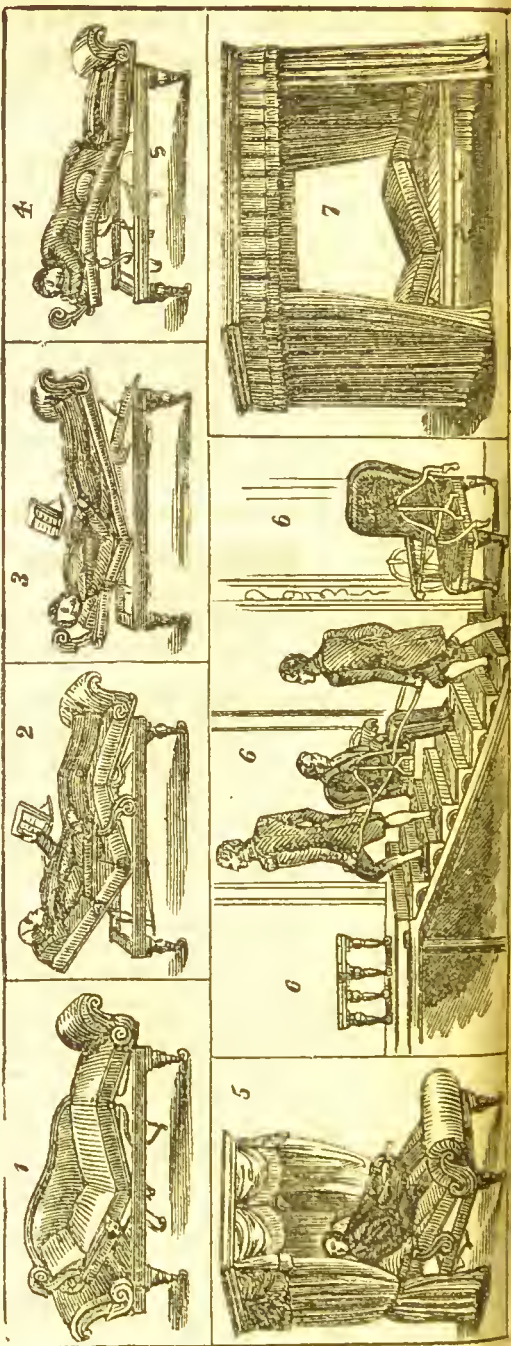

COMFORT FOR INVALIDS

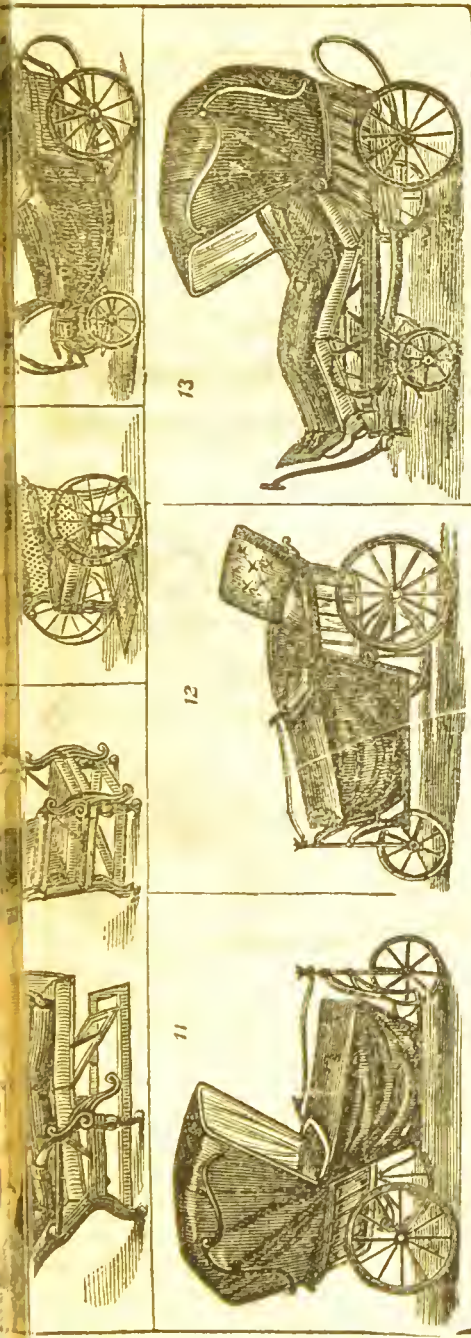

8 DENMARK ST. SOHO LONDON.

ROYAL WARRANT TO HIS MAJESTY THE KING

MADE IN ENGLAND

J. ALDERMAN, Nephew and Successor to Mr. CHAPMAN, begs most respectfully to inform his Friends and the Medical Profession, that after many years' experience in the manufacture of all kinds of Invalid Beds, Couches, Chairs, Carriages, &c., and more especially the well-known Earle's Fracture Bed, he has obtained Her Majesty's Letters Patent for his imperceptibly Graduating, Mechanical, and Elastic Adjustments, which he has invented for the comfort and convenience of Invalids; he has also made them applicable to all kinds of Operating Couches and Chairs, for surgical and dental purposes. Earle's Bed, a few years ago, was used principally for Fractures, it being too hard, and its movements too coarse, for general use; but by carefully studying the properties of this Bed, or Couch, the Patentee saw that by proper mechanical and elastic adjustments it might be made the most perfect, useful, and elaborate piece of Furniture extant. To accomplish this would be a work of time and expense, and could only be attained by being constantly working for Invalids, and making careful experiments to alleviate the sufferings of the various patients, so as to render the Bed or Couch suitable for every case.

The Patentee is now happy to say, that after many years' experience in trying every mechanical action and elastic adjustment that could be thought of, to alleviate the sufferings by every possible change of position, and that imperceptibly to the Patient, at the same time avoiding all pressure by his elastic adjusting foundation and mattresses, to prevent bed-sores, so as to supersede the use of water, he has at length succeeded in making his mechanical and elastic adjustments so simple and perfect as to be able to apply them to all sorts of Invalid Furniture, Earle's Bed, or Couch, can now be safely said to be the most perfect, useful, and elaborate piece of furniture in use, and will be found the greatest boon to all those who are suffering from Spinal Affections, Hip Complaints, Paralysis, Fractures, and in all cases where perfect rest is required. Ladies, who require complete rest before and after their Confinements, will find this Couch a great luxury. The Illustrations—1, 2, 3, 4, 5, and 7—will show the various ways and positions in which this Couch can be fitted-up and used.

These Beds or Couches, are also fitted-up for Hospital use, and with every necessary arrangement to prevent the patient being removed. The Patentee would particularly recommend them for the use of our Military Hospitals, where they would be found of the greatest comfort and convenience, both to the surgeon and patient.

Nos. 6, 6, 6, is an illustration of J. Alderman's Patent Portable Equilibrium Carrying Chair, by which a patient can be carried up or down stairs with perfect ease and safety, the Chair always adjusting itself, which enables the two persons who carry to walk up or down stairs in the usual way, and quite erect, with their arms down, so as to avoid any strain upon the muscles: it has also a sliding

stand upon very easy Castors, so that it can be used as an Easy Chair to prevent the patient being disturbed.

Nos. 8, is the Patent Self-Adjusting Invalid Chair, which is adjusted by Graduated Imperceptible Mechanism. This Chair, like the Couch, has been a work of time, the Patentee having followed Nature in every part of it: for instance, when the back is depressed, the arms, the seat, and the leg-rest, all work together imperceptibly, so that not a muscle of the patient is disturbed. In order that the patient may get on and off from either side while the leg-rest is up, either of the arms can be taken off.

Nos. 9 is a Self-Propelling Chair, which renders a patient quite independent, being able to go from room to room without any assistance.

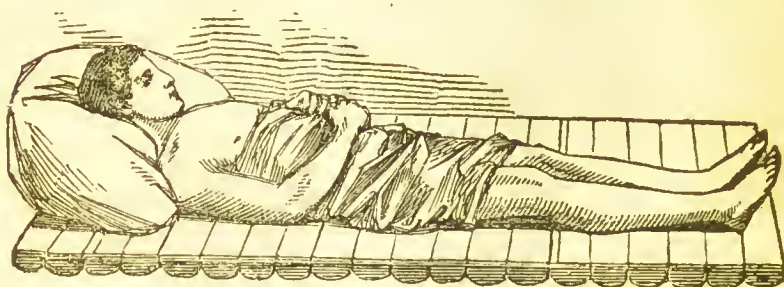

Nos. 10 is a four-wheeled Brighton Chair, suitable for either hand or Pony. Nos. 11 and 12 are three-wheeled Garden or Bath Chairs, with and without a hood.

Nos. 13 is J. Alderman's Improved Spinal or Sofa Carriage, mounted upon C and under-springs; also the patent noiseless wheels, if required. The Couch being made to slide on and off the carriage, and having a stand upon easy castors for the room, prevents the necessity for the patient's removal from the Couch.

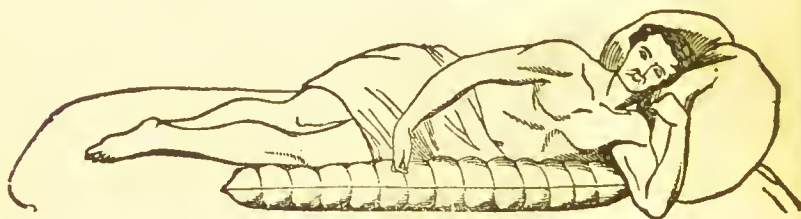

J. A. begs to state, that in order to bring these general comforts within the reach of all those who do not wish to purchase, he intends LENDING THEM ON HIRE, and where the hirer wishes to become a purchaser within the third month, the hire will be deducted.

N.B. Inclined Planes, Prono Couches, Bed Chairs, and every other article required by invalids.

WALTERS' RAILWAY URINALS, FOR TRAVELLERS AND INVALIDS.

F. WALTERS having originally invented these Urinals, begs to warn the Profession of the many bad and useless imitations which are now sold, and he would advise them, before purchasing, to look that they are stamped with his name; as, unless that be the case, he cannot guarantee them.

Made of Solid India-rubber, with Patent Valve, and adapted for Ladies, Gentlemen, and Children.

Manufacturer, by appointment, of Dr. Winn's PUDENDAL BANDAGE for Prolapsus Uteri.—See Article in 'Lancet,' Aug. 22, 1857.

Patent Jacquard Weaving in Shapes,

For ELASTIC SURGICAL BANDAGES.

C. BECKWITH, sole Manufacturer and Patentee, 13, Marlborough-row, Regent-street, London, begs to inform the Profession that he has appointed F. WALTERS Agent for the sale of his Patent Jacquard Stockings, Knee-caps, Socks, Thigh Bandages, Belts, &c.

The peculiarity of this Patent is, that the full elasticity of the Vulcanised India-rubber is not in the slightest degree restrained by the non-elasticity of the silk, which is woven with it. They are woven WITHOUT SEAM, so that the pressure is perfectly equable over the whole surface. Being much thinner than any other hitherto made, they do not obstruct the action of the skin.

Curvature of the Spine.

These cases require the greatest judgment, in order so to adapt the mechanical assistance that there may be support without undue pressure. F. Walters having paid great attention to the subject, and having studied anatomy at St. Bartholomew's Hospital, can confidently offer his services to those in the Profession who may have Patients suffering under this disease.

Hot Fomentations.

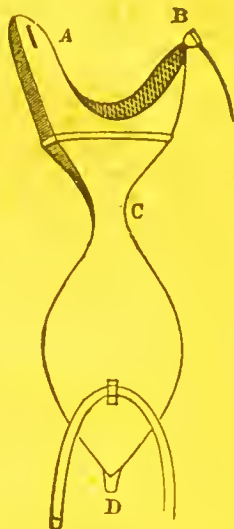

WALTERS' INDIA-RUBBER BAGS for hot water will be found the most convenient and useful application for all cases of cholera, and whenever it may be necessary to apply heat to any part of the body. It is well known that, whatever may be the treatment for this disease, it is most important that the abdomen and the feet should be kept warm. Price from 12s. 6d.; by post, 15s.

New Truss for Hernia.

F. WALTERS begs to call attention to his New Truss, with improved water pad. The advantage of water is extreme softness, and the certainty of the pressure being always in the proper place. This Truss has received the approbation of the most eminent Surgeons, many of whom pronounce it the most perfect ever yet produced. Manufacturer of Trusses, Enema Syringes, and Anatomical and Surgical Instruments. Elastic Stockings to draw on without lacing. Suspenders for Riding and Hunting.

A Female to attend on Ladies.—N.B. Ladies' Entrance, Private Door.
